Activism and the Olympics Jules Boykoff, 2014-07-27. The Olympics have developed into the world's premier sporting event. They are simultaneously a competitive exhibition and a grand display of cooperation that bring together global cultures on ski slopes, shooting ranges, swimming pools, and track ovals. Given their scale in the modern era, the Games are a useful window for better comprehending larger cultural, social, and historical processes, argues Jules Boykoff, an academic social scientist and a former Olympic athlete. In *Activism and the Olympics*, Boykoff provides a critical overview of the Olympic industry and its political opponents in the modern era. After presenting a brief history of Olympic activism, he turns his attention to on-the-ground activism through the lens of the Vancouver 2010 Winter Olympics and the 2012 Summer Olympics in London. Here we see how anti-Olympic activists deploy a range of approaches to challenge the Olympic machine, from direct action and the seizure of public space to humor-based and online tactics. Drawing on primary evidence from myriad personal interviews with activists, journalists, civil libertarians, and Olympics organizers, Boykoff angles in on the Games from numerous vantages and viewpoints. Although modern Olympic authorities have strived, even through the Cold War era, to appear apolitical, Boykoff notes the Games have always been the site of hotly contested political actions and competing interests. During the last thirty years, as the Olympics became an economic juggernaut, they also generated numerous reactions from groups that have sought to challenge the event's triumphalism and pageantry. The 21st century has seen an increased level of activism across the world, from the Occupy Movement in the United States to the Arab Spring in the Middle East. What does this spike in dissent mean for Olympic activists as they prepare for future Games?

Beyond the Final Score Victor D. Cha, 2009. The Beijing Olympics will be remembered as the largest, most expensive, and most widely watched event of the modern Olympic era. But did China present itself as a responsible host and an emergent international power, much like Japan during the 1964 Tokyo Games and South Korea during the 1988 Seoul Games? Or was Beijing in 2008 more like Berlin in 1936, when Germany took advantage of the global spotlight to promote its political ideology at home and abroad? *Beyond the Final Score* takes an original look at the 2008 Beijing Games within the context of the politics of sport in Asia. Asian athletics are bound up with notions of national identity and nationalism, refracting political intent and the processes of globalization. For China, the Beijing

Games introduced a liberalizing ethos that its authoritative regime could ignore only at its peril Victor D Cha former director of Asian affairs for the White House evaluates Beijing s contention with this pressure considering the intense scrutiny China already faced on issues of counterproliferation global warming and free trade *Globalizing Sport* George H.

Sage,2015-11-17 Sport is enjoyed by millions of people across the world and both watching and playing sport constitutes a major part of modern leisure time But sport is also a huge worldwide industry In *Globalizing Sport* George Sage invites readers to explore a deeper understanding of the global dynamics of sport not only competitions but of the big businesses of money media coverage athletic apparel and more He shows how phenomena such as migration labour commerce and politics affect the athletes and the fans continually reshaping the business and experience of sport *Globalizing Sport* puts sport in its political economic and social context revealing its connections with businesses countries media outlets and education systems
