*God and Logic in Islam* John Walbridge,2010-11-15 This book investigates the central role of reason in Islamic intellectual life Despite widespread characterization of Islam as a system of belief based only on revelation John Walbridge argues that rational methods not fundamentalism have characterized Islamic law philosophy and education since the medieval period His research demonstrates that this medieval Islamic rational tradition was opposed by both modernists and fundamentalists resulting in a general collapse of traditional Islamic intellectual life and its replacement by more modern but far shallower forms of thought However the resources of this Islamic scholarly tradition remain an integral part of the Islamic intellectual tradition and will prove vital to its revival The future of Islam Walbridge argues will be marked by a return to rationalism

**In-Between: Architectural Drawing and Imaginative Knowledge in Islamic and Western Traditions** Hooman Koliji,2016-03-09 Contemporary technical architectural drawings in establishing a direct

relationship between the drawing and its object tend to privilege the visible physical world at the expense of the invisible intangible ideas and concepts including that of the designer s imagination As a result drawing may become a utilitarian tool

for documentation devoid of any meaningful value in terms of a kind of knowledge that could potentially link the visible and invisible This book argues that design drawings should be recognized as intermediaries mediating between the world of ideas and the world of things spanning the intangible and tangible The notion of the Imaginal as an intermediary between the invisible and visible is discussed showing how architectural drawings lend themselves to this notion by performing as creative agents contributing not only to the physical world but also penetrating the realm of concepts The book argues that this in between quality to architectural drawing is essential and that it is critical to perceive drawings as subtle bodies that hold physical attributes for example form proportion color highly evocative yet with no matter Focusing on Islamic geometric architectural drawings both historical and contemporary it draws on key philosophical and conceptual notions of imagination from the Islamic tradition as these relate to the creative act In doing so this book not only makes important insights into the design process and act of architectural representation but more broadly it adds to debates on philosophies of the imagination linking both Western and Islamic traditions

**Sufism and American Literary Masters** Mehdi Aminrazavi, 2014-10-15 This book reveals the rich but generally unknown influence of Sufism on nineteenth and early twentieth century American literature The translation of Persian poets such as Hafiz and Sa di into English and the ongoing popularity of Omar Khayyam offered intriguing new spiritual perspectives to some of the major American literary figures As editor Mehdi Aminrazavi notes these Sufi influences have often been subsumed into a notion of Eastern chiefly Indian thought and not acknowledged as having Islamic roots This work pays considerable attention to two giants of American literature Ralph Waldo Emerson and Walt Whitman who found much inspiration from the Sufi ideas they encountered Other canonical figures are also discussed including Mark Twain Herman Melville Henry David Thoreau and Henry Wadsworth Longfellow along with literary contemporaries who are lesser known today such as Paschal Beverly Randolph Thomas Lake Harris and Lawrence Oliphant

**Treasures of Knowledge: An Inventory of the Ottoman Palace Library (1502/3-1503/4) (2 vols)** Gülru Necipoğlu, Cemal Kafadar, Cornell H. Fleischer, 2019-08-12 The subject of this two volume publication is an inventory of manuscripts in the book treasury of the Topkapı Palace in Istanbul commissioned by the Ottoman sultan Bayezid II from his royal librarian Atufi in the year 908 1502 3 and transcribed in a clean copy in 909 1503 4 This unicum inventory preserved in the Oriental Collection of the Library of the Hungarian Academy of Sciences Magyar Tudomány Akadémia Könyvtára és Levéltára Gyűjtemény MS T r k F 59 records over 5 000 volumes and more than 7 000 titles on virtually every branch of human erudition at the time The Ottoman palace library housed an unmatched encyclopedic collection of learning and literature hence the publication of this unique inventory opens a larger conversation about Ottoman and Islamic intellectual cultural history The very creation of such a systematically ordered inventory of books raises broad questions about knowledge production and practices of collecting readership librarianship and the arts of the book at the dawn of the sixteenth century The first volume contains twenty eight interpretative essays on this fascinating document authored by a team of scholars from diverse

disciplines including Islamic and Ottoman history history of science arts of the book and codicology agriculture medicine astrology astronomy occultism mathematics philosophy theology law mysticism political thought ethics literature Arabic Persian Turkish Turkic philology and epistolary Following the first three essays by the editors on implications of the library inventory as a whole the other essays focus on particular fields of knowledge under which books are catalogued in MS T r k F 59 each accompanied by annotated lists of entries The second volume presents a transliteration of the Arabic manuscript which also features an Ottoman Turkish preface on method together with a reduced scale facsimile
