The Language Of The Self The Function Of Language In Psychoanalysis:

The Language of the Self Jacques Lacan, 1981 Lacan's commentaries on Freud had revolutionary implications for philosophy and literary criticism. He held that if the unconscious exists it functions linguistically rather than symbolically. Includes a study that explains his work and relates it to the context of contemporary thought.

The Language of the Self Jacques Lacan, 1997-12-17 Jacques Lacan's commentaries on Freud had revolutionary implications not only for the analytic movement but also for contemporary philosophy and literary criticism. Lacan held that if the unconscious as Freud described it exists it functions linguistically rather than symbolically or instinctually. He refers to the unconscious as a language the discourse of the Other. In *The Language of the Self* Lacan offers a significant and fertile return to the heart of the Freudian texts. Originally published in paperback under the title *Speech and Language in Psychoanalysis* this book is based on Anthony Wilden's translation of *Fonction et champ de la parole et du langage en psychanalyse* a 1953 article that became a manifesto for a generation interested in a new reading of Freud. Wilden expands and amplifies the text with extensive notes and a commentary that places Lacan's work in the context of contemporary thought.

The Fate of the Self Stanley Corngold, 1994 Much recent critical theory has dismissed or failed to take seriously the question of the self. French theorists such as Derrida, Barthes, Benveniste, Foucault, Lacan, and Lévi Strauss have in various ways proclaimed the death of the subject, often turning to German intellectual tradition to authorize their views. Stanley Corngold's heralded book *The Fate of the Self* published for the first time in paperback with a spirited new preface appears at a time when the relationship between the self and literature is a matter of renewed concern. Originally published in 1986, Columbia University Press, the book examines the poetic self of German intellectual tradition in light of recent French and American critical theory. Focusing on seven major German writers: Hölderlin, Dilthey, Nietzsche, Mann, Kafka, Freud, and Heidegger, Corngold shows that their work does not support the desire to discredit the self as an origin of meaning and value but reconstructs the allegedly fragmented poetic self through effects of position and style. Offering new and subtle models of selfhood, *The Fate of the Self* is a source of rich insight into the work of these authors refracted through poststructuralist critical perspectives.

The Ludic Self in Seventeenth-Century English Literature Anna K. Nardo, 1991-09-03 This book argues that play offered Hamlet, John Donne, George Herbert, Andrew Marvell, Robert Burton, and Sir Thomas Browne a way to live within the contradictions and conflicts of late Renaissance life by providing a new stance for the self. Grounding its argument in recent theories of play and in a historical analysis that sees the seventeenth century as a point of crisis in the formation of the western self, the author demonstrates how play helped mediate this crisis and how central texts of the period enact this mediation.
