Sixth Workshop on Grand Unification Serge Rudaz, Thomas F. Walsh, 1986 *Sixth Workshop on Grand Unification*, 1986 **Workshop on Grand Unification**, 1985 *Sixth Workshop on Grand Unification* Serge Rudaz, Thomas F. Walsh, 1986 **First Workshop on Grand Unification** FRAMPTON, 2012-12-06 This workshop held at the New England Center provided a timely opportunity for over 100 participants to gather in a unique environment and discuss the present status of the unification of strong and electroweak forces One reason for the timeliness was perhaps that experiments of the seventies had already lent confirmation to the separate theories of strong and of electroweak forces so that for the eighties it now seems especially compelling to attempt the grand unification of these two forces Also the planned experiments to search for proton decay and the new experiments which are suggestive though not yet conclusive of non zero neutrino rest masses add further stimulus to the theory Thus the workshop provided an ideal forum for exchange of ideas amongst active physicists The presentations at the workshop covered the present status of both theory and experiment with a strong interplay Also there were presentations from the discipline of astrophysics which is becoming very intertwined with that of high energy physics especially when in the latter one is addressing energies and temperatures that were extant only in the first nanosecond of the universe On experiment we heard a comprehensive coverage of the four United States proton decay experiments The Brookhaven Irvine Michigan experiment in the Morton Salt Mine at Fairport Harbor Ohio was discussed by LARRY SULAK while DAVID WINN talked on the Harvard Purdue Wisconsin effort in the Silver King Mine Utah MARVIN MARSHAK and RICHARD STEINBERG described respectively the Soudan Mine Minnesot and the Homestake Mine South Dakot experiments *Third Workshop on Grand Unification* P.H. Frampton, S.L. Glashow, H. Van Dam, 2012-12-06 This workshop held at the University of North Carolina was in the series which started with meetings in the University of New Hampshire April 1980 and the University of Michigan April 1981 More than one hundred participants congregated in the Carolina Inn in April 1982 to discuss the status of grand unified theories and their connection to experiment The spring foliage of Chapel Hill provided a beautiful back drop to this Third Workshop on Grand Unification As mentioned in the first talk herein these three workshops have heard of indications respectively of neutrino oscillations proton decay and a magnetic monopole Since all three experimental reports remain unconfirmed grand unifiers must wait expectantly and patiently These proceedings preserve faithfully the ordering of the workshop talks which followed the tradition of alternation between theory and experiment Only our introduction will segregate them The experimental presentations mainly concerned proton decay and massive neutrinos Four U S proton decay experiments were reported the Brookhaven Irvine Michigan experiment in the Morton Salt Mine at Fairport Harbor Ohio was described by WILLIAM KROPP and ROBERT MORSE represented the Harvard Purdue Wisconsin group in the Silver King Mine Utah The Homestake Mine South Dakota and Soudan Mine Minnesota experiments were reported respectively by RICHARD STEINBERG and DAVID AYRES the latter providing also a survey of

future U S experiments *Fourth Workshop on Grand Unification* LANGACKER,STEINHARDT,WELDON,2013-03-14 It has been sixteen years since the unification of electro Magnetism with the weak interactions was developed by Glashow Salam and Weinberg Well before that proposal was fully confirmed by experiment work began on unifying strong interactions with the electroweak Now there is a growing effort to incorporate some theory of quantum gravity into the scheme This enormous complex of theoreti cal and experimental efforts was the subject of the Fourth Workshop on Grand Unification held in Philadelphia and attended by over two hundred physicists During the workshop experimental and theoretical talks alternated as shown by the program summary on page 409 However to display the logical scope of the workshop the proceedings are organized into five subject areas Howard Georgi opened the workshop with a keynote address in which he reminds us of some of the simple properties of the particle spectrum that have not yet been understood The first subject area and also the largest is proton decay and underground physics This is introduced by Jill iam r1arciano s review of the SU 5 predictions with particular attention paid to the theoretical uncertainties Spokesmen for the major underground experiments present current results on proton decay nn oscillations and magnetic monopole flux B V Sreekantan for the Kolar gold field experiment after 1 9 years of operation Earl Peterson for the Soudan detector after 0 55 years and Bruce Cortez for the rr lB detector after 0 22 years **Proceedings of the Sixth Workshop on Non-Perturbative QCD** Herbert Martin Fried,2002 This volume is devoted to different facets of QCD stressing non perturbative analytic and lattice formulations scattering solutions and approximations and the understanding of recent RHIC experiments It discusses ideas of the fifth dimension originating in brane theory as well as possible experimental tests and predictions of those ideas Proceedings of the Sixth International Workshop on Relativistic Aspects of Nuclear Physics Takeshi Kodama,2001 This volume deals mainly with physics related to the RHIC It contains one of the first reports on the results of RHIC experiments **Identification Of Dark Matter, The - Proceedings Of The Sixth International Workshop** Minos Axenides,George Fanourakis,Ioannis John Demetrius Vergados,2007-08-31 This volume is the latest in a prominent biannual series of scientific meetings on the exciting research topics of dark matter and more recently of dark energy It contains a state of the art update on detection efforts by experimental groups around the world trying to pin down exotic new forms of matter under the names of axions neutralinos wimps primordial black holes q balls sterile neutrinos as well as a tantalizing new form of dark energy component called phantom energy and quintessence The book is self contained as it also includes general reviews on recent cosmological observations supernovae measurements cosmic matter distribution surveys and cosmic radiation anisotropies introducing even the uninitiated reader to this fascinating frontier of research **The Sixth Workshop on Hot Topics in Operating Systems** ,1997 Annotation What are the hot topics in operating systems The contributors adequately answer this begged question in 23 papers from the May 1997 workshop presenting in part experiences with the development of a mircokernal based multi server operating system practical tools for OS implementors a review of reusable components for OS

Physics and Astrophysics of Neutrinos Masataka Fukugita, Atsuto Suzuki, 2013-12-14 Observations of neutrinos being emitted by the supernova SN1987A star neutrinos and atmospheric neutrinos by means of underground detectors have provided new insights into astronomy These observations have brought to light new unresolved phenomena such as the solar neutrino problem spurring investigative studies among particle physicists and astrophysicists Today intense interaction and continual cooperation between specialists in the field of particle physics and astronomy cosmology are a pre requisite for conducting further studies This book provides detailed elaborations on selected topics One of the most important features of this book is its enumeration of a number of basic properties of neutrinos and their relationship to Grand Unified Theories It does not cover all aspects of neutrino theory but rather focuses on the origin of the neutrino s mass and the generation mixing of neutrinos The neutrino experiments described were carried out mainly by Japanese researchers All the kamiokande results detector performances and complete references are included Experiments regarding the neutrino s mass are represented in the direct mass measurement the double beta decay experiment and the neutrino oscillation experiment The detection of low energy astrophysical neutrinos is discussed Particle acceleration mechanisms in astrophysics and the detection of high energy gamma rays and neutrinos are also represented
