Paperbound Books in Print ,1984 Handbook of the Sociology of Emotions Jan Stets,Jonathan H. Turner,2007-02-25

For almost thirty years sociologists have increasingly theorized about and conducted research on human emotions Surprisingly it was not until the 1970s that the sociology of emotions emerged as a coherent field of inquiry What makes this late date surprising is that it is now obvious that human behavior interaction and organization are driven by emotions It was an immense oversight for emotions to be de emphasized in sociological theorizing and research for most of its 175 year history Since the 1970s however the study of emotions has accelerated and is now at the forefront of sociological analysis This book is designed to bring the reader up to date on the theory and research traditions that have proliferated in the analysis of human emotions Key figures who have carried the sociology of emotions to its current level of prominence review their own work and the work of others who have made contributions to a particular approach to the study of emotions The outcome is a comprehensive book that serves as a primer on the cutting edge of sociological work in what is obviously a key dynamic in human affairs The first section of the book addresses the range of emotions and how they can be classified the neurological underpinnings of emotions and the effect of gender on emotions The second section reviews the prominent sociological theories of emotions including theories emphasizing power and status rituals identity and self psychoanalytic dynamics exchange expectation states and evolution While there is little integration among these theories this state of affairs will not last forever The third section addresses theory and research on specific emotions such as love jealousy and envy empathy sympathy anger grief and the moral emotions While this list does not exhaust the range of human feeling they are central emotions that drive human behavior interaction and social organization The last section explores howthe study of emotions has added new insight into other subfields within sociology such as the study of the workplace health and social movements These chapters illustrate how the sociology of emotions can provide new research and theory for the large numbers of specialties within sociology Although no book can completely cover a field even a relatively new one like the

sociology of emotions this Handbook of the Sociology of Emotions comes close to being comprehensive The reader will come away with a greater appreciation for how far the sociology of emotions has developed and prospered over the last thirty years

Ex-Soviets in Israel L. L. Fialkova, Maria N. Yelenevskaya, 2007 A groundbreaking study of personal stories from ex Soviet immigrants in Israel bringing together scholarship in anthropology sociology linguistics semiotics and social psychology In the final years of the Soviet Union and into the 1990s Soviet Jews immigrated to Israel at an unprecedented rate bringing about profound changes in Israeli society and the way immigrants understood their own identity In this volume ex Soviets in Israel reflect on their immigration experiences allowing readers to explore this transitional cultural group directly through immigrants thoughts memories and feelings rather than physical artifacts like magazines films or books Drawing on their fieldwork as well as on analyses of the Russian language Israeli media and Internet forums Larisa Fialkova and Maria N Yelenevskaya present a collage of cultural and folk traditions from Slavic to Soviet Jewish and Muslim to demonstrate that the mythology of Soviet Jews in Israel is still in the making The authors begin by discussing their research strategies explaining the sources used as material for the study and analyzing the demographic profile of the immigrants interviewed for the project Chapters use immigrants personal recollections to both find fragments of Jewish tradition that survived despite the assimilation policy in the USSR and show how traditional folk perception of the Other affected immigrants interaction with members of their receiving society The authors also investigate how immigrants perception of time and space affected their integration consider the mythology of Fate and Lucky Coincidences as a means of fighting immigrant stress examine folk linguistics and the role of the lay person's view of languages in the life of the immigrant community and analyze the transformation of folklore genres and images of the country of origin under new conditions As the biggest immigration wave from a single country in Israel's history the ex Soviet Jews make a fascinating case study for a variety of disciplines Ex Soviets in Israel will be of interest to scholars who work in Jewish and immigration studies modern folklore anthropology and sociolinguistics

New Perspectives on Consumer Culture Theory and Research Renáta Sedláková, Pavel Zahrádka, 2013-02-21 In the post socialist countries the subject of consumption has not received sufficient attention from the perspective of Consumer Culture Theory The opinion has long prevailed among the majority of social scientists from this region that consumer society and consumptive behaviour is a socially destructive phenomenon and one of the main causes of problems in contemporary society This impression has prevented them from scrutinizing the symbolic dimension of consumption and led them to a critical analysis of the social causes and environmental consequences of excessive consumption The examination of symbolic aspects of consumer culture or the mutual interaction of culture and marketing communication for example have remained outside the realm of academic interest The absence of comprehensive academic interest in the topic of consumer culture does not however mean that consumer culture is not a subject of research Such research instead takes place outside of the sphere of the university in the commercial sector and is primarily focused on

issues of how to successfully sell products and services Due to competitive concerns commercial research into consumer culture has led to the privatization of its results which runs contrary to the ideal of science as an open and critical project The goal of this book is to create a counterbalance to this science in the shadows and overcome the mutual distrust between the academic and commercial spheres and make possible the transfer of recent discoveries between the two parties This publication is dedicated to the exploration of three areas of consumer culture research on consumer culture and consumer behaviour in post socialist countries especially in the Czech Republic new developments in the theory of consumer culture and innovative methodological approaches to its research and finally to recent criticism of consumer culture and consumerism It emerged from the collaboration of a team of authors made up of leading European researchers in the field of consumer culture such as Kate Soper London Metropolitan University Franz Liebl Berlin University of the Arts and Rainer Gries University of Vienna as well as promising young scholars from the Czech Republic Great Britain Sweden Serbia Poland and Portugal This book will be of great interest to students and scholars of sociology cultural studies marketing and market research

Research Studies in Comparative Sociology Charles Mark, 1973

Handbook of the Sociology of Education Maureen T. Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in

contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system
