social practice The law of gifts is well developed both in the civil and the common laws Richard Hyland s study provides an excellent view of the ways in which different civil and common law jurisdictions confront common issues The legal systems discussed include principally in the common law those of Great Britain the United States and India and in the civil law the private law systems of Belgium and France Germany Italy and Spain Professor Hyland also serves a critique of the dominant method in the field which is a form of functionalism based on what is called the praesumptio similitudinis namely the axiom that once legal doctrine is stripped away developed legal systems tend to reach similar practical results His study demonstrates to the contrary that legal systems actually differ not only in their approach and conceptual structure but just as much in the results
