

## SOCIAL SERVICE WORKER

Social work is an academic discipline and practice-based profession concerned with meeting the basic needs of individuals, families, groups, communities, and society as a whole. Social workers help their individual and collective well-being. Social work practice draws from areas such as psychology, sociology, health, political science, community development, law, and economics. Social workers engage with systems and policies, conduct assessments, develop interventions, and enhance social functioning and responsiveness. Social work practice is often divided into three levels. Micro-work involves working directly with individuals and families, such as providing individual counseling, therapy, or assisting a family in accessing services. Mezzo work involves working with groups and communities, such as conducting group therapy or providing support to a community agency. Macro work involves facilitating change on a larger scale, such as advocacy, social policy, research, development, non-profit and public service administration, or working with government agencies. Starting in the 1980s, a few universities began social work management programmes, or programmes for the management of social work service organizations, in a social work education.

The social work profession developed in the 19th century, with some of its roots in philanthropy and in grassroots organizing.[6] However, responses to social needs had existed long before then, primarily from public almshouses, private charities, religious organizations, and of the Great Depression of the 1930s, increased pressure on social work to become a more defined discipline as social workers responded to the child welfare concerns related to widespread poverty and absence of child labour in industrial settings.

Social work is a broad profession that intersects with several disciplines. Social work organiza-

tions offer the following definitions: Social work is a practice-based profession and an academic discipline that promotes social change and development, social cohesion, and the empowerment and liberation of people. Principles of social justice, human rights, collective responsibility, and respect for diversities are central to social work. Underpinned by theories of social work, social sciences, humanities, and indigenous knowledge, social work engages people and communities to address life challenges and en-

hance their well-being. The profession is concerned with helping individuals, families, groups, and communities to enhance their individual and collective well-being and help people develop their skills and resources to solve their problems. Social workers engage with individual and communities to address social issues such as poverty, unemployment, and domestic violence.

Social work practice consists of the professional application of social principles, and techniques to achieve the following ends: helping people access social services, counselling and supporting individuals, families, and communities, and groups provide social and health services, and participating in legislative processes. The practice of social work requires knowledge of human development and behavior, social and economic, and cultural contexts, and the interaction of all these factors.

Social workers help individuals and families to meet their needs in their lives. This may be to protect vulnerable people from harm, such as supporting people to live independently. Social workers support people, act as advocates and direct people to the services they may require. Social workers often work in multi-disciplinary teams alongside
