**International Social Survey Programme 1984-2009** Max Haller,Roger Jowell,Tom W Smith,2009-09-11 The social sciences rely more on the comparative method than on experimental data mainly because the latter is difficult to acquire amongst human populations The International Social Survey Programme has played a pioneering role in creating and sustaining methodologically sophisticated mass attitude surveys across the globe Starting in 1984 with five nations it now encompasses forty five nations spread over five continents each administering an identical annual survey to a random sample of their population Analyses of the data or descriptions of the methodology already appear in over 3 000 publications This book contains new contributions from three dozen eminent scholars who analyse and compare the perceptions and attitudes of citizens across all five continents nations and over time Subjects range from inequality and the role of the state ethnic national and global identities the changing relevance of religion beliefs and practices gender roles family values and work orientations household and society Some chapters focus on methodological issues others focus on substantive findings This book sets new standards for cross cultural research Political Protest in Contemporary Africa Lisa Mueller,2018-06-28

From spray painted slogans in Senegal to student uprisings in South Africa twenty first century Africa has seen an explosion of protests and social movements But why Protests flourish amidst an emerging middle class whose members desire political influence and possess the money education and political autonomy to effectively launch movements for democratic renewal In contrast with pro democracy protest leaders rank and file protesters live at a subsistence level and are motivated by material concerns over any grievance against a ruling regime Through extensive field research Lisa Mueller shows that middle class political grievances help explain the timing of protests while lower class material grievances explain the participation By adapting a class based analysis to African cases where class is often assumed to be irrelevant Lisa Mueller provides a rigorous yet accessible explanation for why sub Saharan Africa erupted in unrest at a time of apparent economic prosperity The Shape of Social Inequality David Bills,2005-08-24 This volume brings together former students colleagues

and others influenced by the sociological scholarship of Archibald O Haller to celebrate Haller's many contributions to theory and research on social stratification and mobility. All of the chapters respond to Haller's programmatic agenda for stratification research. A full program aimed at understanding stratification requires first that we know what stratification structures consist of and how they may vary; second that we identify the individual and collective consequences of the different states and rates of change of such structures; and third, seeing that some degree of stratification seems to be present everywhere that we identify the factors that make stratification structures change. The contributors to this Festschrift address such topics as the changing nature of stratification regimes, the enduring significance of class analysis, the stratifying dimensions of race, ethnicity, and gender, and the interplay between educational systems and labor market outcomes. Many of the chapters adopt an explicitly cross-societal comparative perspective on processes and consequences of social stratification. The volume offers both conceptually and empirically important new analyses of the shape of social stratification.

New Critical Writings in Political Sociology Alan Scott, 2024-11-01. The articles collected together in this volume are concerned with why and how people get involved in politics, whether through formal mechanisms such as voting through some of the more informal means and settings of social movement networks and political protest, or through engagement in public debate. But just as important is the question of why people do not get involved in politics. What social conditions, ideas, and values facilitate or discourage political activity? How is it that some people are systematically disempowered in democratic societies in comparison with others? What social forms offer the most promise for extending and deepening democracy? This volume brings together the most seminal papers which together form a record of how political sociologists since the 1970s have framed questions about the range and limits of democratic political engagement and developed concepts and methodologies in order to research the answers to those questions.

**The Moral Economy of Class** Stefan Svallfors, 2006. A comparative study of political attitudes across social classes, examining what accounts for such differences in opinion and determining whether these differences change over time.

**The Democratic Class Struggle in Twenty Countries, 1945-1990** Paul Nieuwbeerta, 1995 It is well known that people s class position affects their voting behaviour This democratic class struggle occurs in all Western industrialized democracies However the strength of the relationship between class and voting behaviour differs from country to country and in many the strength of that relationship has declined This study analyses the levels of class voting in the various Western industrialised countries in the postwar period In addition it tests three specific explanations for variations in these levels between countries and periods of time Moreover attention is paid to the relationship between intergenerational class mobility and individual voting behaviour in these countries For this purpose a large number of data on twenty western industrialised nations were collected and analysed
