Re-Reading Pareto on Elite Power and Societal Bipolarisation Alasdair J. Marshall,2025-08-22 Assessing Vilfredo Pareto s sociological reworkings of Machiavelli s Fox and Lion animal spirits as friend enemy codings this book offers a unique insight into the growing division today between relatively liberal elites and relatively conservative non elites Re Reading Pareto on Elite Power and Societal Bipolarisation utilises key ideas common to Pareto s elite theory general sociology and theory of demagogic plutocracy and fleshes out a unique perspective for making sense of contemporary societal bipolarisation in terms of friend enemy codings The first part of the book explores what Pareto s core ideas are and outlines why they matter today The second part considers how we might elaborate and apply Pareto s concept of open elites to reverse contemporary societal bipolarisation and build safer and more mature democracies The third part explains how we can apply Pareto to predict further deterioration towards fundamental social conflict such that Pareto s sociological imagination becomes risk imagination we desperately need today For academics and students

across the domains of sociology political science and social science in general the book warns of widespread elite institutional bias in their research and points to Pareto's neutral and balanced approach as a corrective offering a uniquely Paretian view of minimal criteria for democracy as well as a uniquely balanced analytical perspective for making sense of our culture war

New Research on Early Childhood Education Arthur T. Waddell, Rachel M. McBride, 2008 Early Childhood Education spans the human life from birth to age 8 Infants and toddlers experience life more holistically than any other age group Social emotional cognitive language and physical lessons are not learned separately by very young children Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience not just that part of the experience to which the adult gives attention Although early childhood education does not have to occur in the absence of the parent or primary caregiver this term is sometimes used to denote education by someone other than these the parent or primary caregiver Both research in the field and early childhood educators view the parents as an integral part of the early childhood education process Early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent Other terms those are often used interchangeably with early childhood education are early childhood learning early care and early education Much of the first two years of life are spent in the creation of a child's first sense of self or the building of a first identity Because this is a crucial part of children's makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy If care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience This book presents the latest research in this vital field
