Social Processes In Childrens Learning:

Social Processes in Children's Learning Paul Light, Karen Littleton, 1999 This book first published in 2000 is about children's learning and problem solving behaviour. It reflects the increasingly close integration seen in recent years between social and cognitive approaches to researching the learning process. In particular Paul Light and Karen Littleton examine the ways in which interactions between children influence learning outcomes. They begin by placing this topic in a broad theoretical and empirical context and go on to present a substantial series of their own experimental studies which focus on children of late primary and early secondary school age. These investigations address peer facilitation of problem solving, social comparison effects on learning and social context effects upon the interpretation of tasks. Many of the studies involve computer based learning but the findings have implications both for classroom practice and the understanding of the learning process. This book will be a valuable tool for researchers, teachers and practitioners interested in the social processes of children's learning.

Social Processes in Children's Learning P. H. Light, Economic and Social Research Council (ESRC), Swindon (GB), Economic and Social Research Council (Great Britain), 1997 *The Development of Children* Cynthia Lightfoot, Michael Cole, Sheila R. Cole, 2008-12-08 Rev ed of Development of children Michael Cole Sheila R Cole Cynthia Lightfoot c2005 5th ed Handbook of Child Psychology and Developmental Science, Cognitive Processes, 2015-04-06 The essential reference for human development theory updated and reconceptualized. The Handbook of Child Psychology and Developmental Science a four volume reference is the field defining work to which all others are compared. First published in 1946 and now in its Seventh Edition the Handbook has long been considered the definitive guide to the field of developmental science. Volume 2 Cognitive Processes describes cognitive development as a relational phenomenon that can be studied only as part of a larger whole of the person and context relational system that sustains it. In this volume specific domains of cognitive development are contextualized with respect to biological processes and sociocultural contexts. Furthermore key themes and issues e.g. the importance of symbolic systems and social understanding are threaded across multiple chapters although every chapter is focused on a different domain within cognitive development. Thus both within and across chapters the complexity and interconnectivity of cognitive development are well illuminated. Learn about the inextricable intertwining of perceptual development, motor development, emotional development and brain development. Understand the complexity of cognitive development without misleading simplification, reducing cognitive development to its biological substrates or viewing it as a passive socialization process. Discover how each portion of the developmental process contributes to subsequent cognitive development. Examine the multiple processes such as categorizing, reasoning, thinking, decision making and judgment that comprise cognition. The scholarship within this volume and as well across the four volumes of this edition illustrate that developmental science is in the midst of a very exciting period. There is a paradigm shift that involves increasingly greater understanding of how to describe, explain and optimize the course of human life for diverse
