**The Development of Iron Chelators for Clinical Use**

Raymond J. Bergeron,Gary M. Brittenham,1993-12-06 Representing an integration of basic and clinical sciences this book focuses on new concepts in the design synthesis and testing of iron chelators for clinical application It provides an overview of the pathophysiology of iron metabolism as it relates to the origins of iron mediated tissue damage and it clearly outlines successes and shortcomings of current iron chelation therapy in preventing such damage The book also describes a number of other exciting potential therapeutic applications of iron chelators such as in the treatment of malaria Other topics covered include iron coordination chemistry recent advances in synthetic methods for accessing iron chelators siderophore models subcellular iron storage targets and the possible application of biotechnology in the production of therapeutically useful iron chelators The book also describes new animal models for evaluating chelators

**Molecular and Cellular Iron Transport**

Douglas Templeton,2002-01-23 This text analyzes the molecular mechanisms chemical behaviour and regulation of iron transport in biological systems and offers novel methods for the assessment of iron transport across biological membranes It details the characteristics and consequences of iron deficiency and excess to prevent diseases affecting major organ structures and promote bodily iron homeostasis
