**The Tariff Controversy in the United States 1789-1833** Orrin Leslie Elliott, 1892      **American History** Bernard Titowsky, 1964      *The Crisis of the Middle-Class Constitution* Ganesh Sitaraman, 2018-02-06 In this original provocative contribution to the debate over economic inequality Ganesh Sitaraman argues that a strong and sizable middle class is a prerequisite for America's constitutional system For most of Western history Sitaraman argues constitutional thinkers assumed economic inequality was inevitable and inescapable and they designed governments to prevent class divisions from spilling over into class warfare The American Constitution is different Compared to Europe and the ancient world America was a society of almost unprecedented economic equality and the founding generation saw this equality as essential for the preservation of America's republic Over the next two centuries generations of Americans fought to sustain the economic preconditions for our constitutional system But today with economic and political inequality on the rise Sitaraman says Americans face a choice Will we accept rising economic inequality and risk oligarchy or will we rebuild the middle class and reclaim our republic The Crisis of the Middle Class Constitution is a tour de force of history philosophy law and politics It makes a compelling case that inequality is more than just a moral or economic problem it threatens the very core of our constitutional system      Register of Debates in Congress United States. Congress, 1833      The Constitutional and Political History of the United States: 1750-183. State sovereignty and slavery. 1877 Hermann Von Holst, 1877      *Great Debates in American History: Finance, part 2, and indexes* Marion Mills Miller, 1913      Great Debates in American History: Finance, part 2, and indexes; with Marion Mills Miller, 1913      **Lobbyists and the Making of US Tariff Policy, 1816–1861** Daniel Peart, 2018-10-01 The first book length study of lobbying prior to the Civil War Since the 2008 global economic crisis historians have embraced the challenge of making visible the invisible hand of the market This renewed interest in the politics of political economy makes it all the more timely to remind ourselves that debates over free trade and protection were just as controversial in the early United States as they have once again become and that lobbying then as now played an important part in Lincoln's government of the people by the people for the people In *Lobbyists and the Making of US Tariff Policy 1816-1861* Daniel Peart reveals how active lobbyists were in Washington throughout the antebellum era He describes how they involved themselves at every stage of the making of tariff policy from setting the congressional agenda through the writing of legislation in committee to the final vote Considering policymaking as a process Peart focuses on the importance of rules and timing the critical roles played by individual lawmakers and lobbyists and the high degree of uncertainty that characterized this formative period in American political development The debate about tariff policy Peart explains is an unbroken thread that runs throughout the pre Civil War era connecting disparate individuals and events and shaping the development of the United States in myriad ways Duties levied on imports provided the federal government with the major part of its revenue from the ratification of the Constitution to the close of the nineteenth century More controversially they

also offered protection to domestic producers against foreign competition at the expense of increased costs for consumers and the risk of retaliation from international trade partners Ultimately this book uses the tariff issue to illustrate the critical role that lobbying played within the antebellum policymaking process     **Abridgment of the Debates of Congress, from 1789 to 1856: Dec. 4, 1843-June 18, 1846** United States. Irwin, 2017-11-29 A Foreign Affairs Best Book of the Year Tells the history of American trade policy A grand narrative that also debunks trade policy myths Economist Should the United States be open to commerce with other countries or should it protect domestic industries from foreign competition This question has been the source of bitter political conflict throughout American history Such conflict was inevitable James Madison argued in the Federalist Papers because trade policy involves clashing economic interests The struggle between the winners and losers from trade has always been fierce because dollars and jobs are at stake depending on what policy is chosen some industries farmers and workers will prosper while others will suffer Douglas A Irwin s *Clashing over Commerce* is the most authoritative and comprehensive history of US trade policy to date offering a clear picture of the various economic and political forces that have shaped it From the start trade policy divided the nation first when Thomas Jefferson declared an embargo on all foreign trade and then when South Carolina threatened to secede from the Union over excessive taxes on imports The Civil War saw a shift toward protectionism which then came under constant political attack Then controversy over the Smoot Hawley tariff during the Great Depression led to a policy shift toward freer trade involving trade agreements that eventually produced the World Trade Organization Irwin makes sense of this turbulent history by showing how different economic interests tend to be grouped geographically meaning that every proposed policy change found ready champions and opponents in Congress Deeply researched and rich with insight and detail *Clashing over Commerce* provides valuable and enduring insights into US trade policy past and present Combines scholarly analysis with a historian s eye for trends and colorful details readable and illuminating for the trade expert and for all Americans wanting a deeper understanding of America s evolving role in the global economy National Review Magisterial Foreign Affairs
