This book stands as the full body of scholarly work on western theories of social sciences. The book contains three chapters. The first part gives the overall scenario of theories, the second part provides the pathway to research destination, the research method, and the third and final part is the destination of the substantive field of study and the roles of international organizations on social, political, economic, environmental, regimes, creation as well as to other social and development functions of international organizations. Sociology examines the social actors' activities in society and social problems. Western Scholars have developed many social theories which address the underlying causes such as social conflicts and inequalities, and many formal and informal social organizations are involved to minimize the challenges of inequalities. The study of social organizations is a relatively new phenomenon in sociology. Broadly its historical root can be traced from Greek civilization, Plato, Aristotle, and it has mostly flourished since the Enlightenment Era. However, empirical studies show that the scientific study of organizations began only from the 19th and 20th century. Among the scholars of these centuries, the contributions of Karl Marx, Ferdinand Tönnies, Emile Durkheim, Ludwig Gumplowicz, Vilfredo Pareto, Max Weber, and Talcott Parsons are considered as pillars of sociology. This book intends to answer the broad and major questions of theories, methods, and the international organization studies in social sciences, particularly in sociology, and to provide the basic concepts of social theories, application of methods in research, qualitative and elaborate the factual reality, why study of international organization is also subject of sociological study. The book presents the perspectives of organizational sociology in way that scholarly readers can see the linkages, political sciences, sociology, and slightly economic in addressing the roles and issues of the international organizations.

Foucault critiques mainstream American nursing theory and its use of post structural theory comparing and contrasting how postmodern and post structural ideas have been used fruitfully in nursing research and theorizing elsewhere In the late 1980s references to post structuralism and Michel Foucault started to appear in nursing journals Since then hundreds of nursing publications have cited postmodernism and key post structural ideas such as power knowledge discourse and de centring the human subject In Nursing Theory Postmodernism Post structuralism and Foucault Olga Petrovskaya argues that the application of these ideas is markedly different in American nursing theory scholarship compared to nursing theoretical scholarship generated outside the canon of unique nursing theory Analysing relevant literature from the late 1980s through 2010s she demonstrates this difference arguing that American nursing theory calcified into a matrix of dogmas built on logical positivism wary of borrowed theory and loyal to a unique nursing science Post structural ideas that fit the matrix such as criticism of medicine are sanctioned whereas ideas sceptical of humanistic agendas including those that challenge American nursing theory are rendered meaningless In contrast other nurse scholars from Britain Australia Canada and what the author calls the American enclave group engaged with postmodern and post structural perspectives to enrich their research and invite readers to rethink nursing practice The book showcases examples of their intelligent creative theorizing Arguing that American nursing theory enervated nursing theorizing Petrovskaya calls for opening this matrix to theoretical and methodological creativity less rigid categories of scholarship and healthy self examination Making the case that post structural ideas are vital for nurses ability to critically reflect on their discipline and profession this is a necessary read for all those interested in nursing theory philosophy and praxis Chapter 1 of this book is available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com) It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
