Grossman, 2017-02-08 Sociology of Sexualities by Kathleen J Fitzgerald and Kandice L Grossman is the first comprehensive text to approach the study of sexuality from a sociological perspective Drawing on the most up to date social scientific research on sexuality it discusses fundamental concepts in the field and helps students integrate knowledge about sexuality into their larger understanding of society Topics covered include the emergence of sexual identities inequalities and discrimination faced by sexual and gender minorities heterosexual and cisgender privilege activism and mobilization to challenge such discrimination the commodification of sexuality and the ways sexuality operates in and through various institutions Throughout the text the authors show how sexuality intersects with other statuses and identities

Gender, Conflict and International Humanitarian Law Orly Maya Stern, 2018-07-27 This book conducts a gendered critique of the principle of distinction in international humanitarian law IHL with a focus on recent conflicts in Africa The principle of distinction is core to IHL and regulates who can and cannot be targeted in armed conflict It states that civilians may not be targeted in attack while combatants and those civilians directly participating in hostilities can be The law defines what it

means to be a combatant and a civilian and sets out what behaviour constitutes direct participation. Close examination of the origins of the principle reveals that IHL was based on a gendered view of conflict which envisages men as fighters and women as victims of war. Problematically this view often does not accord with the reality in new wars today in which women are playing increasingly active roles often forming the backbone of fighting groups and performing functions on which armed groups are highly reliant. Using women's participation in new wars in Africa as a study, this volume critically examines the principle through a gendered lens, questioning the extent to which the principle serves to protect women in modern conflicts and how it fails them. By doing so it questions whether the principle of distinction is suitable to effectively regulate the conduct of hostilities in new wars. This book will be of much interest to students of international law, gender studies, African politics, war and conflict studies and international relations.

Biology and Criminology Anthony Walsh, 2010-03-17. Noted criminologist Anthony Walsh demonstrates how information from the biological sciences both strengthens criminology work and complements traditional theories of criminal behavior. With its reasoned case for biological science as a fundamental tool of the criminologist, this text is required reading for students and faculty within the field of criminology.

Race, Work, and Family in the Lives of African Americans Marlese Durr, Shirley A. Hill, 2006-05-25. Family and work are major integrally related dimensions of social life which affect the well being and success of family members. As social institutions, family and work are also avenues where social inequality may be understood as a major element in the distribution of social, cultural and economic resources and sites where inequality is perpetuated, negotiated and contested. In this book, editors Durr and Hill focus on African Americans navigating the terrain of race, work and family and examining persistent barriers to equality and ways in which Blacks have sought to become an integral part of the American economy.

The Limits of Idealism Melvyn L. Fein, 2007-08-28. If the truth be known, I am only a partially reformed idealist. In the secret depths of my soul, I still wish to make the world a better place and sometimes fantasize about heroically eradicating its faults. When I encounter its limitations, it is consequently with deep regret and continued surprise. How I ask myself, is it possible that that which seems so fight can be a chimera? And why I wonder, aren't people as courageous, smart or nice as I would like? The pain of realizing these things is sometimes so intense that I want to close my eyes and lose myself in the kinds of daydreams that comforted me as a youngster. One thing is clear: my need to come to grips with my idealism had its origin in a lifetime of naiveté. From the beginning, I wanted to be a good person. Often when life was most treacherous, I retreated into a corner from whence I escaped into reveries of moral glory. When I was very young, my faith was in religion. In Hebrew school, I took my lessons seriously and tried to apply them at home. By my teen years, this had been replaced by an allegiance to socialism. In the Brooklyn where I grew up, my teachers and relatives made this seem the natural course. When I reached my twenties, however, and was obliged to confront a series of personal deficiencies, psychotherapy shouldered its way to the fore.

Biosocial Theories of Crime Kevin M. Beaver, 2017-07-05. Biosocial criminology is an emerging perspective that highlights the

interdependence between genetic and environmental factors in the etiology of antisocial behaviors. However, given that biosocial criminology has only recently gained traction among criminologists, there has not been any attempt to compile some of the classic articles on this topic. Beaver and Walsh's edited volume addresses this gap in the literature by identifying some of the most influential biosocial criminological articles and including them in a single resource. The articles covered in this volume examine the connection between genetics and crime, evolutionary psychology and crime, and neuroscience and crime. This volume will be a valuable resource for anyone interested in understanding the causes of crime from a biosocial criminological perspective.
