and private organizations and local Bad at Math? Lidia Gonzalez, 2023-02-03 Math really is for everyone so let's prove it. You've heard it from kids, from friends, and from celebrities: I'm bad at math. It's a line that society tends to accept without examination; after all, some people just aren't math people, right? Wrong. As we do with other essential skills, we need to expose the stereotypes, challenge the negative mindsets, and finally confront the systemic opportunity gaps in math education and replace them with a new vision for what math is, who it's for, and who can excel at it. In this book, you'll find research on teacher and student mindsets and their effect on student achievement; audience-specific and differentiated tools, reflection questions, and suggested actions for educators at all levels of the system; examples from popular media as well as personal stories and anecdotes; quotes, data-driven figures, and suggestions for deeper learning on all aspects of a positive and equitable vision of math education. Both social commentary and a toolkit of solutions, this bold new book directly challenges the constructs that have historically dictated our perceptions of what makes someone a math person. Only by dismantling those misplaced assumptions can we reform math education so it works for everyone. Because in truth, we are all math people.

Thinking Allowed Mick Waters, 2013-04-15 Mick Waters has consistently been a down-to-earth voice in the increasingly complex world of education for many years. He has regularly endeared himself to school communities in the UK and overseas by talking the sort of sense they needed to hear: practical, challenging, inspiring, insightful, engaging. His unique perspective, closeness to the classroom, and ability to see innovation in terms of its impact on learners mean his views are always worth listening to. In this long-awaited book, Mick tells it how it is. The things he believes in. The things he wants to see differently. Wry reflections, humorous insights, astute asides, and simple ideas to change the system and the future for young people everywhere. This is the book you have been waiting for.

Risk/benefit Analysis in the Legislative Process, 1980 **Reports and Documents** United States Congress, Report United States Congress, House, *Senses of the Future* Gerard Delanty, 2024-03-04 The future has become a problem for the present. Almost every critical issue is now understood and experienced through the prism of the future, since this is the primary focus for the playing out of crises. *Senses of the Future* offers a wide-ranging discussion of theories of the future. It covers the main ideas of the future in modern thought and explores how we should view the future today in light of a plurality of very different and conflicting visions. The key contribution of this book is to bring together the different approaches with an account that is grounded in sociological and philosophical analysis, as opposed to visions of the future that are inspired by extreme visions of catastrophe or approaches that see the future as only the continuation of the present. Given a revival of apocalyptic visions of the end times and dystopian views of the future of human societies, there is urgent need for a new approach on how we should imagine the future. The author explores the future as a field of tensions that is revealed in narratives, utopian desires, hope, imaginaries, and social struggles concerning the potential possibilities of the present. The future does not just arrive; it has to be fought for. This book is an important contribution to a critical sociology of the future. It is both a work of reconstruction and critique.

grounded in a historical and philosophical hermeneutics of the future
