Reading in Time Cristanne Miller, 2012 This book provides new information about Emily Dickinson as a writer and new ways of situating this poet in relation to nineteenth century literary culture examining how we read her poetry and how she was reading the poetry of her own day Cristanne Miller argues both that Dickinson s poetry is formally far closer to the verse of her day than generally imagined and that Dickinson wrote circulated and retained poems differently before and after 1865 Many current conceptions of Dickinson are based on her late poetic practice Such conceptions Miller contends are inaccurate for the time when she wrote the great majority of her poems Before 1865 Dickinson at least ambivalently considered publication circulated relatively few poems and saved almost everything she wrote in organized booklets After this date she wrote far fewer poems circulated many poems without retaining them and took less interest in formally preserving her work Yet Miller argues even when

circulating relatively few poems Dickinson was vitally engaged with the literary and political culture of her day and in effect wrote to her contemporaries Unlike previous accounts placing Dickinson in her era Reading in Time demonstrates the extent to which formal properties of her poems borrow from the short lined verse she read in schoolbooks periodicals and single authored volumes Miller presents Dickinson s writing in relation to contemporary experiments with the lyric the ballad and free verse explores her responses to American Orientalism presents the dramatic lyric as one of her preferred modes for responding to the Civil War and gives us new ways to understand the patterns of her composition and practice of poetry

Cheetahs of the Serengeti Plains Timothy M. Caro, 1994-08-15 *Cheetahs of the Serengeti Plains* is the most comprehensive account of carnivore social behavior to date Synthesizing more than a decade of research in the wild this book offers a detailed account of the behavior and ecology of cheetahs Compared with other large cats and other mammals cheetahs have an unusual breeding system whereas lions live in prides and tigers are solitary some cheetahs live in groups while others live by themselves Tim Caro explores group and solitary living among cheetahs and discovers that the causes of social behavior vary dramatically even within a single species Why do cheetah cubs stay with their mother for a full year after weaning Why do adolescents remain in groups Why do adult males live in permanent associations with each other Why do adult females live alone Through observations on the costs and benefits of group living Caro offers new insight into the complex behavior of this extraordinary species For example contrary to common belief about cooperative hunting in large carnivores he shows that neither adolescents nor adult males benefit from hunting in groups With many surprising findings and through comparisons with other cat species Caro enriches our understanding of the evolution of social behavior and offers new perspectives on conservation efforts to save this charismatic and endangered carnivore
