Friedman, Roxane

Cohen Silver, 2007 Health psychology is the scientific study of psychological processes related to health and health care. Although the field is only 25 years old, it has burgeoned into a major scientific and clinical discipline. Health psychology has excellent scientific journals, thousands of scientists and practitioners, and many students. Yet there has not been a sufficient statement or explication of the foundational concepts upon which this flourishing field is built. *Foundations of Health Psychology* brings together top experts to provide a much needed conceptual base for this rapidly expanding field. Rather than take a medical model approach, the volume examines health psychology from a theoretical, conceptual, and psychological perspective. After presenting an overview of the field's history and methods, the contributors address core concepts of the biopsychosocial approach to health and then discuss applications to health promotion and illness prevention and treatment. Providing a deep understanding of the intellectual foundations of health psychology, this volume will be invaluable for both new and experienced researchers as well as students and other scholars seeking a firm basis for successful research and practice.

**Occupational Therapy with Aging Adults** Karen Frank Barney, Margaret Perkinson, 2015-12-11 Look no further for the book that provides the information essential for successful practice in the rapidly growing field of gerontological occupational therapy. *Occupational Therapy with Aging Adults* is a new comprehensive text edited by OT and gerontological experts Karen Frank Barney and Margaret Perkinson that takes a unique interdisciplinary and collaborative approach in covering every major aspect of geriatric gerontological occupational therapy practice. With 30 chapters written by 70 eminent leaders in gerontology and OT, this book covers the entire continuum of care for the aging population along with special considerations for this rapidly growing demographic. This innovative text also covers topical issues spanning the areas of ethical approaches to treatment, nutrition and oral health concerns, pharmacological issues, low vision interventions, assistive technology supports, and more to ensure readers are well versed in every aspect of this key practice area. UNIQUE Intraprofessional and interprofessional approach to intervention emphasizes working holistically and collaboratively in serving older adults. Case examples help you learn to apply new information to actual patient situations. Questions at the end of each chapter can be used for discussion or other learning applications. Chapter on evidence based practice discusses how to incorporate evidence into the clinical setting. Chapter on ethics provides a deeper understanding of how to address challenging ethical dilemmas. UNIQUE Chapter on the wide range of physiological changes among the aging patient population highlights related occupational performance issues. UNIQUE Chapter on oral health explores the challenges faced by older adults.
