Rethinking Language and Gender Research Victoria Bergvall,2014-06-11 Rethinking Language and Gender Research is the first book focusing on language and gender to explicitly challenge the dichotomy of female and male use of language It represents a turning point in language and gender studies addressing the political and social consequences of popular beliefs about women s language and men s language and proposing new ways of looking at language and gender The essays take a fresh approach to the study of subjects such as language and sex and the use of language to produce and maintain power and prestige Topics explored in this text include sex and the brain the language of a rape hearing teenage language radio talk show exchanges discourse strategies of African American women political implications for language and gender studies the relationship between sex and gender and the construction of identity through language A useful introductory chapter sets the articles in context explaining the relationships that exist between them and full cross referencing between articles and an extensive index allow for easy access to information The interdisciplinary approach of the text the wide range of methodologies presented and the comprehensive review of the current literature will make this book invaluable reading for all upper level undergraduate students postgraduate students and researchers in the fields of linguistics sociolinguistics gender and cultural studies

Construction Management Daniel W. Halpin,Bolivar A. Senior,Gunnar Lucko,2017-08-07 It s often said that the construction professional has to be a jack of all trades and master of all This text covers a wide range of subjects reflecting the breadth of knowledge needed to understand the dynamics of this large and complex industry This edition includes updated chapters on planning and scheduling a new chapter addressing linear scheduling methods material regarding the historical background of construction as a profession and includes an Instructor Resource of solutions to the end of chapter review exercises This text has become a standard course text at many universities The first four editions have enjoyed wide success as an introductory treatment of the subjects which are critical to success in the construction industry This fifth edition preserves the features that have been most appreciated by its users throughout the years and adds suggestions provided by instructors and students through formal surveys and informal feedback to the authors

The Engineering-Business Nexus Steen Hyldgaard Christensen,Bernard Delahousse,Christelle Didier,Martin Meganck,Mike Murphy,2018-11-14 Fascinating and compelling in equal measure this volume presents a critical examination of the multilayered relationships between engineering and business In so doing the study also stimulates ethical reflection on how these relationships either enhance or inhibit strategies to address vital issues of our time In the context of geopolitical economic and environmental tendencies the authors explore the world that we should want to create and the role of the

engineer and the business manager in this endeavor Throughout this volume the authors identify periods of alignment and periods of tension between engineering and business They look at focal points of the engineering business nexus related to the development of capitalism The book explores past and present movements to reshape reform or reject this nexus The volume is informed by questions of importance for industry as well as for higher education These are What kinds of conflict arise for engineers in their attempts to straddle both professional and organizational commitments How should professionals be managed to avoid a clash of managerial and professional cultures How do engineers create value in firms and corporations What kinds of tension exist between higher education and industry What challenges does the neoliberal entrepreneurial university pose for management faculty students society and industry Should engineering graduates be ready for work and can they possibly be What kinds of business issues are reflected in engineering education curricula and for what purpose Is there a limit to the degree of business hybridization in engineering degree programs and if so what would be the criterion for its definition Is there a place in engineering education curricula for reflective critique of assumptions related to business and economic thinking One ideal of management and control comes to the fore as the Anthropocene the world transformed into an engineered artefact which includes human existence The volume raises the question as to how engineering and business together should be considered given the fact that the current engineering business nexus remains embedded within an economic model of continual growth By addressing macro level issues such as energy policy sustainable development globalization and social justice this study will both help create awareness and stimulate development of self knowledge among practitioners educators and students thereby ultimately addressing the need for better informed citizens to safeguard planet Earth as a human life supporting system
