Elliott Carter's What Next? Guy Capuzzo, 2012 The first book about Elliott Carter's only opera or indeed about any single work by this still productive modern master In 1997 the eminent American composer Elliott Carter teamed with British music critic librettist Paul Griffiths to create the one act opera What Next Hailed by the New York Times as theatrically dynamic and poignant the opera explores how six people work together to emerge from the wreckage of an accident Today What Next enjoys a prominent position in Carter's celebrated late late compositional period In the first book to focus exclusively on one Carter composition Guy Capuzzo uses the metaphors of communication cooperation and separation to trace the dramatic arc of What Next Through an approach that places stage action words and music on equal footing Capuzzo's readings of four excerpts from the opera reveal the inner workings of Carter and Griffiths's tragicomedy Elliott Carter's What Next Communication Cooperation and Separation sheds light on a significant work by a major figure in twentieth century concert music and will be of interest to all who study American music vocal music and musical criticism Guy Capuzzo is associate professor of music theory at the University of North Carolina Greensboro

Aesthetics Carolyn Korsmeyer, 1998-11-09 Philosophers have considered questions raised by the nature of art of beauty and critical appreciation since ancient times and the discipline of aesthetics has a long tradition that stretches from Plato to the present

On Art and Science Shyam Wuppuluri, Dali Wu, 2019-11-02 Einstein once remarked After a certain high level of technical skill is achieved science and art tend to coalesce in aesthetics plasticity and form The greatest scientists are always artists as well In this volume some of the world's leading thinkers come together to expound on the interrelations between sciences and arts While one can segregate art and place it outside the scientific realm it is nevertheless inextricably linked to our essential cognitive emotional perceptual modalities and abilities and therefore lies alongside and in close contact with the method of science and philosophy What inspiration can scientists draw from art and

how can scientific spirit foster our understanding and creation of aesthetic works How are art and science grounded in our cognition What role does perception play in science and art Are criteria for beauty in art and science the same How does evolution shape our understanding of art How do science art and scientific artistic frameworks shape society as a whole and help us address its pressing issues The epistemological and ontological aspects haunt artists philosophers and scientists alike The essays in this volume address these manifold questions while also elucidating the pragmatic role they play in our daily life

The Concept of First Philosophy and the Unity of the Metaphysics of Aristotle Richard Milton Martin, 1980-06-30 That traditional methods do not suffice was pointed out years back by Jan Salamucha in his pioneering work on the ex motu argument of St Thomas in *The New Scholasticism* XXXII 1958 but first published in 1934 Although modern logic is a comparatively young science he noted it provides us with many new and subtle tools for exact thinking To reject them is to adopt the attitude of one who stubbornly insists on traveling by stage coach though having at his disposal a train or airplane The great philosophers of the past did not rely exclusively on those weak logical tools left to them by their predecessors The very problems themselves and their own scientific genius forced them to build rational reconstructions that went far beyond those of their time

Lonesome Roads and Streets of Dreams Andrew S. Berish, 2024-05-31 Any listener knows the power of music to define a place but few can describe the how or why of this phenomenon In *Lonesome Roads and Streets of Dreams* Place Mobility and Race in Jazz of the 1930s and 40s Andrew Berish attempts to right this wrong showcasing how American jazz defined a culture particularly preoccupied with place By analyzing both the performances and cultural context of leading jazz figures including the many famous venues where they played Berish bridges two dominant scholarly approaches to the genre offering not only a new reading of swing era jazz but an entirely new framework for musical analysis in general one that examines how the geographical realities of daily life can be transformed into musical sound Focusing on white bandleader Jan Garber black bandleader Duke Ellington white saxophonist Charlie Barnet and black guitarist Charlie Christian as well as traveling from Catalina Island to Manhattan to Oklahoma City *Lonesome Roads and Streets of Dreams* depicts not only a geography of race but how this geography was disrupted how these musicians crossed physical and racial boundaries from black to white South to North and rural to urban and how they found expression for these movements in the insistent music they were creating

The Reincarnating Mind, or the Ontopoietic Outburst in Creative Virtualities Anna-Teresa Tymieniecka, 2012-12-06 Tymieniecka's phenomenology of life reverses current priorities stressing the primogenital role of aesthetic enjoyment rather than cognition as typifying the Human Condition The present collection

offers clues to a crucial breakthrough in the perennial uncertainties about the powers and prerogatives of the human mind It proposes human creativity as the pivot of the mind s genesis and its endowment In the midst of the current defiance of the transcendental certainties of cognition this turn to the creative act of the human being represents a radical reversion to an approach to human powers that is predominated by the aesthetic virtualities of the Human Condition The collection lays down the foundations for a new discovery of the human mind addressing the plumbing of the functional system that originates in the creative potentiality of the Human Condition undercutting the currently prevalent empirical reductionism
