The Great Mother An Analysis Of The Archetype:

The Great Mother Erich Neumann, 2015-05-04 This landmark book explores the Great Mother as a primordial image of the human psyche Here the renowned analytical psychologist Erich Neumann draws on ritual mythology art and records of dreams and fantasies to examine how this archetype has been outwardly expressed in many cultures and periods since prehistory He shows how the feminine has been represented as goddess monster gate pillar tree moon sun vessel and every animal from snakes to birds Neumann discerns a universal experience of the maternal as both nurturing and fearsome an experience rooted in the dialectical relation of growing consciousness symbolized by the child to the unconscious and the unknown symbolized by the Great Mother Featuring a new foreword by Martin Liebscher this Princeton Classics edition of *The Great Mother* introduces a new generation of readers to this profound and enduring work *The Great Mother* Erich Neumann, 1963 Neumann examines how the Feminine has been experienced and expressed in many cultures from prehistory to our own time Appearing as goddess and demon gate and pillar garden and tree hovering sky and containing vessel the Feminine is seen as an essential factor in the dialectical relation of individual consciousness symbolized by the child to the ungraspable matrix symbolized by the Great Mother **The Great Mother** E. Neumann, 1995 **The Great Mother** Erich Neumann (Psychologe, Deutschland, Israel), 1974 The Great Mother Erich Neumann, 1974 The Great Mother Erich Neumann, 1970 **The Great Mother** Erich Neumann, 1963 The Great Mother Erich Neumann (Psychologe, Deutschland, Israel), 1955 **Archetype Revisited** Anthony Stevens, 2015-06-05 Archetype A Natural History of the Self first published in 1982 was a ground breaking book the first to explore the connections between Jung's archetypes and evolutionary disciplines such as ethology and sociobiology and an excellent introduction to the archetypes in theory and practical application as well C G Jung's archetypes of the collective unconscious have traditionally remained the property of analytical psychology and have commonly been dismissed as mystical by scientists But Jung himself described them as biological entities which if they exist at all must be amenable to empirical study In the work of Bowlby and Lorenz and in studies of the bilateral brain Anthony Stevens has discovered the key to opening up this long ignored scientific approach to the archetypes originally envisaged by Jung At last in a creative leap made possible by the cross fertilisation of several specialist disciplines psychiatry can be integrated with psychology with ethology and biology The result is an immensely enriched science of human behaviour In *Archetype Revisited* Stevens considers the enormous cultural social and intellectual changes that have taken place since the publication of the original edition and includes An updated chapter on The Archetypal Masculine and Feminine reflecting recent research findings and developments in feminist thinking Commentary on the intrusion of neo Darwinian thinking into psychology and psychiatry Analysis of what has happened to the archetype in terms of our understanding of it and our responses to it This Classic Edition of the book includes a new introduction by the author *Jewish Exiles' Psychological Interpretations of Nazism* Avihu Zakai, 2020-08-31 This book examines works of four

German Jewish scholars who in their places of exile sought to probe the pathology of the Nazi mind Wilhelm Reich's *The Mass Psychology of Fascism* 1933 Erich Fromm's *Escape from Freedom* 1941 Siegfried Kracauer's *From Caligari to Hitler* A Psychological History of the German Film 1947 and Erich Neumann's *Depth Psychology and a New Ethic* 1949 While scholars have examined these authors' individual legacies no comparative analysis of their shared concerns has yet been undertaken nor have the content and form of their psychological inquiries into Nazism been seriously and systematically analyzed Yet the sense of urgency in their works calls for attention They all took up their pens to counter Nazi barbarism believing like the English jurist and judge Sir William Blackstone who wrote in 1753 *scribere est agere* to write is to act

A Re-mapping of Womanhood and Creativity Clara Oropeza, PhD, 2025-04-24 A Re-mapping of Womanhood and Creativity investigates the diverse ways in which women set out to find a matrilineal line as a wellspring for creative transformation and through a lens of analytical psychology how we read women's literary history and narratives about womanhood While following the feminine influences that forged her own search and nature as a writer this book re-maps the life and work of Clara Oropeza's literary mother Ana's Nin focusing on Nin's formative affinity with her mother alongside her own personal mother In this mother map Oropeza looks closely at the relationship between mothers and daughters the formation of the maternal wound and ways to move towards healing Oropeza examines the pivotal role that a reconnection to a maternal line has in shaping a woman's creative life This book argues that synthesizing our intellectual spiritual and ancestral ways of knowing away from the harmful narratives that shape our lives is essential today With scholarly and personal insight Oropeza sheds new light on how women come to shores of understanding themselves beyond unresolved familial and historical tensions Combining literature myth and psychology this book will be an illuminating read for students scholars and professionals in the areas of literature psychoanalysis and mythology This book will be crucial reading for women in particular women of color interested in the process of individuation creativity and womanhood

Type and Archetype in Late Antique and Byzantine Art and Architecture, 2023-02-13 This book addresses typology of Late Antique and Byzantine art and architecture in eight wide-ranging contributions from an international group of scholars A dialogue between type and its ultimate source archetype surpasses issues of formalism and conventional chronological narratives to suggest a more nuanced approach to typology as a systematic and systemic classification of types in the visual landscape of the pagans Jews and Christians Set against the contemporaneous cultural context select examples of Mediterranean material culture confirm the great importance of type and archetype constructs for theoretical discourse on architecture and visual arts Contributors are Anna Adashinskaya Jelena An-elkovi Gra-ar Jelena Bogdanovi edomila Marinkovi Marina Mihaljevi Ljubomir Milanovi Cecilia Olovsson and Ida Sinkevi

Living Archetypes Anthony Stevens, 2015-06-26 Anthony Stevens has devoted a lifetime to modernizing our understanding of the archetypes within us relating them to conceptual developments in a variety of scientific disciplines such as the patterns of behaviour of behavioural ecology the species-specific behavioural systems of

Bowlby's attachment theory, the deep structures of Chomskian linguistics and the modules of evolutionary psychology to name but a few. This selection of papers and chapters from the course of Stevens' career, all lucidly written and argued, highlight episodes in the progress of his quest to place archetypal theory on a sound scientific foundation. As a whole, *Living Archetypes* examines how archetypes are activated in the life history of all of us, how archetypal imperatives may be fulfilled or thwarted by our living circumstances, how they manifest in our dreams, symbols, fantasies, and symptoms, and how appreciating their dynamics can generate insights of enormous therapeutic power. *Living Archetypes: The Selected Works of Anthony Stevens* provides an invaluable resource for Jungian psychotherapists, psychologists, academics, and students committed to extending the evolutionary approach to psychology and psychiatry and understanding the dynamic significance of archetypes.

The Great Mother Massimiliano Gioni, Roberta Tenconi, 2015. Whether as a symbol of creativity or as a metaphor for art itself, the archetype of the mother has been a central figure in the history of art, from the Venuses of the Stone Age to the bad girls of the postfeminist era, and through centuries of religious works depicting innumerable maternity scenes. The more familiar version of Mamma has also become a stereotype closely tied to the image of Italy. In undertaking an analysis of the representation of motherhood, the catalogue *The Great Mother* will trace a history of women's empowerment, chronicling gender struggles, sexual politics, and clashes between tradition and emancipation. The volume will mix past and present, juxtaposing contemporary art, historical works, and artifacts from the world of film and literature, weaving a rich tapestry of associations and images. The volume will bring together nearly 300 colour images illustrating monographic texts and in-depth information on all the artists in the exhibition, and a collection of new essays and criticism written specifically for the occasion, by Massimiliano Gioni, Lucia Re, Adrien Sina, Ruth Hemus, Calvin Tomkins, Whitney Chadwick, Guido Tintori, Matteo Pavesi, Marco Belpoliti, Raffaella Perna, Pietro Rigolo, Lea Vergine, Barbara Casavecchia.

Archetype Anthony Stevens, 2013-04-15. Commonly dismissed as mystical by scientists, archetypes were described by Jung as biological entities which have evolved through natural selection and which, if they exist at all, must be amenable to empirical study. Anthony Stevens has discovered the key to opening up this long-ignored scientific approach to the archetype.

Paul Tillich and Psychology Terry D. Cooper, 2006. Paul Tillich, more than any other theologian of the twentieth century, maintained an energetic dialogue with psychology and especially psychotherapy. This book explores what Tillich's theology has to offer psychologists and others working in the field of mental health, spiritual development, and pastoral counseling. Tillich's interaction with Carl Rogers, Erich Fromm, Rollo May, and other famous psychologists became an important part of his thinking. Tillich frequently pushed psychologists to see the underlying

philosophical assumptions of their work This investigation of the underpinnings of psychotherapy then encouraged psychotherapists to become more aware of the ultimate questions about meaning purpose and ethics that informed their work Perhaps the greatest contribution this book offers is a careful narrative and analysis of the meetings of the New York Psychology Group which involved such figures as Tillich Fromm May Rogers Seward Hiltner Ruth Benedict and David Roberts to name just a few This important group which met from 1941 to 1945 dealt with issues that are very much with us today such as whether faith can be psychologically explained the meaning of transcendence the relationship between psychotherapy and ethics the appropriateness of self love and whether human love is parallel with Divine love **A**
