Success and Failure in Arms Control Negotiations April Carter, 1989 Governments have been negotiating about disarmament or more limited forms of arms control for forty years Despite these negotiations weapons of increasing deadliness and sophistication continue to be developed Through the use of case studies of particular negotiations Partial and Comprehensive Test Ban SALT I and II INF and START and MBFR CFE the book explores both the reasons for success and the obstacles leading to failure and assesses the importance of different types of explanation Dr Carter not only analyses the reasons why negotiations fail she also examines the conditions under which they are likely to succeed The result is a balanced comprehensive treatment of the problems and prospects for arms control Rising India and China B. R. Deepak, 2025-03-31 This book part of a two volume exploration examines the trajectory of Sino Indian relations spanning from the aftermath of 1962 war in the Himalayas to the growing rivalries in the Indo Pacific It scrutinizes the decade long diplomatic freeze post 1962 analysing China's propaganda collusion with Pakistan and supporting insurgency in India's northeast It delves into the rebalancing approaches starting from Rajiv Gandhi's pivotal 1988 China visit to finding an equilibrium with China and then losing it after three decades owing to widening asymmetries with China resulting in the crisis of confidence building and a prolonged military standoff in the Western Sector in the aftermath of the Galwan face off Furthermore it explores the Indian choices for finding a new equilibrium with China navigating China's discourse on the Indo Pacific strategy India's equations with major powers and makes enquiries into China's military modernization and implications to India in a complex security environment influenced by internal and external factors

The Soviet Defence Enigma Carl G. Jacobsen,1987 Realistic appraisal of Soviet defence efforts is crucial to strategic planning and foreign policy analysis Since Soviet defence expenditure figures are incomplete however our knowledge in this area is extremely limited This study reviews the state of current knowledge in this field and presents a critical review of the nature and limitation of traditional approaches The contributors analyse newly available sources of economic scientific and technical military information and conclude with an in depth consideration of the relevance and impact of historical and cultural influences on current Russian Soviet military strategy There emerges a fascinating account which both extends our knowledge and understanding and sheds light on what is perhaps the single most important unknown in the study of international affairs and defence needs

Combating Weapons of Mass Destruction Nathan E. Busch,Daniel Joyner,2009-01-01 The spread of weapons of mass destruction poses one of the greatest threats to international peace and security in modern times the specter of nuclear chemical and biological weapons looms over relations among many countries The September 11 tragedy and other terrorist attacks have been painful warnings about gaps in nonproliferation policies and regimes specifically with regard to nonstate actors In this volume experts in nonproliferation studies examine challenges faced by the international community and propose directions for national and international policy making and lawmaking The first group of essays outlines the primary threats posed by WMD proliferation and terrorism Essays in the second section analyze existing treaties and other normative regimes including the Nuclear Non Proliferation Treaty and the Chemical Weapons and Biological Weapons Conventions and recommend ways to address the challenges to their effectiveness Essays in part three examine the shift some states have made away from nonproliferation treaties and regimes toward more forceful and proactive policies of counterproliferation such as the Proliferation Security Initiative which coordinates efforts to search and seize suspect shipments of WMD related materials

Ideas and Armaments David M. Schwam-Baird,1997 In the short space of 20 years Brazil emerged from relative technological backwardness to become a major exporter of tanks rockets and aircraft This book examines the various

ideologies strategies and conflicts of Brazil's military leaders of the period that lay behind this phenomenon Building upon two schools of thought this book explains the phenomenal emergence of the Brazilian arms industry The first school of thought attributes its success to the implementation of the National Security Doctrine by many of Brazil's leading officers The other attributes the success to the pursuit of the corporate interests of the military A discussion both of the articulated ideology found in the National Security Doctrine and the corporate ideology of the Brazilian military set against the development of governmental policy and factional in fighting among groups of officers will reveal that neither of these theories alone provide an adequate explanation A third element the corporate ideology of the civilian technicos must also be taken into account

Public Opinion and Internationalized Governance Oskar Niedermayer, Richard Sinnott, 1998 New agencies of international government are among the most innovative and experimental aspects of late 20th century politics This study examines the European Union its structure powers operations and legitimacy and its relationship to the United Nations and NATO

Building Global Security Through Cooperation Joseph Rotblat, John P. Holdren, 2012-12-06 1989 was by any standards an extraordinary year the year in which the Cold War ended However although much has changed much remains unresolved or not changed at all Even though the rationale for the huge military forces has been removed from the East West relationship these forces still retain a tremendous potential to do harm Moreover threats to peace may grow along North South and South South axes An example of such a threat is the rapid growth in size and sophistication of military arsenals in the South The contributions to this volume make it clear that the problems of East and West North and South are intertwined Security can be gained only through cooperation The contributors who come from widely differing geographical cultural and political backgrounds all share the Pugwash tradition of scientific objectivity

Arms Transfers and Dependence Christian Catrina, 2021-10-23 First published in 1988 *Arms Transfers and Dependence* was written to provide a view of arms transfers in the context of the global distribution of power The book analyses different types of dependence and is focused on comparing the enhancement of military capabilities as a result of arms transfers with the dependence that may be caused by those transfers In doing so it provides an overview of how particular structures of imports and exports of arms lead to dependence

Military Technology, Armaments Dynamics and Disarmament Hans Gunter Brauch, 1989-01-13

China's Military Procurement in the Reform Era Yoram Evron, 2015-06-26 The decisions that shape the policy of weapons procurement are an important area of national security policy This is all the more true for China which during recent decades has vacillated between different sources and directions of military build up This book explores the politics of military procurement in China under the successive leaderships of Deng Xiaoping Jiang Zemin and Hu Jintao It shows how China's political and military leaders have sought to adjust military procurement policy to meet China's strategic objectives to relate it to non military needs to strike a balance between the import of weapons and indigenous production and to determine the connections between hardware and other components of military power Exploring in detail five major shifts in the nation's

military procurement it traces the considerations and negotiations among China's civilian and military leaderships. By doing so it offers both a conceptual framework and empirical grounds for evaluating the factors that shape China's military procurement directions as well as their limitations, prospects and operational implications. As the first book to study comprehensively and systematically the attributes shaping China's military procurement it will be of great interest to students and scholars of Chinese politics, Chinese history and military and strategic studies. **Arms and Artificial**

Intelligence Stockholm International Peace Research Institute, 1987. The impact of information technology in the field of military decision making is superficially less visible than that of a number of other weapon developments though its importance has grown steadily since the beginning of the 1980s. Owing to its potential role in modern weapon systems and the prospect of its inclusion as an essential ingredient in many military projects such as the Strategic Defence Initiative it has become the focus of special interest and efforts. This book is the first attempt to present a broad overview of the prospects for information technology in general and machine intelligence in particular in the context of international security. The dangers and promises of weapon and arms control applications of computers and artificial intelligence to decision making processes are analysed in a technical, strategic and political perspective by experts from six different countries. In an introductory chapter Allan Din presents a generic overview of artificial intelligence and its prospects. Thirteen contributors then discuss the conceptual and technical framework of artificial intelligence, analyse implications for weapon systems and strategy and discuss possible applications to arms control, verification and modelling. *Studies in Economics and Russia* Alec

Nove, 1990-06-18. A collection of papers reflecting a wide range of thought from the history of Russian economic thought to the possible ramifications of changes in contemporary Soviet economic policy with respect to the problems created by a functioning capitalist style market. *Restructuring of Arms Production in Western Europe* Stockholm International Peace

Research Institute, 1992. Profound changes are occurring in the structure of arms production in Western Europe. Concentration is increasing at a fast pace. Small producers are disappearing and even large ones are opting out of the market. The various national arms industries long operating in protective environments are rapidly internationalizing. Three factors combine to bring about this change: East-West detente, the creation of the Single European Market and the constant pressure of increasingly complex technology. In this book experts describe how the framework for producing arms in Western Europe is altered and how various actors—firms, governments and trade unions—are adapting to the new situation. The book presents detailed analyses of all the arms producing countries in Western Europe. In addition to describing recent changes the authors speculate on the implications of these for the balance of power in Western Europe, the relations between Western Europe and the United States, arms exports to the Third World and problems of converting from military to civilian production. The appendices include the SIPRI list of the 50 largest arms producing companies in Western Europe, data on mergers and acquisitions, procurement expenditure and exports of major weapons, selections from treaties and other official documents.

relevant to current and future regulation of West European arms production and a select bibliography *National Security Issues of the USSR* Murray Feshbach, 2012-12-06 LORD CARRINGTON Secretary General North Atlantic Treaty Organisation

In providing a foreword to this volume I have to declare an interest I was and am still an enthusiastic advocate of the idea of having a resident Sovietologist at NATO headquarters Indeed I wondered how the work of the organisation had been done for so long without the benefit of a resident expert on a subject of such crucial interest I was therefore delighted when an American academic of high reputation Murray Feshbach joined us as our first Sovietologist I was also encouraged that he decided to organise last November a Workshop in which NATO staff could take part and which would attract prestigious participants from all the countries of this alliance I saw for myself the high level of interest created by the Workshop and judge it to have a very considerable success I hope there will be other similar events in the future There is no doubt that in the light of the series of developments and changes launched over recent months by Mr
