Brinn, Callum Jones, 2023-12-01 *Global Heating and the Australian Far Right* examines the environmental politics of far right actors and movements in Australia exploring their broader political context and responses to climate change. The book traces the development of far right pseudo environmentalism and territorial politics from colonial genocide and Australian nationalism to extreme right political violence. Through a critical analysis of news and social media it reveals how denialist and resignatory attitudes towards climate change operate alongside extreme right accelerationism in a wider Australian political context characterised by reactionary fossil fuel politics and neoliberal New Right climate change agendas. The authors scrutinise the manipulation of environmental politics by contemporary Australian far and extreme right actors in cross national online media. They also assess the political ideological context of the contemporary far right addressing intergovernmental approaches to security threats connected to the far right and climate change and the emergence of radical environmentalist traditions in New Catastrophism literature. The conclusion synthesises key insights analysing the mainstreaming of ethnonationalist and authoritarian responses to global heating and potential future trajectories of far right movements exploiting the climate crisis. It also emphasises the necessity for radical political alternatives to counter the far right's exploitation of climate change. This book will be of interest to researchers of climate change, the far right, neoliberal capitalism, extremism and Australian politics.

Climate Action Upsurge Stuart Rosewarne, James Goodman, Rebecca Pearce, 2013-11-20. In the late 2000s climate action became a defining feature of the international political agenda. Evidence of global warming and accelerating greenhouse gas emissions created a new sense of urgency and despite consensus on the need for action the growing failure of international climate policy engendered new political space for social movements. By 2007 a climate justice movement was surfacing and developing a strong critique of existing official climate policies and engaging in new forms of direct action to assert the need for reduced extraction and burning of fossil fuels. *Climate Action Upsurge* offers an insight into this important period in climate movement politics drawing on the perspectives of activists who were directly engaged in the mobilisation process. Through the interpretation of these perspectives the book illustrates important lessons for the climate movement today. In developing its examination of the climate action upsurge the book focuses on individual activists involved in direct action Climate Camps in Australia while drawing comparisons and highlighting links with climate campaigns in other locales. The book should be of interest to scholars and researchers in climate change, environmental sociology, politics, policy and activism.
