Adam Jamrozik, Luisa Nocella, 1998-07-13 Social problems such as unemployment poverty and drug addiction are a fact of life in industrialised societies This book examines the sociology of social problems from interesting and challenging perspectives It analyses how social problems emerge and are defined as such who takes responsibility for them who is threatened by them and how they are managed solved or ignored The authors examine and critique existing theories of social problems before developing their own theoretical framework Their theory of residualist conversion of social problems explains how certain social problems threaten legitimate power structures so that problems of a social or political nature are transformed into personal problems and the helping professions are left to intervene This book will become a key reference on class inequality and social intervention and an important text for students in sociology and social work courses *Christianity and Social Scientific Perspectives on Sport* Tom Gibbons, Stuart Braye, 2020-06-29 There has been a dramatic increase in academic research activity and practical initiatives on the topic of sports and Christianity and its cultural significance during the past decade The Faculty of Health and Life Sciences at York St John University York UK hosted the Inaugural Global Congress on Sports and Christianity IGCSC 24 28th August 2016 in collaboration with the Bible Society at which there were 180 delegates from 22 countries in attendance For the area of sports studies the social scientific study of sport there was a thematic strand at the congress titled Christian sociological perspectives on sport from which a special edition of the journal Sport in Society partially emanated This book is based upon this journal special edition The papers selected for inclusion in the special edition were purposely eclectic in order to demonstrate the diversity of current research occurring in the area of Christianity and social scientific perspectives on sport The goal was to bridge divisions between various social science disciplines and theology or religious studies through varied novel and interesting explorations of sport in its various forms We hope this collection inspires further studies into this area The chapters in this book were originally published in a special issue in Sport in Society *The Social Thought of Thomas Merton* David W.
