## **Social Decision Methodology For Technological Projects:**

*Social Decision Methodology for Technological Projects* C.A. Vlek, G. Cvetkovich, 2012-12-06 This book grew out of the conviction that the preparation and management of large scale technological projects can be substantially improved We have witnessed the often unhappy course of societal and political decision making concerning projects such as hazardous chemical installations novel types of electric power plant or storage sites for solid wastes This has led us to believe that probabilistic risk analysis technical reliability analysis and environmental impact analysis are necessary but insufficient for making acceptable and justifiable social decisions about such projects There is more to socio technical decision making than applying acceptance rules based on negligibly low accident probabilities or on maximum credible accidents Consideration must also be given to psychological social and political issues and methods of decision making Our conviction initially gave rise to an international experts workshop titled Social decision methodology for technological projects SDMTTP and held in May 1986 at the University of Groningen the Netherlands at a time when Cvetkovich spent a sabbatical there The work shop aimed at surveying the issues and listing the methods to address them was the first part of an effort whose second part was directed at the production of this volume Plans called for the book to deal systematically with the main problems of socio technical decision making it was to list a number of useful approaches and methods and it was to present a number of integrative conclusions and recommendations for both policy makers and methodologists Controlling State Crime Jeffrey

Ross, 2017-09-04 Academic research on state crime has focused on the illegal actions of individuals and organizations i e syndicates and corporations Interchangeably labeled governmental crime delinquency illegality or lawlessness official deviance and misconduct crimes of obedience and human rights violations state crime has largely been considered in relation to insurgent violence or threats to national security Generally it has been seen as a phenomenon endemic to authoritarian countries in transitional and lesser developed contexts We need look no further than today s headlines to see the evidence of state crime Rwanda where government troops massacred countless Hutus and Tutsis governmental atrocities in Kosovo at the hands of the Yugoslavian Army and East Timor where both individuals and property have been decimated largely perpetrated by the Indonesian military The study of how to control state crime has been difficult There are definitional conceptual theoretical and methodological problems as well as difficulties in designing of practical methods to abolish combat control or resist this type of behavior Jeffrey Ian Ross reviews these shortcomings then develops a preliminary model of ways to control state crime His intention is stimulating scholarly research and debate but also encouraging progressive minded policymakers and practitioners who work for governmental and nongovernmental organizations The hope is that they will reflect upon the methods they advocate or use to minimize state transgressions This new edition will be of compelling interest to students of political science and criminology as well as general readers interested in human rights state crime and world affairs **Effective Risk Communication** Joseph Arvai, Louie Rivers III, 2013-10-30 There are two questions often

asked of risk communication what has been learned from past work and what is needed to push the field forward Drawing on the experience of leading risk researchers and practitioners Effective Risk Communication focuses on answering these questions The book draws together new examples of research and practice from contexts as diverse as energy generation human health nuclear waste climate change food choice and social media This book treats risk communication as much more than the interchange of risk information between experts and non experts rather it aims to emphasise the diversity in viewpoints and practices In each specially commissioned chapter the authors reflect on the theoretical and applied underpinnings of their best projects and comment on how their approach could be used effectively by others Building upon each other the chapters will provoke new discussion and action around a discipline which many feel is neither meeting important needs in practice nor living up to its potential in research Through a more careful examination of the work already done in risk communication the book will help develop better more reflective practice for the future The Political

Potential of Sortition Oliver Dowlen,2017-04-03 The central feature of every true lottery is that all rational evaluation is deliberately excluded Once this principle is grasped the author argues we can begin to understand exactly what benefits sortition can bring to the political community The book includes a study of the use of sortition in ancient Athens and in late medieval and renaissance Italy It also includes commentary on the contributions to sortition made by Machiavelli Guicciardini Harrington and Paine an account of the history of the randomly selected jury and new research into lesser known examples from England America and revolutionary France **Availability, Reliability and Security for Business,**

**Enterprise and Health Information Systems** A Min Tjoa,Gerald Quirchmayr,Ilsun You,Lida Xu,2011-08-09 This book constitutes the refereed proceedings of the IFIP WG 8.4.8.9 International Cross Domain Conference and Workshop on Availability Reliability and Security Multidisciplinary Research and Practice for Business Enterprise and Health Information Systems ARGES 2011 held in Vienna Austria in August 2011 The 29 revised papers presented were carefully reviewed and selected for inclusion in the volume The papers concentrate on the many aspects of availability reliability and security for information systems as a discipline bridging the application fields and the well defined computer science field They are organized in three sections multidisciplinary research and practice for business enterprise and health information systems massive information sharing and integration and electronic healthcare and papers from the colocated International Workshop on Security and Cognitive Informatics for Homeland Defense Handbook of Democratic Innovation and Governance

Stephen Elstub,Oliver Escobar,2019-12-27 Democratic innovations are proliferating in politics governance policy and public administration These new processes of public participation are reimagining the relationship between citizens and institutions This Handbook advances understanding of democratic innovations in theory and practice by critically reviewing their importance throughout the world The overarching themes are a focus on citizens and their relationship to these innovations and the resulting effects on political equality The Handbook therefore offers a definitive overview of existing research on

democratic innovations while also setting the agenda for future research and practice      International Law, Human Rights and Public Opinion Heping Dang, 2017-03-16 This book explores situations in which public opinion presents itself as an obstacle to the protection and promotion of human rights Taking an international law perspective it primarily deals with two questions first whether international law requires States to take an independent stance on human rights issues second whether international law encourages States to inform and mobilise public opinion with regard to core human rights standards The discussion is mainly organised within the framework of the UN system The work is particularly relevant to situations in which public opinion appears as discriminatory attitudes based on race gender age health sexual orientation and other factors It is also pertinent to circumstances in which public opinion is responsible for the existence of certain harmful customs and practices such as female genital mutilation and capital punishment Noting that the death penalty is increasingly recognised as an infringement of human rights this study further challenges States argument that capital punishment cannot be abolished because of public opinion The book also discusses the role that education bears under international law in moulding favourable attitudes towards human rights Finally the book challenges States acceptance that public opinion cannot be confronted in this respect      Handbook of Risk and Crisis Communication Robert L. Heath, H. Dan O'Hair, 2020-10-28 The Handbook of Risk and Crisis Communication explores the scope and purpose of risk and its counterpart crisis to facilitate the understanding of these issues from conceptual and strategic perspectives Recognizing that risk is a central feature of our daily lives found in relationships organizations governments the environment and a wide variety of interactions contributors to this volume explore such questions as What is likely to happen to whom and with what consequences To what extent can science and vigilance prevent or mitigate negative outcomes and What obligation do some segments of local national and global populations have to help other segments manage risks shedding light on the issues in the quest for definitive answers The Handbook offers a broad approach to the study of risk and crisis as joint concerns Chapters explore the reach of crisis and risk communication define and examine key constructs and parse the contexts of these vital areas As a whole the volume presents a comprehensive array of studies that highlight the standard principles and theories on both topics serving as the largest effort to date focused on engaging risk communication discussions in a comprehensive manner Now available in paperback the Handbook of Risk and Crisis Communication can be readily used in graduate coursework and individual research programs With perspectives from psychology sociology anthropology political science economics and communication the Handbook provides vital insights for all disciplines studying risk and is required reading for scholars and researchers investigating risk and crisis in various contexts      Exploring Risk Communication J.M. Gutteling, O. Wiegman, 2013-03-09 Exploring Risk Communication presents a systematic planning approach to risk communication Risk communication is seen by many as an important tool for managing technological environmental and natural risks The book's goal is to improve risk communication processes in these areas between private and public risk

communication sources and the public The systematic planning approach focuses on research activities which are considered to be diagnostic tools providing insight into the public's reactions to risks and into the public's cognitive abilities to process risk information These studies give us the necessary ingredients for an adequate risk communication from the audience side of the risk communication process Evaluation studies are considered necessary to monitor the effectiveness of the communication Exploring Risk Communication provides a review of current research in risk communication focusing on perceived trust and credibility of risk communication sources and arguments in risk messages risk comparison and framing of risk Special attention is paid to the mass media context of risks and its impact on public perception Finally the potential of the new interactive media for risk communication is reviewed The authors have performed several communication studies in the risk area working from their social psychological background This results in a monograph interesting to those working on risk communication issues on an academic level but the systematic planning approach is also a useful frame of reference for risk communication practitioners or for those who are just interested in the often complex risk communication issues

**The Science of Public Policy** Tadao Miyakawa, 1999 *Governing Sustainability* W. Neil Adger, Andrew Jordan, 2009-02-05 The crisis of unsustainability is above all else a crisis of governance The transition to a more sustainable world will inevitably require radical changes in the actions of all governments and it will call for significant changes to the lifestyles of individuals everywhere Bringing together some of the world's most highly regarded experts on governance and sustainable development this book examines these necessary processes and consequences across a range of sectors regions and other important areas of concern It reveals that the governance of sustainable development is politically contested and that it will continue to test existing governance systems to their limits As an assessment of existing policy practices it will be of great interest to all those who are preparing themselves or their organisations for the sustainability transition

**Contaminated Soil '95** W.J. van den Brink, R. Bosman, F. Arendt, 2012-12-06 Towards sustainable land use Dr P Folstar Member of the TNO Board of Management Dr M Popp Chairman of the Board of Directors of Research Centre Karlsruhe FZK Ten years ago in 1985 TNO initiated the First Conference on Contaminated Soil in Utrecht At that time a rather complete inventory of suspected contaminated sites existed in The Netherlands Time had come to consider further actions for investigations evaluation and remediation This concern has been spreading ever since to other European countries and throughout the world In particular German scientists and authorities soon recognized the significance of this problem and consequently joined TNO in organizing and funding a forum for discussions in a series of conferences Following three venues in German cities the 5th conference in Maastricht a Dutch as well as a European city marks the increasing interest in the international scientific and political community Application of the concept of sustainable development to soil as an essential element of human existence requires an answer to the question how to meet the needs of today's generation without impairing the possibilities of mankind in the future As we do not know the needs of the future especially regarding the functional requirements of soil use

we can hardly do better than starting from the present priorities This can not mean to guarantee the quality of soil functions everywhere at any time
