**Greenland** Martin Vahl, Georg Carl Amdrup, Louis Bobé, Adolf Severin Jensen, 1928 Vol 1 The discovery of Greenland exploration and nature of the country The Icelandic Colonization of Greenland and the Finding of Vineland Daniel Bruun, 1918 The Flora of Disko Island and the Adjacent Coast of West Greenland from 66°-71° N. Lat Daniel Bruun, Morten Pedersen Porsild, 1918 **Phasing Out the Colonial Status of Greenland, 1945-54** Jens Elo Rytter, 2010 With the Constitution of 1953 the colonial status of Greenland came to an end and Greenlanders were granted equal rights as citizens within the Danish realm In 1954 this new arrangement was supported by the UN General Assembly The decision to change Greenland's status was conditioned both by internal and external circumstances In the UN context Danes increasingly felt the strain of being a colonial power and they feared the possibility of future UN interference in Greenlandic affairs The History of Greenland Finn Gad, 1973-01-01 Translation of the Danish edition *Gronlands Historie* II 1770 1782 published by Nyt Nordisk Forlag Arnold Busck 1969 Denmark-Greenland in the Twentieth Century Axel Kjær Sørensen, 2007-11-05 This book traces Danish Greenlandic relations in the period 1900 2000 The main trend is the development from a colonial situation in 1900 with a state owned company running nearly all business to an open economy with steadily growing self

government for Greenland short of full independence The Danish policy can be described as benevolent but financially the budget was tight until after the second World War the philosophy being that Denmark should neither lose nor gain After the war there was heavy investment to bring Greenland nearer to standards of living comparable to Denmark and substantial subsidies were given make that happen The Greenlanders attitude towards Denmark developed along lines familiar from other examples of decolonisation The first phase of accepting the coloniser was long over now seeking equality with the coloniser was the main aim in their endeavours From 1911 two provincial councils voiced speaking the Greenlanders views and their political influence steadily grew In 1953 Greenland got representation in the Danish parliament The third phase of doing without the coloniser began in the early 1970s when Greenlanders sought home rule status obtained in 1979 In the following twenty years the Home Rule Authority gradually took over nearly all lawmaking and administration and from 2004 a committee has explored ways of giving Greenland a more independent voice in foreign affairs In 2003 the ultimate goal was declared to be full independence

The Distribution of Ten-meter Snow Temperatures on the Greenland Ice Sheet Steven J. Mock, W. F. Weeks, Wilford F. Weeks, 1965 All available 10 m snow temperatures from the Greenland ice sheet have been collected and analyzed using multiple regression techniques to develop equations capable of accurately predicting these temperatures The resulting equations show that 10 m snow temperatures in north Greenland and its sub areas can be accurately predicted from the independent parameters latitude and elevation Longitude was found to be another significant parameter in south Greenland In all cases the values of the multiple correlation coefficients were 928 or greater Gradients of 10 m snow temperatures vs elevation for north Greenland are close to the dry adiabatic lapse rate indicating adiabatic warming of katabatic winds as the controlling mechanism in the altitudinal distribution of both mean annual air temperatures and 10 m snow temperatures in dry snow The data also suggest that south Greenland is colder with respect to its latitude and longitude than north Greenland An isotherm contour map showing the distribution of 10 m snow temperatures on the Greenland ice sheet calculated from the prediction equations was prepared A tabulation of the elevations and sources as well as brief studies of Marie Byrd Land and Victoria Land in the Antarctic are included Author *The Breeding Biology of the Greenland White-fronted Goose (Anser Albifrons Flavirostris)* , Stratigraphic Studies in the Snow and Firn of the Greenland Ice Sheet Carl S. Benson, 1962 Summary results of fieldwork conducted in Greenland between 1952 and 1955 146 pit studies and 288 profiles were made Temperature density ram hardness and grain size were measured and the results are discussed in detail **The Greenland Caledonides** A. K. Higgins, Jane A. Gilotti, M. Paul Smith, 2008 Accompanying CD ROM contains fold col map entitled in both formats Caledonian orogen East Greenland 70 N 82 N Geological map 1:1 000 000 The Greenland Dilemma Martin Breum, 2015-05-20 This book is about Greenland's rapidly changing role in the world and about its complex connections to Denmark its former colonizer It is about Greenland's possible secession from the Kingdom of Denmark oil uranium and the difficulties that Greenlanders and Danes often have when they try to talk about

their common past and Greenland's place in the new global future. The first part of this book builds on my travels and encounters with Greenland's politicians, fishermen, schoolteachers and intellectuals including my old classmate from Maniitsoq who became a very wise vicar in her hometown and now appears in chapter 3. Through all these conversations I learned just how dramatic the present wave of changes in Greenland are. Never before did I understand just how complex the desire for increased independence is or how dramatic the clashes between old and new are or how volcanic the debate over which path to choose for the future can be. An insight into these local discussions is surely a prerequisite if one wants to understand the broader discussion about Greenland's future relations to Denmark and its changing role in the world. The second part deals with hard core politics about mining and oil and about the rest of the world's including China's interest in Greenland's oil, gas, uranium, rare earths, gold and other riches. This part of the book grapples with the political fights in Greenland and with the power struggles between Denmark and Greenland over resources, foreign policy and identity. Legally for half a century Greenland has been part of the Kingdom of Denmark but also increasingly a very self-conscious one of the sort. My observations flow from my work as a journalist in Greenland and Denmark over the past years where I worked for the Danish Broadcasting Corporation and other media outlets. I am Danish. I lived only two years in Greenland as a teenager but I have come there often in later years. My errand is not to forward any opinion on Greenland's position as a part of the Danish realm nor do I pass judgment on the popular vision of future secession. If anything I hope to throw light on the complexities involved and to encourage more people to take part in this important debate by providing detail, real human beings, facts and observations from places that would for most people outside Greenland be somewhat cumbersome to reach.

Hogue, 1964 *The Greenland Mountain Birch Zone, Southwest Greenland* , *Structure and Development of the Greenland-Scotland Ridge* Martin H. P. Bott, Svend Saxov, Manik Talwani, Jörn Thiede, 2013-11-11. A group of geoscientists from a number of NATO countries met under NATO sponsorship in Copenhagen on February 27 and 28 1978 and formulated a proposal entitled EVOLUTION OF THE GREENLAND ICELAND FAEROE SCOTLAND RIDGE A KEY AREA IN MARINE GEOSCIENCE. This part of the North Atlantic Ocean is of particular interest because of its anomalously shallow bathymetry which has profoundly influenced many aspects of the evolution of the North Atlantic. The proposed investigations therefore aim to study the deep crustal structure including relationship of continental and oceanic crust, history of subsidence of the ridge including its past role as a land bridge, age of the oceanic basement along it and its history of formation and the influence of the ridge on Tertiary and Quaternary depositional palaeoenvironments. In furtherance of this proposal it is intended to carry out a series of seismic and drilling operations on the Ridge during the coming years. These major marine investigations will be mainly funded from national sources. An important preliminary stage to the project is the collection and synthesis of available data. NATO has already approved a small budget for this purpose which has enabled a geoscientist to

work partly at the Department of Geological Sciences of Durham University UK and partly at Lamont Doherty Geological Observatory of Columbia University Palisades USA for about six months to compile the data The most important map showing magnetic anomalies and lineations in the area is included in a pocket at the back of this volume *The Greenland Caribou - Zoogeography, Taxonomy, and Population Dynamics* Morten Meldgaard, 1986 The Greenland Entomofauna Jens Böcher, N.P.
