Competence in Young Children Susanne A. Denham,2023-02-28 This engaging authoritative text synthesizes a vast body of research on how young children develop the ability to understand express and manage their emotions as well as the impact of these capacities on relationships school readiness and overall well being Illustrated with vivid vignettes the book explains specific ways that parents teachers and education systems can foster or hinder emotional competence and reviews relevant assessments and interventions Compelling topics include emotion regulation as both product and process cultural variations in emotion socialization the expression of empathy and self conscious emotions risk factors for delays in emotional development and connections between emotional competence and social emotional learning SEL Almost entirely new this book replaces Susanne A Denham s influential earlier work Emotional Development in Young Children **Emotion Regulation in Neurodevelopmental Disorders: Current Understanding and Treatments** Ru Ying Cai,Andrea C.

Samson ,Mirko Uljarevic,2024-08-12 Emotion regulation allows people to influence and modify the intensity duration and types of emotions experienced and how these emotions are expressed The capacity to regulate emotions increases and becomes more sophisticated throughout child development due to the maturation of prefrontal brain regions involved in executive functioning Emotion regulation is a transdiagnostic process that plays a pivotal role in the development and maintenance of internalizing and externalizing symptoms such as anxiety depression or problematic behaviors Emotion dysregulation is a prominent feature of neurodevelopmental conditions such as autism spectrum disorder ASD and attention deficit hyperactivity disorder ADHD Furthermore emotion dysregulation has been suggested to play a vital role in less commonly diagnosed neurogenetic disorders such as Phelan McDermid Syndrome germline heterozygous PTEN mutations and 22q11.2 deletion syndrome Fortunately emotion regulation processes are amenable to treatment in various clinical and non clinical populations

New Research on Early Childhood Education Arthur T. Waddell,Rachel M. McBride,2008 Early Childhood Education spans the human life from birth to age 8 Infants and toddlers experience life more holistically than any other age group Social emotional cognitive language and physical lessons are not learned separately by very young children Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience not just that part of the experience to which the adult gives attention Although early childhood education does not have to occur in the absence of the parent or primary caregiver this term is sometimes used to denote education by someone other than these the parent or primary caregiver Both research in the field and early childhood educators view the parents as an integral part of the early childhood education process Early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent Other terms those are often used interchangeably with early childhood education are early childhood learning early care and early education Much of the first two years of life are spent in the creation of a child's first sense of self or the building of a first identity Because this is a crucial part of children's makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy If care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience This book presents the latest research in this vital field
