Loglinear Models with Latent Variables Jacques A. Hagenaars, 1993-08-09 Sociologists with a quantitative bent will doubtless find it useful well written with a wealth of explanation Dougal Hutchison in Educational Research Loglinear Models with Latent Variables by Jacques A Hagenaars is a timely contribution to the literature that serves to inform researchers of the richness of loglinear approaches to analyzing latent categorical variables The author provides a clear exposition of the loglinear model Scott L Hershberger in Structural Equation Modeling Since the 1980s the loglinear model has become the dominant form of categorical data analysis as researchers have expanded it into new directions Jacques A Hagenaars book shows researchers the applications of one of these new developments how uniting ordinary loglinear analysis and latent class analysis into a general loglinear model with latent variables can result in a modified LISREL approach This modified LISREL model will enable researchers to analyze categorical data in the same way that they have been able to use LISREL to analyze continuous data Beginning with an introduction to ordinary loglinear modeling and standard latent class analysis Hagenaars explains the general principles of loglinear modeling with latent variables the application of loglinear models with latent variables as a causal model as well as a tool for the analysis of categorical longitudinal data the strengths and limitations of this technique and lastly a summary of computer programs that are available for executing this technique **Association Models** Raymond Sin-Kwok Wong, 2010-02-09 Many social science data are by nature organized in cross classified formats for example gender and racial differences in the relationship between education and occupation cross national and or temporal changes in patterns of marriage homogamy temporal variations in import export or input output patterns changes in the relationship between class positions party identification and voting and changes in the characteristics of urban neighborhoods in the United States over time While the substantive rationale in exploring their systematic relationship may appear simple and straightforward the application of appropriate statistical tools to decipher and interpret the meaning and complexities of the relationships involved can sometimes be difficult Fortunately with the important pioneering works in this field we now have a large repertoire of statistical models association models in particular which are well suited for such analyses Although association models have been widely utilized by social stratification researchers especially in the study of social mobility and assortative mating such techniques have yet to be widely disseminated to other social science disciplines This is partly because most of the important contributions are scattered in various journals and there has not been any systematic effort to integrate the family of association models into a single coherent framework **Applied Latent Class Analysis** Jacques A. Hagenaars, Allan L. McCutcheon, 2002-06-24 Applied Latent Class Analysis introduces several innovations in latent class analysis to a wider audience of researchers Many of the world's leading innovators in the field of latent class analysis contributed essays to this volume each presenting a key innovation to the basic latent class model and illustrating how it can prove useful in situations typically encountered in actual research *Generating Social Stratification*

Alan C Kerckhoff,2018-03-05 In this book some of the leading stratification scholars in the U S present empirical and theoretical essays about the institutional contexts that shape careers Building on recent advances in theory data and analytic technique the essays in this volume work toward the goal of identifying and assessing the processes by which a birth cohort is distributed in the stratification system given their positions of origin in that system Alan Kerckhoff s introduction situates the studies in this volume within the context of previous stratification research over several generations making the book an invaluable resource for scholars and graduate students Survey Research Methodology, 1990-1999 Graham R.

Walden,2002-09-30 Survey research is one of the most widely used research methodologies across the social and behavioral sciences Two trends that have had a major impact on the development of survey methods over the last decade are 1 the application of techniques and theories from cognitive psychology to the understanding and reduction of survey measurement error and 2 the application of new computer and telephony technologies to data collection and analysis These trends and other emerging issues from the 1990 s literature on survey research methods are captured here in 617 detailed annotations to monographs journals government documents dissertations and ERIC documents Annotations include examples from business criminology education health and medicine law library science mass media military science political science psychology sociology social work religion and women s studies The bibliographic entries provide every useful element including series names complete subtitles and overall text page numbers as well as chapter page numbers The extensive annotations are more complete and more detailed than is typical for annotated bibliographies The descriptions include highlights of the study data and sufficient detail to enable the reader to make an informed choice as to whether to seek the full text Appendices include journals cited and the major survey research organizations The annotations are easily accessed through author and subject indexes **Envisioning the Survey Interview of the Future** Frederick G. Conrad,Michael F.

Schober,2007-12-10 Praise forEnvisioning the Survey Interview of the Future This book is an excellent introduction to some brave new technologies and their possible impacts on the way surveys might be conducted Anyone interested in the future of survey methodology should read this book Norman M Bradburn PhD National Opinion Research Center University of Chicago Envisioning the Survey Interview of the Future gathers some of the brightest minds in alternative methods of gathering self report data with an eye toward the future self report sample survey Conrad and Schober by assembling a group of talented survey researchers and creative inventors of new software based tools to gather information from human subjects have created a volume of importance to all interested in imagining future ways of interviewing Robert M Groves PhD Survey Research Center University of Michigan This collaboration provides extensive insight into the impact of communication technology on survey research As previously unimaginable communication technologies rapidly become commonplace survey researchers are presented with both opportunities and obstacles when collecting and interpreting data based on human response Envisioning the Survey Interview of the Future explores the increasing influence of emerging technologies on the

data collection process and in particular self report data collection in interviews providing the key principles for using these new modes of communication With contributions written by leading researchers in the fields of survey methodology and communication technology this compilation integrates the use of modern technological developments with established social science theory The book familiarizes readers with these new modes of communication by discussing the challenges to accuracy legitimacy and confidentiality that researchers must anticipate while collecting data and it also provides tools for adopting new technologies in order to obtain high quality results with minimal error or bias Envisioning the Survey Interview of the Future addresses questions that researchers in survey methodology and communication technology must consider such as How and when should new communication technology be adopted in the interview process What are the principles that extend beyond particular technologies Why do respondents answer questions from a computer differently than questions from a human interviewer How can systems adapt to respondents thinking and feeling What new ethical concerns about privacy and confidentiality are raised from using new communication technologies With its multidisciplinary approach extensive discussion of existing and future technologies and practical guidelines for adopting new technology Envisioning the Survey Interview of the Future is an essential resource for survey methodologists questionnaire designers and communication technologists in any field that conducts survey research It also serves as an excellent supplement for courses in research methods at the upper undergraduate or graduate level

The Palgrave Handbook of Survey Research David L. Vannette, Jon A. Krosnick, 2017-12-21 This handbook is a comprehensive reference guide for researchers funding agencies and organizations engaged in survey research Drawing on research from a world class team of experts this collection addresses the challenges facing survey based data collection today as well as the potential opportunities presented by new approaches to survey research including in the development of policy It examines innovations in survey methodology and how survey scholars and practitioners should think about survey data in the context of the explosion of new digital sources of data The Handbook is divided into four key sections the challenges faced in conventional survey research opportunities to expand data collection methods of linking survey data with external sources and improving research transparency and data dissemination with a focus on data curation evaluating the usability of survey project websites and the credibility of survey based social science Chapter 23 of this book is open access under a CC BY 4 0 license at link.springer.com

Networks and Markets James E. Rauch, Alexandra Casella, 2001-06-21 Networks and Markets argues that economists knowledge of markets and sociologists rich understanding of networks can and should be combined Together they can help us achieve a more coherent view of economic life where transactions follow both the logic of economic incentives and the established channels of personal relationships Market exchange is impersonal episodic and carried out at arm s length All that matters is how much the seller is asking and how much the buyer is offering An economic network by contrast is based upon more personalized and enduring relationships between people tied together by more than just price Networks and Markets focuses on how the two concepts relate to each other Are social networks an essential precondition for successful markets or do networks arise naturally out of markets as faceless traders build reputations and gain confidence in each other The book includes contributions by both sociologists and economists applying the concepts of markets and networks to concrete empirical phenomena Among the topics analyzed the book explains how in Taiwan South Korea and Japan firms combine into tightly knit business blocs how wholesalers in a Marseille fish market earn the loyalty of customers and how ethnic retailers in the U S share valuable market information with other shopkeepers from their ethnic group A response to each chapter discusses the issue from the standpoint of the other discipline Sociologists are challenged to go beyond small scale economic exchange and to integrate their concept of networks into a broader understanding of the economic system as a whole while economists are challenged to consider the economic implications of network ties which can be strong or weak unconditional or highly contingent This book proves that both economics and sociology provide stronger insights when they study markets and networks as parallel forms of exchange But it also clarifies the healthy division of labor that remains between the two disciplines Sociologists are adept at showing how markets are framed by social institutions economists specialize in explaining how markets perform taking the social context as a given Networks and Markets showcases what each discipline does best and reveals where each discipline would do better by borrowing from the other
