Martin,2009-07-27 Social Structures is a book that examines how structural forms spontaneously arise from social relationships Offering major insights into the building blocks of social life it identifies which locally emergent structures have the capacity to grow into larger ones and shows how structural tendencies associated with smaller structures shape and constrain patterns of larger structures The book then investigates the role such structures have played in the emergence of the modern nation state Bringing together the latest findings in sociology anthropology political science and history John Levi Martin traces how sets of interpersonal relationships become ordered in different ways to form structures He looks at a range of social structures from smaller ones like families and street gangs to larger ones such as communes and ultimately nation states He finds that the relationships best suited to forming larger structures are those that thrive in conditions of inequality that are incomplete and as sparse as possible and thereby avoid the problem of completion in which interacting members are required to establish too many relationships and that abhor transitivity rather than assuming it Social Structures argues that these patronage relationships which often serve as means of loose coordination in the absence of strong states are nevertheless the scaffolding of the social structures most distinctive to the modern state namely the command army and the political party      Individual and Society Lizabeth A. Crawford,Katherine B. Novak,2018-03-09

First Published in 1988 this volume works towards a new understanding and exploration of the rise and development of modern society taking its lead from two classical theorists Emile Durkheim and Max Weber The key concept of this approach is the interpenetration of different spheres of action Richard Münch begins with an exploration of the points of convergence and divergence in the works of Durkheim and Weber He then builds from Durkheim a new theory of social order as a complex set of ordering dynamizing identity producing and goal setting factors Münch also constructs a new theory of personality development based on Durkheim's view of the duality of human nature He concludes by assessing Weber's contribution to our understanding of how modern social order emerged showing that the unique features of modern society emerged from the interpenetration of cultural political communal and economic spheres in action
