M. de Groot,2012-04-30 Explores the environment s effects on human wellbeing and behaviour factors influencing environmental behaviour and ways of encouraging pro environmental action **Multimedia Explorations in Urban Policy and Planning** Leonie Sandercock,Giovanni Attili,2010-04-10 The book is a collection of essays exploring the potential of multimedia to enrich and transform the planning field By multimedia the authors refer to a broad range of new information

and communication technologies from film and video to digital ethnography and the internet which are opening up new possibilities in planning practices processes pedagogy and research The authors document the ways in which these ICTs can expand the language of planning and the creativity of planners can evoke the lived experience the spirit memories desires of our 21st century mongrel cities by engaging with stories and storytelling and can democratise planning practices The text is epistemologically radical in presenting an argument for the importance of multiple languages ways of knowing in the planning field and making the connection between this epistemology and the almost infinite potential of Multimedia to provide varied tools to accomplish this transformation displacing the supremacy of the rational linear and hierarchical with more open playful and imaginative approaches Each of the authors brings practical experience with different forms of Multimedia use and reflects on the different potentialities offered by Multimedia for critical intervention in urban and regional issues and the power dynamics embedded in such interventions The U.S. Supreme Court's Democratic Spaces

Jocelyn J. Evans, Keith Gaddie, 2021-10-28 Atop broad stone stairs flanked by statues of ancient lawgivers the U S Supreme Court building stands as a shining temple to the American idea of justice As solidly as the building occupies a physical space in the nation s capital its architecture defines a cultural social and political space in the public imagination Through these spaces this book explores the home of the most revered institution of U S politics its origin history and meaning as an expression of democratic principles The U S Supreme Court building opened its doors in 1935 Although it is a latecomer to the capital the Court shares the neoclassical style of the older executive mansion and capitol building and thus provides a coherent architectural representation of governmental power in the capital city More than the story of the construction of one building or its technical architectural elements The U S Supreme Court s Democratic Spaces is the story of the Court s evolution and its succession of earlier homes in Washington D C Philadelphia and New York This timely study of how the Supreme Court building shapes Washington as a space and a place for political action and meaning yields a multidimensional view and deeper appreciation of the ways that our physical surroundings manifest who we are as a people and what we value as a society

Making Places for People Christie Johnson Coffin, Jenny Young, 2024-03-12 Making Places for People explores 12 social questions crucial to environmental design Authors Christie Johnson Coffin and Jenny Young bring perspectives from practice and teaching to challenge assumptions about how places meet human needs In this expanded second edition the authors continue to explore the complexities of basic questions such as What is the story of this place What logic orders it How big is it How sustainable is it They consider the impact on making places of pandemic climate change human migration and contemporary discussions of diversity equity and justice Short approachable easy to read chapters illustrated with updated examples of projects from around the world bring together theory methodology and key research findings Understanding experienced and research based connections between people and built form can inspire designs that make places of meaning and delight This second edition will be essential reading for design students and professionals

Retrofitting the City Stefan Bouzarovski, 2015-11-25 Cities are responsible for three quarters of the world s energy consumption If we are to reduce our demands on the planet s resources how can we make our urban areas more energy efficient One way is to refit existing buildings with more thermally efficient building materials But such retrofitting involves significant issues of social acceptance and public participation Retrofitting the City provides an important corrective to the assumptions that have been made concerning the ability of people and places to cope with such residential transformation Drawing upon case studies from a number of European cities that have undergone far reaching change in their built environments the author shows that supposedly inadaptable people and places show a strong if often hidden degree of flexibility in responding to economic change and building transformation

Place Advantage Sally Augustin, Neil Frankel, Cindy Coleman, 2015-09-23 Using psychology to develop spaces that enrich human experience Place design matters Everyone perceives the world around them in a slightly different way but there are fundamental laws that describe how people experience their physical environments Place science principles can be applied in homes schools stores restaurants workplaces healthcare facilities and the other spaces people inhabit This guide to person centered place design shows architects landscape architects interior designers and other interested individuals how to develop spaces that enrich human experience using concepts derived from rigorous qualitative and quantitative research In Place Advantage Applied Psychology for Interior Architecture applied environmental psychologist Sally Augustin offers design practitioners accessible environmental psychological insights into how elements of

the physical environment influence human attitudes and behaviors She introduces the general principles of place science and shows how factors such as colors scents textures and the spatial composition of a room as well as personality and cultural identity impact the experience of a place These principles are applied to multiple building types including residences workplaces healthcare facilities schools and retail spaces Building a bridge between research and design practice Place Advantage gives people designing and using spaces the evidence based information and psychological insight to create environments that encourage people to work effectively learn better get healthy and enjoy life Inclusive University Built Environments Itab Shuayb,2020-01-02 This book investigates the impact of Approved Document M introduced to address accessibility and usability issues for people with disabilities in newly constructed facilities on different university buildings in the United Kingdom A selection of six buildings at the University of Kent the University of Bath and the University of Essex built within the six decades spanning the 1960s through the 2010s are studied to investigate the impact of the measure on changing building designs to be accessible for all potential users including people with disabilities The book dissects specifically the University of Kent case study delineating benefits of the inclusive design approach Providing case studies of existing educational buildings and recommendations case studies of existing educational buildings and provides recommendations the book is ideal for engineers architects built environment researcher designers and standard committees

The Informal City Michel S. Laguerre,2016-07-27 In this book Michel S Laguerre argues that there exists an informal city located just beneath and in the interstices of the formal city The metaphor is not geographical but rather structural and hermeneutical This is the city where manoeuvres that cannot be done publicly legally ethically or otherwise are performed The author shows with illustrative data drawn from the American urban experience the San Francisco Oakland Metropolitan area why and how the informal city must be seen as the hidden dimension of the formal city **Spaces Speak, Are You Listening?** Barry Blesser,Linda-Ruth Salter,2009-09-18 How we experience space by listening the concepts of aural architecture with examples ranging from Gothic cathedrals to surround sound home theater We experience spaces not only by seeing but also by listening We can navigate a room in the dark and hear the emptiness of a house without furniture Our experience of music in a concert hall depends on whether we sit in the front row or under the balcony The unique acoustics of religious spaces acquire symbolic meaning Social relationships are strongly influenced by the way that space changes sound In Spaces Speak Are You Listening Barry Blesser and Linda Ruth Salter examine auditory spatial awareness experiencing space by attentive listening Every environment has an aural architecture The audible attributes of physical space have always contributed to the fabric of human culture as demonstrated by prehistoric multimedia cave paintings classical Greek open air theaters Gothic cathedrals acoustic geography of French villages modern music reproduction and virtual spaces in home theaters Auditory spatial awareness is a prism that reveals a culture s attitudes toward hearing and space Some listeners can learn to see objects with their ears but even without training we can all hear spatial geometry such

as an open door or low ceiling Integrating contributions from a wide range of disciplines including architecture music acoustics evolution anthropology cognitive psychology audio engineering and many others *Spaces Speak Are You Listening* establishes the concepts and language of aural architecture These concepts provide an interdisciplinary guide for anyone interested in gaining a better understanding of how space enhances our well being Aural architecture is not the exclusive domain of specialists Accidentally or intentionally we all function as aural architects

Encyclopaedia of Occupational Health and Safety: Hazards Jeanne Mager Stellman,1998

Design Studies Audrey Bennett,2006-08-31 In an age of globalization and connectivity the idea of mainstream culture has become quaint Websites magazines books and television have all honed in on ever diversifying subcultures hoping to carve out niche audiences that grow savvier and more narrowly sliced by the day Consequently the discipline of graphic design has undergone a sea change Where visual communication was once informed by a designer's creative intuition the proliferation of specialized audiences now calls for more research based design processes Designers who ignore research run the risk of becoming mere tools for communication rather than bold voices *Design Studies* a collection of 27 essays from an international cast of top design researchers sets out to mend this schism between research and practice The texts presented here make a strong argument for performing rigorous experimentation and analysis Each author outlines methods in which research has aided their design whether by investigating how senior citizens react to design aesthetics how hip hop culture can influence design or how design for Third World nations is affected by cultural differences Contributors also outline inspired ways in which design educators can teach research methods to their students Finally *Design Studies* is rounded out by five annotated bibliographies to further aid designers in their research This comprehensive reader is the definitive reference for this new direction in graphic design and an essential resource for both students and practitioners

Design Intervention (Routledge Revivals) Wolfgang F. E. Preiser, Jacqueline Vischer, Edward White,2015-05-15 *Design Intervention Toward a More Humane Architecture* first published in 1991 intends to demonstrate that interest in social issues is alive and well in architecture that there is a small but effective cadre of dedicated professionals who continue to commit themselves to solving social problems and that architecture is being applied to the alleviation of the social ills of our time The editors and contributors in this book have all grappled with their own definitions of design innovation and express in practical and useful ways their ideas for contributing to a better and less needy world through the architecture they describe This book will be of interest to students of architecture

Design by Competition Jack L. Nasar,1999-02-28 What meanings do buildings and places convey to the people who use and visit them Too often design competitions and signature architecture result in costly eyesores that do not work How can sponsors and clients get more meaningful results In answer to these questions Dr Nasar supported by riveting studies of competitions and Peter Eisenman's competition winning design for the Wexner Center at the Ohio State University suggests the use of pre jury evaluation PJE He shows the potential value of this approach as well as visual quality programming for many kinds of

environmental design for which the client wants to convey certain desirable meanings The studies from those specific to the Wexner Center to those covering the scope of history point to an alternative method for shaping the visual form of buildings places and cities
