 Whitby,2021-12-22 Almost all mechanical devices used in every industry require lubrication Lubricant Analysis and Condition
 Monitoring explains the benefits of identifying planning implementing and using lubricant and machine condition monitoring
 programmes to extend the lifetimes of both lubricants and machines to achieve maximum productivity and profitability while
 reducing impacts on waste and the environment This book Offers a comprehensive overview of all types of tests used in
 lubricant condition monitoring programmes Discusses monitoring the condition of all types of components machines
 equipment and systems used in all industries Considers new and emerging machines equipment and systems including
 electric and hybrid vehicles Suggests which tests to use for each type of machine equipment or system and just as
 importantly which tests not to use Provides practical examples of how to set up run and manage condition monitoring
 programmes and how to achieve significant cost savings through planned and predictive maintenance schedules Gathering
 vital information that users of lubricants need in one place this book is of practical use to mechanical maintenance
