Sociobiology and Human Nature Michael S. Gregory, 1978-10-01 Sociobiology and Human Nature Michael S. Gregory, Anita Silvers, Diane Sutch, 1992 Sociobiology and Human Nature Anita Silvers, Diane Sutch, NEXA, the Science-Humanities Convergence Program, 1978 **Advanced Views in Primate Biology** A. B. Chiarelli, R. S. Corruccini, 2012-12-06 Noam Chomsky: On Power, Knowledge and Human Nature P. Wilkin, 1997-04-30 Noam Chomsky is among the most influential contemporary thinkers Peter Wilkin looks in particular at the philosophical basis of his social and political thought especially his ideal about power knowledge and human nature He shows how Chomsky s ideas can help to defend naturalism as in social and political thought Chomsky s critical writings of social inquiry and his normative ideas on libertarian socialism and human emancipation are interpreted as synthesising a number of important ideas and approaches at a time when these ideas have fallen out of favour *Kant and the Human Sciences* A. Cohen, 2009-10-22 This book provides the first sustained attempt to extract from Kant s writings on biology anthropology and history an account of the human sciences their underlying unity their presuppositions as well as their methodology that is to say Kant s philosophical and epistemological foundation of the human sciences **Canguilhem and Continental Philosophy of Biology** Giuseppe Bianco, Charles T. Wolfe, Gertrudis Van de Vijver, 2023-02-01 This edited volume presents papers on this alternative philosophy of biology that could be called continental philosophy of biology and the variety of positions and solutions that it has spawned In doing so it contributes to debates in the history and philosophy of science and the history of philosophy of science as well as to the craving for history and or theory in the theoretical biological disciplines In addition however it also provides inspiration for a broader image of philosophy of biology in which these traditional issues may have a place The volume devotes specific attention to the work of Georges Canguilhem which is central to this alternative tradition of continental philosophy of biology This is the first collection on Georges Canguilhem and the Continental tradition in philosophy of biology The book should be of interest to philosophers of biology continental philosophers historians of biology and those interested in broader traditions in philosophy of science **Reductionism and Cultural Being** J.W. Smith, 2012-12-06 *Bioaesthetics* Carsten Strathausen, 2017-10-15 In recent years bioaesthetics has used the latest discoveries in evolutionary studies and neuroscience to provide new ways of looking at art and aesthetics Carsten Strathausen s remarkable exploration of this emerging field is the first comprehensive account of its ideas as well as a timely critique of its limitations Strathausen familiarizes readers with the basics of bioaesthetics grounding them in its philosophical underpinnings while articulating its key components Importantly he delves into the longstanding problem of the two cultures that separate the arts and the sciences Seeking to make bioaesthetics a more robust way of thinking Strathausen then critiques it for failing to account for science s historical and cultural assumptions At its worst he says biologism reduces artworks to mere automatons that rubber stamp pre established scientific truths Written with a sensitive understanding of

science's strengths and willing to refute its best arguments Bioaesthetics helps readers separate the sensible from the specious At a time when humanities departments are shrinking and when STEM education is on the rise Bioaesthetics makes vital points about the limitations of science while lodging a robust defense of the importance of the humanities

Annals of Theoretical Psychology Joseph R. Royce, Leendert P. Mos, 2013-11-11 As such things happen several manuscripts in the present volume were under review prior to the ones that appeared in Volume I of the Annals A major difficulty encountered in the preparation of these volumes apart from working up to three years in advance of publication is eliciting appropriate commentary If this format is to succeed the commentary must be both engaging to the reader and satisfying to the author It is not yet clear how successful we have been in this regard and indeed we do not feel bound to publish commentary with each manuscript that is accepted for publication Nevertheless we do invite readers commentaries on published materials The contributions by Jan Smedslund and Benjamin Wolman in this volume have been through an inordinately long publication lag We have been in receipt of both manuscripts since early in 1981 and Dr Smedslund especially has since clarified and advanced his views else where in print K B Madsen and Joseph Rychlak submitted their manuscripts in the fall of 1981 while Michael Hyland and J Philippe Rushton had first drafts of their manuscripts accepted for publication in the fall of 1982 We are grateful to our contributors for their expressed commitment to the Annals and assure potential contributors that the delay in publication is a mere matter of getting the series off the ground
