Social Sustainability And Economic Development:

Social Sustainability in Development Patrick Barron, Louise Cord, José Cuesta, Sabina Espinoza, Greg Larson, Michael Woolcock, 2023-04-14 All development is about people the transformative process to equip link and enable groups of people to drive change and create something new to benefit society Development can promote societies where all people can thrive but the change process can be complex challenging and socially contentious Continued progress toward sustainable development is not guaranteed The current overlapping crises of COVID 19 climate change rising levels of conflict and a global economic slowdown are inflaming long standing challenges exacerbating inequality and deep rooted systemic inequities Addressing these challenges will require social sustainability in addition to economic and environmental sustainability Social Sustainability in Development Meeting the Challenges of the 21st Century seeks to advance the concept of social sustainability and sharpen its analytical foundations The book emphasizes social sustainability s four key components social cohesion inclusion resilience and process legitimacy It posits that Social sustainability increases when more people feel part of the development process and believe that they and their descendants will benefit from it Communities and societies that are more socially sustainable are more willing and able to work together to overcome challenges deliver public goods and allocate scarce resources in ways perceived to be legitimate and fair so that all people may thrive over time By identifying interventions that work to promote the components of social sustainability and highlighting the evidence of their links to key development outcomes this book provides a foundation for using social sustainability to help address the many challenges of our time Understanding the Social Dimension of Sustainability Jesse Dillard, Veronica Dujon, Mary C. King, 2008-07 Pt 1 Overviews of the field pt 2 International perspectives pt 3 The Role of business pt 4 Local applications pt 5 Integration and conclusion **Social Sustainability And Economic Development** G. C. Pande, 2003 In Indian context **Economic Development and Environmental Sustainability** Ramón López, Michael A. Toman, 2006 Publisher description Social Sustainability Veronica Dujon, Jesse Dillard, Eileen M. Brennan, 2013-08-21 How can we raise the standard of living of the world s poor and maintain high levels of social health and well being in the developed world while simultaneously reducing the environmental damage wrought by human activity The social dimension of sustainability is becoming recognized as a necessary if not sufficient condition for attaining economic and environmental sustainability The requisite dialogue requires inclusion at multi levels This collection of works is an ambitious and multi disciplinary effort to indemnify and articulate the design implementation and implications of inclusion Included are theoretical and empirical pieces that examine the related issues at the local national and international levels Contributors are grounded in Sociology Economics Business Administration Public Administration Public Health Psychology Anthropology Social Work Education and Natural Resource Management **A Survey of Sustainable Development** Jonathan Harris, Timothy Wise, Kevin Gallagher, Neva R. Goodwin, 2013-04-16 Perpetual economic growth is physically impossible on a

planet with finite resources Many concerned with humanity's future have focused on the concept of sustainable development as an alternative as they seek means of achieving current economic and social goals without compromising the ability of future generations to meet their own goals Sustainable development brings together elements of economics public policy sociology ecology resource management and other related areas and while the term has become quite popular it is rarely defined and even less often is it understood A Survey of Sustainable Development addresses that problem by bringing together in a single volume the most important works on sustainable human and economic development It offers a broad overview of the subject and gives the reader a quick and thorough guide to this highly diffuse topic The volume offers ten sections on topics including economic and social dimensions of sustainable development the North South balance population and the demographic transition agriculture and renewable resources energy and materials use globalization and corporate responsibility local and national strategies Each section is introduced with an essay by one of the volume editors that provides an overview of the subject and a summary of the mainstream literature followed by two to three page abstracts of the most important articles or book chapters on the topic A Survey of Sustainable Development is the sixth and final volume in the Frontier Issues of Economic Thought series produced by the Global Development And Environment Institute at Tufts University Each book brings together the most important articles and book chapters in a frontier area of economics where important new work is being done but has not yet been incorporated into the mainstream of economic study The book is an essential reference for students and scholars concerned with economics environmental studies public policy and administration international development and a broad range of related fields

Economic Development and the Environmental Ecosystem Hasan Dincer, Serhat Yüksel, 2023-04-17 This volume illustrates the relationship between environmental factors and economic development of countries from various angles Global warming has become a problem that threatens the whole world especially in recent years It is known that the main reason for this is carbon emissions On the other hand carbon emissions generally consist of fossil fuel based energy consumption This situation creates very serious environmental problems Because of this problem the concept of carbon zero has become very popular especially in recent years Many countries take some actions to minimize carbon emissions Especially in the coming years carbon emissions will become a competitive factor for countries and businesses In this respect countries with low carbon emissions will be preferred more in foreign trade In addition businesses that do not generate carbon emissions in the production process will also gain a significant competitive advantage in international trade The contributions take a multidimensional outlook to energy investments and offer solutions for decision making for energy projects in risky business ecosystems
