## **The Great Imperfection:**

**A Sermon on the Perfection of God in the Imperfection of His People** Thomas Williams, 1858      The Evolution of Imperfection Laurence D. Hurst, 2025-04-08 How understanding our genetic imperfections can change our view of evolution and enrich what it means to be human If we start with the presumption that evolution is a constantly improving process some aspects of our evolution just do not make sense We have a high rate of genetic diseases for example and much of our DNA seems to be pointless In The Evolution of Imperfection Laurence Hurst explores our apparently rotten genetic luck Hurst a leading authority on evolution and genetics argues that our evolutionary imperfections proceed directly from two features the difficulties of pregnancy and the fact that historically there are relatively few of us In pregnancy natural selection can favor chromosomes that kill embryos in species including ours that continuously receive resources from the mother Most fertilized eggs don't make it and incompatibilities between the fetus and mother can lead to lethal disorders of pregnancy The historically small population size enhances the role of chance which in turn leads to both accumulation of unnecessary DNA and more mutation So what can save us One answer may lie in genetic medicine which has given us therapies that make killer conditions preventable and even curable Hurst suggests that our seeming imperfections could be the key to a new way to understand evolution itself Looking at circumstances that seem to defy explanation we might come to a richer understanding of how evolution really works and what it means to be human      **After Thoughts: Beyond the 'System'**
