Globalisation and African Languages Katrin Bromber,Birgit Smieja,2011-07-20 Globalisation and African Languages links African language studies to the concept of globalisation which increasingly undergoes critical review Hence African linguists of various provenience can make valuable contributions to this debate In cultural matters which by definition include language there is often a sense that globalisation leads to a major trend of homogenisation which results in a reduction of diversity on the one hand and on the other in new themes being incorporated into global cultural patterns However often conflicting and overlapping particularistic interests exist which have a constructive as well as destructive potential This aspect leads directly to the first of three sections of this volume LANGUAGE USE AND ATTITUDES which addresses some of the burning issues in sociolinguistic research Since this research area is tightly linked to the educational domain these important issues are addressed in articles that comprise the second section of this volume LANGUAGE POLICY AND EDUCATION The third section of the volume presents articles dealing with LANGUAGE DESCRIPTION AND CLASSIFICATION demonstrating which parts of different language systems are affected through contact under historical and modern conditions The contributions of all the well known scholars in this volume show that globalisation is a two way street and to ensure that all sides benefit in a reciprocal manner means the impacts have to be monitored globally regionally nationally and locally By disseminating and emphasising these linguistic findings as part of the global cultural heritage African language studies may offer urgently needed new perspectives towards a rapidly changing world **Language Science and Language technology in Africa** Steve Ndinga-Koumba-Binza,Sonja E Bosch,2012-10-01 This book provides a

Zawada, 2001-07-13 In Cognitive Linguistics polysemy is regarded as a categorizing phenomenon i.e. related meanings of words form categories centering around a prototype and bearing family resemblance relations to one another Under this polysemy categorization view the scope of investigation has been gradually broadened from categories in the lexical and lexico grammatical domain to morphological syntactic and phonological categories The papers in this volume illustrate the importance of polysemy in describing these various categories A first set of papers analyzes the polysemy of such lexical categories as prepositions and scalar particles and looks at the import of polysemy in frame based dictionary definitions A second set shows that noun classes case and locative prefixes constitute meaningful and polysemous categories Three papers then pay attention to polysemy from a psychological perspective looking for psychological evidence of polysemy in lexical categories
