Lopez,Robyn P. Angliss,2001 Marine Mammals Peter G.H. Evans,Juan Antonio Raga,2012-12-06 Interest in marine mammals has increased dramatically in the last few decades as evidenced by the number of books scientific papers and conferences devoted to these animals Nowadays a conference on marine mammals can attract between one and two thousand scientists from around the world This upsurge of interest has resulted in a body of knowledge which in many cases has identified major conservation problems facing particular species At the same time this knowledge and the associated activities of environmental organisations have served to introduce marine mammals to a receptive public to the extent that they are now perceived by many as the living icons of biodiversity conservation Much of the impetus for the current interest in marine mammal conservation comes from Save the Whale campaigns started in the 1960s by environmental groups around the world in response to declining whale populations after over exploitation by humans This public pressure led to an international moratorium on whaling recommended in 1972 by the United Nations Conference on the Human Environment in Stockholm Sweden and eventually adopted by the International Whaling Commission ten years later This moratorium largely holds sway to this day and further protective measures have included the delimitation of extensive areas of the Indian Ocean 1979 and Southern Ocean 1994 as whale sanctuaries *Marine Mammal Protection Act and Endangered Species Act Implementation Program 2001* Anita L. From Sea to Shining Sea Frank M. Panek, 2014-11-07 From Sea to Shining Sea is a story of exploration and discovery in the depths of the seas of Earth and on the Jovian moon of Europa In the height of the Cold War a submarine operating out of Portsmouth Shipyard was diverted to investigate a potential Soviet threat in the North Atlantic That submarine suffers a tragic accident and is lost with all hands One hundred years later the crew of an experimental research submersible, the R S Balanus, was sent by the United Nations and the US Navy to investigate something unusual in some of the deepest waters of the North Atlantic What Jack Wolfe and Wil Nelson thought was a demonstration dive of Sea Technologies and Explorations' newest design was actually something quite different The final test dive of the R S Balanus would take the crew to explore the darkness and a dangerous unknown Dr Arnie Hanson of the UN Interplanetary Space Corps suspected that what drew the R S Balanus to investigate the abyss was in some way related to what the crew of the spaceship Endeavor had discovered on Europa miles under the ice in the Sea of Conamara Chaos If he was correct, what these two groups of explorers found could change the world forever      *Hearings on Military Posture and H.R. 10929* United States.
