**European War and Diplomacy, 1337-1815** William Young, 2003-10 The history of international relations and warfare of early modern Europe has gained popularity in recent years This bibliography provides a valuable listing of books dissertations and journal articles in the English language for scholars and general readers interested in diplomatic relations and warfare from the Hundred Years War to the Napoleonic Wars

**The Limits of Empire: European Imperial Formations in Early Modern World History** William Reger, 2016-03-03 This volume published in honor of historian Geoffrey Parker explores the working of European empires in a global perspective focusing on one of the most important themes of Parker's work the limits of empire which is to say the centrifugal forces sacral dynastic military diplomatic geographical informational that plagued imperial formations in the early modern period 1500 1800 During this time of wrenching technological demographic climatic and economic change empires had to struggle with new religious movements incipient nationalisms new sea routes new military technologies and an evolving state system with complex new rules of diplomacy Engaging with a host of current debates the chapters in this book break away from conventional historical conceptions of empire as an essentially western phenomenon with clear demarcation lines between the colonizer and the colonized These are replaced here by much more fluid and subtle conceptions that highlight complex interplays between coalitions of rulers and ruled In so doing the volume builds upon recent work that increasingly suggests that empires simply could not exist without the consent of their imperial subjects or at least significant groups of them This was as true for the British Raj as it was for imperial China or Russia Whilst the thirteen chapters in this book focus on a number of geographic regions and adopt different approaches each shares a focus on and interest in the working of empires and the ways that imperial formations dealt with or failed to deal with the challenges that beset them Taken together they reflect a new phase in the evolving historiography of empire They also reflect the scholarly contributions of the dedicatee Geoffrey Parker whose life and work are discussed in the introductory chapters and we're proud to say in a delightful chapter by Parker himself an autobiographical reflection that closes the book

**European Warfare, 1350-1750** Frank Tallett, D. J. B. Trim, 2010-01-28 The period 1350 1750 saw major developments in European warfare which not only had a huge impact on the way wars were fought but also are critical to long standing controversies about state development the global ascendancy of the West and the nature of military revolutions past and present However the military history of this period is usually written from either medieval or early modern and either Western or Eastern European perspectives These chronological and geographical limits have produced substantial confusion about how the conduct of war changed The essays in this book provide a comprehensive overview of land and sea warfare across Europe throughout this period of momentous political religious technological intellectual and military change Written by leading experts in their fields they not only summarise existing scholarship but also present new findings and new ideas casting new light on the art of war the rise of the state and European expansion

Beholding Violence in Medieval and Early Modern Europe Allie Terry-Fritsch, 2017-07-05 Interested in the ways in which medieval and early modern communities have acted as participants observers and interpreters of events and how they ascribed meaning to them the essays in this interdisciplinary collection explore the concept of beholding and the experiences of individual and collective beholders of violence during the period Addressing a range of medieval and early modern art forms including visual images material objects literary texts and performances the contributors examine the complexities of viewing and the production of knowledge within cultural political and theological contexts In considering new methods to examine the process of beholding violence and the beholder s perspective this volume addresses such questions as How does the process of beholding function in different aesthetic conditions Can we speak of such a thing as the period eye or an acculturated gaze of the viewer If so does this particularize the gaze or does it risk universalizing perception How do violence and pleasure intersect within the visual and literary arts How can an understanding of violence in cultural representation serve as means of knowing the past and as means of understanding and potentially altering the present **Dynasty and Piety** Luc Duerloo, 2016-04-29 The youngest son of Emperor Maximilian II and nephew of Philip II of Spain Archduke Albert 1559 1621 was originally destined for the church However dynastic imperatives decided otherwise and in 1598 upon his marriage to Philip s daughter the Infanta Isabella Clara Eugenia he found himself ruler of the Habsburg Netherlands one of the most dynamic yet politically unstable territories in early modern Europe Through an investigation of Albert s reign this book offers a new and fuller understanding of international events of the time and the Habsburg role in them Drawing on a wide range of archival and visual material the resulting study of Habsburg political culture demonstrates the large degree of autonomy enjoyed by the archducal regime which allowed Albert and his entourage to exert a decisive influence on several crucial events preparing the ground for the Anglo Spanish peace of 1604 by the immediate recognition of King James clearing the way for the Twelve Years Truce by conditionally accepting the independence of the United Provinces reasserting Habsburg influence in the Rhineland by the armed intervention of 1614 and devising the terms of the O ate Treaty of 1617 In doing so the book shows how they sought to initiate a realistic policy of consolidation benefiting the Spanish Monarchy and the House of Habsburg Whilst previous work on the subject has tended to concentrate on either the relationship between Spain and the Netherlands or between Spain and the Empire this book offers a far deeper and much more nuanced insight in how the House of Habsburg functioned as a dynasty during these critical years of increasing religious tensions Based on extensive research in the archives left by the archducal regime and its diplomatic partners or rivals it bridges the gap between the reigns of Philip II and Philip IV and puts research into the period onto a fascinating new basis *Prisoners in War* Sibylle Scheipers, 2010-02-25 This book contains contributions by leading scholars from the fields of history international relations law and philosophy It includes novel research findings on the crusades detention and interrogation policies in Northern Ireland the Chechnya conflict and the impact of Western detention policies on Al Qaeda s tactics and narratives

**the Great Powers in the 21st Century** C. Dale Walton, 2007-06-11 This book argues that in the twenty first century Eastern Eurasia will replace Europe as the theatre of decision in international affairs and that this new geographic and cultural context will have a strong influence on the future of world affairs For half a millennium the great powers have practised what might be called world politics yet during that time Europe and small portions of the Near East and North Africa strategically vital to Europe were the centres of gravity in international politics This book argues that the unipolar moment of the post

Cold War era will not be replaced by a US China Cold War but rather by a long period of multipolarity in the twenty first century Examining the policy goals and possible military political strategies of several powers this study explains how Washington may play a key role in eastern Eurasian affairs if it can learn to operate in a very different political context Dale Walton also considers the rapid pace of technological change and how it will impact on great power politics Considering India China the US Russia Japan and other countries as part of a multipolar system he addresses the central questions that will drive US policy in the coming decades Geopolitics and the Great Powers in the 21st Century will be of interest to students of international security military history geopolitics and international relations Imperial Lyric Leah

**the Early Modern World** Igor Pérez Tostado,2023-05-04 Historical studies of genocide in the 20th century trace the roots back to the sociopolitical economic and cultural developments of the early modern period From globalization to urbanization to imperialism state formation and homogenization from religious warfare to enlightenment to racism many factors connected with genocide first emerged or vastly developed between the 15th and 18th centuries While the early modern period did not have a crime of genocide it possessed its own legal system which contemplated the rightful destruction of whole peoples and a political culture that sanctioned the use of mass violence As a result early modern genocide has been denied or blurred as a regrettable side effect of the global circulation of ideas goods and peoples and the creation of new societies cultures and languages arising from it This collection looks at the different genocides which unfolded around the globe emphasizing its gendered dimension and its disproportionate and enduring impact on indigenous populations Although European imperialism and homogenization play a central role it aims more widely to cover the principal agents victims and rationale for genocide in the early modern world As a whole this volume aims at fostering the debate on the early modern
