## **Successful Assertive Management:**

Successful Cross-Cultural Management Parissa Haghirian, 2012-01-06 Globalization and unlimited connectedness to all places in the world give us the impression that our world is growing smaller and smaller. We can get products from all over the world anytime, can easily communicate with people on the other side of the planet with just a mouse click and travel almost anywhere within a day or two. These developments are very inspiring and open up an array of new experiences and opportunities for us in our private lives and in international business. However, all these rapid changes over the past decade often lead people to believe differences between people and cultures have disappeared and that there are less cultural barriers than in our past. But the contrary is true. Despite increasing connectivity and globalization, cultural differences remain. The more connected and international we become, the more differences between cultures, their views on the world, values, and communication styles become evident. In international management, these differences play an increasingly essential role. International managers are supposed to succeed in an arena where rules are very different and difficult to understand but often not obvious. They must show interest and openness in foreign cultures and their management practices. In many cases, even change their old, often very successful ways to succeed. This is a huge challenge. Even managers who show great interest in understanding international business culture and who want to experience exotic cultures cannot do this so easily. They still find it difficult to understand colleagues and business people from a different cultural background. On top of this, many work processes have not changed or adapted to a global environment yet and are still performed in the traditional way. Thus, misunderstandings, conflicts, and stress are frequently accompanying international business activities and end in lost opportunities and business failure.

Successful Cross Cultural Management: A Guide for International Managers looks at the practical implications of doing business overseas. The book explains how we all have our own cultural programs and how these programs influence our management activities. It discusses which cross-cultural experiences managers have, how they react to stress and misunderstandings during these encounters, and which strategies they can develop to successfully reach their goals. It covers all aspects of cross-cultural management, such as cross-cultural negotiations, conflict, and leadership, and explains how to deal with culture shock and which training methods to choose when preparing employees for an international assignment. Mini case studies and cross-cultural incidents present vivid examples of the international workplace and its cultural challenges. Finally, the book gives recommendations for international managers on how to prepare themselves for a cross-cultural management future.

Successful Cross Cultural Management: A Guide for International Managers is a book for managers who work overseas or frequently deal with international business partners, students of international business who want to get insights into cross-cultural business activities and their cultural challenges, and also for people who would like to strengthen and improve their cross-cultural relationships and friendships.

**Success and Failure in the Aviation Industry** Howard G. Jones,1999 This dissertation shows how the history of the Waco

Aircraft Company reflects the transformation of the American economy in the twentieth century Beginning just after the First World War its entrepreneur Clayton J Brukner developed a network of relationships within the aviation industry This allowed his company to develop significant competitive advantages in the private flying market Those advantages and the popular appeal of aviation helped Waco to become the largest manufacturer of civilian aircraft by 1929 The transformation of business government relations during the New Deal demanded changes in Brukner s business strategy The depression significantly cut sales of its popular biplanes but Waco kept its Troy Ohio factory open and earned some profits during the downturn Brukner s involvement with the trade associations in the 1930s revealed the critical role the government the military in particular played in the development of aviation His flawed leadership in the changing context led to decisions that degraded the quality of its network signals and diminished Waco s effectiveness in crafting appropriate policies As the international situation grew increasingly tense throughout the 1930s Waco like other manufacturers turned to exports to enhance sales Contracts with foreign governments partially offset the setback the depression had caused domestically They did not however drive Brukner to evaluate sufficiently Waco s potential participation in the U S military market Only after the Munich Crisis in September 1938 when President Franklin D Roosevelt decided to call for increased military spending did the Waco Aircraft Company position itself to receive defense contracts It was almost three years however before the Army Air Forces directed the company to design and manufacture transport aircraft and cargo gliders In the meantime Brukner had not developed the organizational capabilities needed to manage military contracts
