

On the Relevance of Identities, Communities, Groups and Networks to the Economics of Poverty Alleviation

“Most of the people in the world are poor, so if we knew the economics of being poor we would know much of the economics that really matters.”

- T.W. Schultz (1980 Nobel Prize lecture)

Persistent poverty remains an analytical challenge.

Most current explanations turn on exclusionary mechanisms.

But why are some excluded and others not?

Why do only some enjoy the fruits of cooperation?

Social Economics Of Poverty On Identities Communities Groups And Networks:

The Social Economics of Poverty Christopher B. Barrett, 2006-10-03 A unique analysis of the moral and social dimensions of microeconomic behaviour in developing countries this book calls into question standard notions of rationality and many of the assumptions of neo classical economics and shows how these are inappropriate in communities with widespread disparity in incomes This book will prove to be essential for students studying development economics

The Oxford Handbook of the Economics of Poverty Philip N. Jefferson, 2012-11-29 This Handbook examines poverty measurement anti poverty policy and programs and poverty theory from the perspective of economics It is written in a highly accessible style that encourages critical thinking about poverty What s known about the sources of poverty and its alleviation are summarized and conventional thinking about poverty is challenged

Economics of Poverty, Environment and Natural-Resource Use Rob B. Dellink, Arjan Ruijs, 2008-03-25 Reduction of poverty is a tremendous and persistent challenge for the global community Given that the livelihood of millions is at stake there is an urgent need to reconsider the causes of and the remedies for poverty Poverty and its reduction are closely linked to the natural resources base The quality and bounty of the local environment certainly affect living conditions of the poor and their poverty is often seen as a contributing factor to the degraded condition of the local environment Teasing apart the direction of causality in this resource poverty nexus is a serious empirical challenge This book contributes to an improved understanding of the economic dimensions of environmental and natural resource management and poverty alleviation The ten chapters of the book offer an overview of the current knowledge concerning the relation between poverty environment and natural resource use Three sides of the debate receive particular attention First the relation between resource use and poverty is discussed from a theoretical point of view Second it is questioned whether payments for environmental services or considering values of resources can be an effective tool for stimulating both sustainable resource use and poverty alleviation Third alternative strategies to break the land degradation poverty cycle are discussed

Maye! Maye! Sipho Sithole, 2024-10-04 This book presents an analysis of Johannesburg s Kwa Mai Mai market which was once known to regulars as a place of healing and has experienced numerous changes of significant national transformation over time It explores how the Kwa Mai Mai community formerly a working class of migrants reversed roles and took control of the means of production from the dominant class Through their heightened cultural consciousness this marginalised migrant community reimaged new economic realities and possibilities forever distancing themselves from their painful repressive past This book chronicles the significance of cultural memory and discusses how it can be used as a weapon to not only resist subjugation but also to invoke entrepreneurial and creative spirit Written out of the collective observations and interpretations of his ethnographic research spanning four years Sipho Sithole s Maye Maye is dedicated to marginalised communities and those who despite operating on the fringes of the economy have sought to create their own fortune and destiny Print edition not for sale in Sub Saharan Africa

The SAGE Encyclopedia

of Economics and Society Frederick F. Wherry, Juliet B. Schor, Consulting Editor, 2015-09-01 Economics is the nexus and engine that runs society affecting societal well being raising standards of living when economies prosper or lowering citizens through class structures when economies perform poorly Our society only has to witness the booms and busts of the past decade to see how economics profoundly affects the cores of societies around the world From a household budget to international trade economics ranges from the micro to the macro level It relates to a breadth of social science disciplines that help describe the content of the proposed encyclopedia which will explicitly approach economics through varied disciplinary lenses Although there are encyclopedias of covering economics especially classic economic theory and history the SAGE Encyclopedia of Economics and Society emphasizes the contemporary world contemporary issues and society Features 4 volumes with approximately 800 signed articles ranging from 1 000 to 5 000 words each are presented in a choice of print or electronic editions Organized A to Z with a thematic Reader s Guide in the front matter groups related entries Articles conclude with References Future Readings to guide students to the next step on their research journeys Cross references between and among articles combine with a thorough Index and the Reader s Guide to enhance search and browse in the electronic version Pedagogical elements include a Chronology of Economics and Society Resource Guide and Glossary This academic multi author reference work will serve as a general non technical resource for students and researchers within social science programs who seek to better understand economics through a contemporary lens The Oxford Handbook of Christianity and Economics Paul Oslington, 2014 The new interdisciplinary field of Christianity and economics deals with the important and difficult questions that cluster at the boundary of these disciplines drawing on contemporary theory and empirical findings in both fields with roots in older discourses This landmark volume surveys the field and advances the discussion It deploys historical economic and theological analysis to search for answers *Social Network Analysis of Disaster Response, Recovery, and Adaptation* Eric C Jones, A.J. Faas, 2016-09-09 Social Network Analysis of Disaster Response Recovery and Adaptation covers systematic social network analysis and how people and institutions function in disasters after disasters and the ways they adapt to hazard settings As hazards become disasters the opportunities and constraints for maintaining a safe and secure life and livelihood become too strained for many people Anecdotally and through many case studies we know that social interactions exacerbate or mitigate those strains necessitating a concerted intellectual effort to understand the variation in how ties within and outside communities respond and are affected by hazards and disasters Examines the role of societal relationships in a disaster context incorporating theory and case studies by experts in the field Integrates research in the areas of social network analysis and inter organizational networks Presents a range of studies from around the world employing different approaches to network analysis in disaster contexts **Adoption and Impact of Proprietary Seed Technologies in Staple Food Crops** Ira Matuschke, 2007 *Three Essays in Development Economics* David Russell Hansen, Gabriela Calderon Guemez, 2011 This

dissertation is composed of three chapters All three deal with topics in development economics The first chapter examines the effects on village institutions of introducing formal financial institution options into the village The second addresses the effects of government policy on educational investment and crime The third tests the explanatory power of various explanations of the gender gap in math test scores The first chapter examines the effects of a transition from a traditional economy based on an uncertain source of income with risk fully insured away by one's neighbors in a social network through costly network ties to a modern economy in which some agents have access to partial insurance at a lower cost A theoretical model is used to show that village social networks can break down as some members of the village no longer need the insurance the social network provides producing a reduction in welfare if the costs of reducing moral hazard are not too high for at least some individuals and possibly the village as a whole This loss of welfare can occur even when networks provide other benefits to those belonging to them and is likely to be heterogeneous depending on the opportunities and networks available to individuals This paper tests these predictions using Indonesian data to examine the effect of a change in the banking institutions available to a community on the strength of social networks measured by community participation and welfare measured by household expenditure and by child health The analysis finds that changing financial institution availability in general does not influence community participation or welfare but that financial institutions that primarily serve certain groups do relatively reduce the welfare of households not in those groups which is consistent with the hypotheses generated by the model Crime is an important feature of economic life in many countries especially in the developing world Crime distorts many economic decisions because it acts like an unpredictable tax on earnings In particular the threat of crime may influence people's willingness to invest in schooling or physical capital The second chapter explores the questions What influence do crime rates and levels of investment have on one another and How do government policies affect the relationship between investment and crime by creating a simple structural model of crime and educational investment and attempting to fit this model to Mexican data A method of simulated moments procedure is used to estimate parameters of the model and the estimated parameters are then used to carry out policy simulations The simulations show that increasing spending on police or increasing the severity of punishment reduces crime but has little effect on educational investment Increased educational subsidies increase educational investment but reduce crime only slightly Thus one type of policy is insufficient to accomplish the goals of both reducing crime and increasing education The third chapter is joint work with Prashant Bharadwaj Giacomo De Giorgi and Christopher Neilson Boys tend to have better performances than girls in mathematical testing in particular there are significantly more boys than girls among high achievers and the score distribution appears to have a longer right tail for boys We confirm such results on several low and middle income countries In particular we find that the gender gap is already present by age 10 and substantially increases by age 14 and 15 We propose and try to test a series of explanations for such a gap i parental investment ii ability iii school resources iv individual

investment and effort not tested directly v competitive environment and vi cultural norms We conclude that none of our proposed explanations can account for a substantial portion of the gap **Africa's Development in Historical Perspective** Emmanuel Akyeampong, Robert H. Bates, Nathan Nunn, James Robinson, 2014-08-11 This edited volume addresses the root causes of Africa's persistent poverty through an investigation of its longue dur e history It interrogates the African past through disease and demography institutions and governance African economies and the impact of the export slave trade colonialism Africa in the world economy and culture s influence on accumulation and investment Several of the chapters take a comparative perspective placing Africa s developments aside other global patterns The readership for this book spans from the informed lay reader with an interest in Africa academics and undergraduate and graduate students policy makers and those in the development world **Institutional Challenges at the Early Stages of Development** François

Bourguignon, Jean-Philippe Platteau, 2023-11-09 Despite strong interest in the role of institutions methods of operation underlying political forces and their precise nature are still misunderstood Partial analysis of specific aspects of public interventions simplified historical examples or rough cross country relationships tend to be the main guides to policy recommendations Along with four in depth country studies published in companion volumes Institutional Challenges at the Early Stages of Development gives a thorough review of the experiences of South Korea and Taiwan offering a new perspective for identifying critical institutional issues Including those related to state business relations and the economic structure and its transformation analytical tools and concept are provided to help diagnose important hurdles at the early stage of a country s development This title is also available as Open Access **Journal of Economic Literature**, 2006

The Development Dimension Trade, Agriculture and Development Policies Working Together OECD, 2006-04-18 These conference proceedings explore why policy coherence is important how it affects global agricultural trade and whether it can help reduce poverty and hunger **Vulnerable People, Vulnerable States** Daniel Bromley, Glen Anderson, 2012-09-10 Over 5 decades of economic and technical assistance to the countries of Africa and the Middle East have failed to improve the life prospects for over 1.4 billion people who remain vulnerable Billions of dollars have been spent on such assistance and yet little progress has been made Persistent hunger and hopelessness threaten more than individuals and families These conditions foster political alienation that can easily metastasize into hostility and aggression Recent uprisings in the Middle East are emblematic of this problem Vulnerable people give rise to vulnerable states This book challenges the dominant catechism of development assistance by arguing that the focus on economic growth and fighting poverty has failed to bring about the promised convergence Poor people and poor countries have clearly not closed the gap on the rich industrialized world Pursuing convergence has been a failure Here we argue that development assistance must be reconstituted to focus on creating economic coherence People are vulnerable because the economies in which they are embedded do not cohere The absence of economic coherence means that economic processes do not work as they must if

individual initiative is to result in improved livelihoods Weak and vulnerable states must be strengthened so that they can become partners in the process of creating economic coherence When economies do not cohere countries become breeding grounds for localized civil conflicts that often spill across national borders Land Reform in Developing Countries Michael Lipton, 2009-06-24 Redistributing land rights is a tricky subject and one that easily becomes controversial as recent experience has shown This new book calmly examines the strengths and weaknesses of different forms of land redistribution

Religion and Innovation Donald A. Yerxa, 2015-12-17 It is often assumed that religion is the backward looking servant of tradition and the status quo utterly opposed to the new This refrain in so much of recent polemical writing has permeated the public mind and can even be found in academic publications But recent scholarship increasingly shows that this view is a gross simplification that in fact religious beliefs and practices have contributed to significant changes in human affairs political and legal social and artistic scientific and commercial This is certainly not to say that religion is always innovative But the relationship between religion and innovation is much more complex and instructive than is generally assumed Religion and Innovation includes contributions from leading historians archaeologists and social scientists who offer findings about the relationship between religion and innovation The essays collected in this volume range from discussions of the transformative power of religion in early societies to re examinations of our notions of naturalism secularization and progress to explorations of cutting edge contemporary issues Combining scholarly rigor with clear accessible writing Religion and Innovation Antagonists or Partners is essential reading for anyone interested in the history of religion and the ongoing debates about its role in the modern world and into the future **Networks of Knowledge Production in Sudan** Sondra Hale, Gada Kadoda, 2016-09-14 This is the first book of its kind on Sudan and arguably one of the first in North Africa We are part of an emerging more cosmopolitan approach that calls for a reassessment of ideas about not only the concept of identities but also about migration and technology especially social media Our essayists engage in redefinitions the broadening of our key variables the linking and intersecting of concepts and the investigations of methods and ethics and opt for an approach that is at once culturally specific to Sudan one of the most fluid social landscapes in the world and transnational Our essays address the narrowness of studies of migration and note the almost total neglect in the broader Sudan literature of the rise of technology mobile telephony and social media in particular Furthermore our essayists address the near neglect in the Sudan literature of certain categories of people such as youth or certain diverse spaces such as neighborhoods or gold mines We have also been attempting to move away from the nearly stereotypic descriptions of Sudan to deal with topics that align Sudan with transnational issues and themes knowledge production among them This multidisciplinary collection of essays is the first comprehensive work to grapple explicitly with the question of knowledge production in such a diverse social landscape We discuss the impact of current trends in information technology and contemporary forms of identity and mobility on knowledge production These issues are pertinent for different sectors such as

academia government or business and as we demonstrate reveal a myriad of possibilities for studying diverse population groups like youth women diaspora or specific political contexts such as conflict or oppression

Development Economics Julie Schaffner, 2013-10-07 Development Economics Theory Empirical Research and Policy Analysis by Julie Schaffner teaches students to think about development in a way that is disciplined by economic theory informed by cutting edge empirical research and connected in a practical way to contemporary development efforts It lays out a framework for the study of developing economies that is built on microeconomic foundations and that highlights the importance in development studies of transaction and transportation costs risk information problems institutional rules and norms and insights from behavioral economics It then presents a systematic approach to policy analysis and applies the approach to policies from around the world in the areas of targeted transfers workfare agricultural markets infrastructure education agricultural technology microfinance and health

Uniting on Food Assistance Christopher Barrett, Julia Steets, 2011-12-20 This book chronicles the most essential causes and implications of these trends which have expanded international food assistance well beyond the simple shipment of donated food aid commodities We pay particular attention to how these trends shape and are shaped by European Union EU and United States U S food assistance policy and practice and highlight the principles to which donors can adhere to move international food assistance forward
