Seeking a Center Otto Bird, 2011-04-19 This is a stimulating intellectual and spiritual autobiography of Otto Bird a pioneer in the Great Books Movement in this country

**Novelties in the Heavens** Jean Dietz Moss, 1993-03-15 In this fascinating work Jean Dietz Moss shows how the scientific revolution begun by Copernicus brought about another revolution as well one in which rhetoric previously used simply to explain scientific thought became a tool for persuading a skeptical public of the superiority of the Copernican system Moss describes the nature of dialectical and rhetorical discourse in the period of the Copernican debate to shed new light on the argumentative strategies used by the participants Against the background of Ptolemy's *Almagest* she analyzes the gradual increase of rhetoric beginning with Copernicus's *De Revolutionibus* and Galileo's *Siderius nuncius* through Galileo's debates with the Jesuits Scheiner and Grassi to the most persuasive work of all Galileo's *Dialogue* The arguments of the Dominicans Bruno and Campanella the testimony of Johannes Kepler and the pleas of Scriptural exegetes and the speculations of John Wilkins furnish a counterpoint to the writings of Galileo the centerpiece of this study The author places the controversy within its historical frame creating a coherent narrative movement She illuminates the reactions of key ecclesiastical and academic figures figures and the general public to the issues Blending history and rhetorical analysis this first study to look at rhetoric as defined by sixteenth and seventeenth century participants is an original contribution to our understanding of the use of persuasion as an instrument of scientific debate

*Science and Religion* Gary B. Ferngren, 2017-03 Weissenbacher Stephen P Weldon and Tomoko Yoshida

**Boojums All the Way Through** N. David Mermin, 1990-03-15 Boojums All the Way Through is a collection of essays that deals in a variety of ways with the problem of communicating modern physics to both physicists and non physicists The author is Professor David Mermin a well known theoretical physicist who recently won the first Julius Edgar Lileinfeld prize of the American Physical Society for his remarkable clarity and wit as a lecturer to nonspecialists on difficult subjects David Mermin's wry humour is clearly apparent in most of these articles but even those that are more serious are characterized by a liveliness and commitment to finding startlingly simple ways of presenting ideas that are traditionally regarded as complex This book will appeal to physicists at all levels to mathematicians scientists and engineers and indeed to anyone who enjoys reading non technical accounts of new ways of looking at modern science

*God and Nature* David C. Lindberg, Ronald L. Numbers, 2023-11-15 Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language Although many twentieth century historians have written on the relationship between Christianity and science and in the process have called into question many of White's conclusions the image of warfare lingers in the public mind To provide an up to date alternative based on the best available scholarship and written in nontechnical language the editors of this volume have assembled an international group of distinguished historians In eighteen essays prepared especially for this book these

authors cover the period from the early Christian church to the twentieth century offering fresh appraisals of such encounters as the trial of Galileo the formulation of the Newtonian worldview the coming of Darwinism and the ongoing controversies over scientific creationism They explore not only the impact of religion on science but also the influence of science and religion This landmark volume promises not only to silence the persistent rumors of war between Christianity and science but also serve as the point of departure for new explorations of their relationship Scholars and general readers alike will find it provocative and readable Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language Although many twentieth century historians

**How to Prove There Is a God** Mortimer Adler, 2011-12-10 One of the great tasks of Mortimer Adler's illustrious life was his search for a watertight proof of the existence of God Adler believed that his search had been successful Adler spent years studying the classic proofs of God's existence especially Aquinas's Five Ways and found shortcomings in all of them as conventionally understood But he thought that some of them contained ideas which if properly developed could be improved and he continued to search for a satisfying and logically unassailable proof Toward the end of the 1970s he believed he had arrived at such a proof which he presented in his historic work *How to Think about God* 1980 In the writings assembled in *How to Prove There Is a God* Adler gives us his approach to the question of God's existence in fresh and popular form He defends his position against critics both believers and skeptics The book includes a transcript of one of Adler's appearances on William Buckley's *Firing Line* Adler's revealing interview with Edward Wakin the exchange of views on natural theology between Adler and Owen Gingerich and John Cramer's eloquent argument that the trend of modern cosmology supports Adler's early struggles with the question of God's existence

**Patterns, Thinking, and Cognition** Howard Margolis, 1987 What happens when we think How do people make judgments While different theories abound and are heatedly debated most are based on an algorithmic model of how the brain works Howard Margolis builds a fascinating case for a theory that thinking is based on recognizing patterns and that this process is intrinsically a logical Margolis gives a Darwinian account of how pattern recognition evolved to reach human cognitive abilities Illusions of judgment standard anomalies where people consistently misjudge or misperceive what is logically implied or really present are often used in cognitive science to explore the workings of the cognitive process The explanations given for these anomalous results have generally explained only the anomaly under study and nothing more Margolis provides a provocative and systematic analysis of these illusions which explains why such anomalies exist and recur Offering empirical applications of his theory Margolis turns to historical cases to show how an individual's cognitive repertoire the available cognitive patterns and their relation to cues changes or resists changes over time Here he focuses on the change in worldview occasioned by the Copernican discovery not only how an individual might come to see things in a radically new way but how it is possible for that new view to spread and become the dominant one A reanalysis of the trial of Galileo focuses on social

cognition and its interactions with politics In challenging the prevailing paradigm for understanding how the human mind works Patterns Thinking and Cognition is certain to stimulate fruitful debate *The Bible, Protestantism, and the Rise of Natural Science* Peter Harrison, 2001-07-26 An examination of the role played by the Bible in the emergence of natural science **Galileo, Bellarmine, and the Bible** Richard J. Blackwell, 1991-01-31 Considered the paradigm case of the troubled interaction between science and religion the conflict between Galileo and the Church continues to generate new research and lively debate Richard J Blackwell offers a fresh approach to the Galileo case using as his primary focus the biblical and ecclesiastical issues that were the battleground for the celebrated confrontation Blackwell s research in the Vatican manuscript collection and the Jesuit archives in Rome enables him to re create a vivid picture of the trends and counter trends that influenced leading Catholic thinkers of the period the conservative reaction to the Reformation the role of authority in biblical exegesis and in guarding orthodoxy from the inroads of unbridled spirits and the position taken by Cardinal Bellarmine and the Jesuits in attempting to weigh the discoveries of the new science in the context of traditional philosophy and theology A centerpiece of Blackwell s investigation is his careful reading of the brief treatise Letter on the Motion of the Earth by Paolo Antonio Foscarini a Carmelite scholar arguing for the compatibility of the Copernican system with the Bible Blackwell appends the first modern translation into English of this important and neglected document which was placed on the Index of Forbidden Books in 1616 Though there were differing and competing theories of biblical interpretation advocated in Galileo s time the legacy of the Council of Trent the views of Cardinal Bellarmine the most influential churchman of his time and finally the claims of authority and obedience that weakened the ability of Jesuit scientists to support the new science all contributed to the eventual condemnation of Galileo in 1633 Blackwell argues convincingly that the maintenance of ecclesiastical authority not the scientific issues themselves led to that tragic trial

The Cambridge History of Renaissance Philosophy C. B. Schmitt, Quentin Skinner, Eckhard Kessler, Jill Kraye, 1988 This 1988 Companion offers an account of philosophical thought from the middle of the fourteenth century to the emergence of modern philosophy **Foundation, Fall and Flood** Glenn R. Morton, 2017-12-31 Science and the Bible do not contradict one another The author shows that the plain and literal text of the Bible is in perfect harmony with even the latest findings of mainstream science You need not compromise either your faith or your intellect Evidence Of Purpose John Marks Templeton, 1994-01-15 For nearly a century the central theological message of science seemed to be that there was no need for theology science could stand alone to explain the universe But today that message is changing In this volume a gallery of respected scientists describes new developments in their fields and their relationship with theological views of the universe Contributors include Owen Gingerich Russell Stannard Paul Davies Walter R Hearn Robert Russell Arthur Peacocke John Polkinghorne John C Eccles Daniel H Osmond and David Wilcox Kepler Max Caspar, 2012-10-10 Definitive biography covers Kepler s scientific accomplishments laws of planetary motion work with calculus optics more plus public and personal

life more Introduction and Notes by Owen Gingerich      **Science and Theology** Murray Rae, Hilary Regan, John Stenhouse, 2016-10-06 In popular culture science and theology have often been portrayed as antagonistic Some writers have described the history of the debate in terms of a surrender by theology a retreat from the field of engagement theology has abandoned the public arena leaving all creation to science and has opted instead for the safer ground of ethics morality and personal or private belief Science and Theology advocates a constructive dialogue between the two subjects and suggests the topics where they might meet The essays in this volume were commissioned from leading figures around the world experts in their own disciplines but enthusiasts for debate at the science and theology interface They include Norma Emerton Owen Gingerich Nancey Murphy John Polkinghorne John Puddefoot and Carver T Yu They discuss natural theology the methodologies of science and theology and theology in the light of scientific discovery Their themes cover scientism divine action in the world the problem of evil freedom and determinism reductionism and humanity the limits of knowledge and chaos theory Together these essays offer a significant and positive contribution to one of the most exciting areas of modern thought      Integrative Theology Gordon R. Lewis, Bruce A. Demarest, 2010-09-21 Integrative Theology is designed to help graduate students in a pluralistic world utilize a standard method of fruitful research Each chapter on a major doctrine 1 states a classic issue of ultimate concern 2 surveys alternative past and present answers and 3 tests those proposals by their congruence with information on the subject progressively revealed from Genesis to Revelation Then the chapter 4 formulates a doctrinal conclusion that consistently fits the many lines of biblical data 5 defends that conviction respectfully and finally 6 explores the conclusion's relevance to a person's spiritual birth growth and service to others all for the glory of God Why the title Integrative Theology In each chapter steps 2-6 integrate the disciplines of historical biblical systematic apologetic and practical theology      **How to Think about the Great Ideas** Mortimer Jerome Adler, 2000 Drawing on his extensive knowledge of Western literature philosophy and history Adler considers what is meant by democracy law emotion language truth and other abstract concepts in light of more than two millennia of Western civilization 15 photos      Bibliography of the History of Medicine ,      **Developing Countries - Economics and Politics** A.
