The Larcom Review Fall Winter 1999

**United States. Congress. House.
Committee on the Judiciary.
Subcommittee on the Constitution**

The Larcom Review Fall Winter 1999:

Vermont Magazine ,2001 *Housicwhissick Blue* Iris D. Gomez,2003 These poems address the great sweep of history and prehistory contained in a few thousand acres of preserved land near the author s home Time becomes transparent in her poems which see through the present day landscape to its geologic origins to its earliest settlers who crossed the northern land mass from Siberia to their descendants the Massachuset and to later settlers *Poets & Writers* ,1999 **Defending Marriage** United States. Congress. House. Committee on the Judiciary. Subcommittee on the Constitution,2011 *There Is Power in a Union* Philip Dray,2011-09-20 From the nineteenth century textile mills of Lowell Massachusetts to the triumph of unions in the twentieth century and their waning influence today the contest between labor and capital for the American bounty has shaped our national experience In this stirring new history Philip Dray shows us the vital accomplishments of organized labor and illuminates its central role in our social political economic and cultural evolution His epic character driven narrative not only restores to our collective memory the indelible story of American labor it also demonstrates the importance of the fight for fairness and economic democracy and why that effort remains so urgent today **Writings on New England History** ,2003 *College Crime* R. Barri Flowers,2009-10-05 This book examines the breadth of serious criminality and victimization occurring on college and university campuses across the United States placing special emphasis on sexual assault dating violence stalking hate crime and murder The book also provides several victim resources and a guide to laws relevant to the prevention and deterrence of on campus crime Provided by publisher *Organizational Behaviour* Nancy Langton,Stephen P. Robbins,2007 **A Stitch in Time** Aimee E. Newell,2014-03-15 Drawing from 167 examples of decorative needlework primarily samplers and quilts from 114 collections across the United States made by individual women aged forty years and over between 1820 and 1860 this exquisitely illustrated book explores how women experienced social and cultural change in antebellum America The book is filled with individual examples stories and over eighty fine color photographs that illuminate the role that samplers and needlework played in the culture of the time For example in October 1852 Amy Fiske 1785 1859 of Sturbridge Massachusetts stitched a sampler But she was not a schoolgirl making a sampler to learn her letters Instead as she explained The above is what I have taken from my sampler that I wrought when I was nine years old It was w rough t on fine cloth and it tattered to pieces My age at this time is 66 years Situated at the intersection of women s history material culture study and the history of aging this book brings together objects diaries letters portraits and prescriptive literature to consider how middle class American women experienced the aging process Chapters explore the physical and mental effects of old age on antebellum women and their needlework technological developments related to needlework during the antebellum period and the tensions that arose from the increased mechanization of textile production and how gift needlework functioned among friends and family members Far from being solely decorative ornaments or functional household textiles these samplers and quilts served their own ends They offered

aging women a means of coping of sharing and of expressing themselves These threads of time provide a valuable and revealing source for the lives of mature antebellum women Publication of this book was made possible in part through generous funding from the Coby Foundation Ltd and from the Quilters Guild of Dallas Helena Hibbs Endowment Fund

Communities of Science in Nineteenth-Century Ireland Juliana Adelman, 2016-09-12 The nineteenth century was an important period for both the proliferation of popular science and for the demarcation of a group of professionals that we now term scientists Of course for Ireland largely in contrast to the rest of Britain the prominence of Catholicism posed various philosophical questions regarding research Adelman s study examines the practical educational impact of the growth of science in these communities and the impact of this on the country s economy the role of museums and exhibitions in spreading scientific knowledge and the role that science had to play in Ireland s turbulent political context Adelman challenges historians to reassess the relationship between science and society showing that the unique situation in Victorian Ireland can nonetheless have important implications for wider European interpretations of the development of this relationship during a period of significant change
