Social Context Of Innovation:

The Social Context of Innovation Anthony F. C. Wallace, 1982 Social Innovations in the Urban Context Taco Brandsen, Sandro Cattacin, Adalbert Evers, Annette Zimmer, 2016-04-05 This book addresses the practice of social innovation which is currently very much in the public eye New ideas and approaches are needed to tackle the severe and wicked problems with which contemporary societies are struggling Especially in times of economic crisis social innovation is regarded as one of the crucial elements needed to move forward Our knowledge of its dynamics has significantly progressed thanks to an abundance of studies on social innovation both general and sector specific However despite the valuable research conducted over the past years the systematic analysis of social innovation is still contested and incomplete The questions asked in the book will be the following 1 What is the nature of social innovations 2 What patterns can be identified in social innovations emerging at the local level 3 How is the emergence and spread of social innovations related to urban governance More precisely which conditions and arrangements facilitate and hinders social innovation We explore these questions using different types of data and methods and studying different contexts In particular we focus on innovations that aim at solving problems of the young unemployed single parents and migrants This analysis is based on original research carried out in the period 2010 2013 in the framework of a European project with a specific empirical research strategy Research was carried out in 20 cities in 10 different European countries **The Social Context of Innovation** Anthony F. C. are intrinsic connections between technological experiences and social relationships. It employs an array of theoretical concepts and methodological tools to examine the technology society nexus among three urban groups in India: traditional caste based handloom weavers, subaltern Dalit communities and informal female labour. It provides evidence of how innovations such as industrial technologies, communication technologies and workplace technologies are not only about strides in science and engineering but also about politics and sociology on the ground. The book contributes to the growing research in innovation studies and technology policy that establishes how technological processes and outcomes are contingent on complex sociological variables and contexts. The author offers an inclusive, holistic and interdisciplinary approach to understanding the field of innovation and technological change and development by involving various methodologies: network analysis, archival work, oral histories, focus group discussions, interviews. The book will serve as reference for researchers and scholars in social sciences, especially those interested in development studies, science and technology policy and innovation studies, information and communication technology, ICT policy, public policy, management, social work and research methods, economics, sociology, social exclusion and subaltern studies, women's studies and South Asian studies. It will also be useful to nongovernmental organisations, activists and policymakers.

The digital in the form of technologies, scenarios, objects, processes and relational and interactional structures is increasingly becoming central to understanding culture, society, human experience and the social world. It permeates our society's practices, symbols and shared meanings and it makes old distinctions such as the one between online and offline, real and virtual and material and immaterial obsolete. It also introduces digitally native objects of research such as cyber bullying and digital identities which have a direct impact on mainstream sociological problems.
