Sixties In Bristol:

The Sixties in Bristol James Belsey,1989 *Youth Culture in Modern Britain, c.1920-c.1970* David Fowler,2008-09-30
This book traces the history of youth culture from its origins among the student communities of inter war Britain to the more familiar world of youth communities and pop culture Grounded in extensive original research it explores the individuals institutions and ideas that have shaped youth culture over much of the twentieth century **Westland and the British Helicopter Industry, 1945-1960** Matthew R.H. Uttley,2014-05-22 This study explains how Westland dominated British helicopter production and why government funding and support failed to generate competitive all British alternatives In doing so the book evaluates broader historiographic assumptions about the purported failure of british aircraft procurement during the early post war period and considers the scope and limitations of licensed production as a government mandated procurement strategy **Sixty Years of Airfix Models** Jeremy Brook,2015-06-30 The best known and most important manufacturer of plastic model kits in the UK Airfix has been at the forefront of the industry since 1955 when the first Airfix aircraft kit appeared in UK branches of Woolworth s The kits were made to a constant scale and covered a wide variety of subjects from aircraft to birds and from tanks to dinosaurs In 1981 the famous London based company closed down and only the kits survived intact For the next twenty five years Airfix was run by Palitoy and later Humbrol but suffered from a lack of investment In 2006 Hornby Hobbies Ltd the train and Scalextric manufacturer bought the ailing company and transformed it Money and resources were ploughed into the range and today Airfix releases around twenty new kits per year designed to an incredibly high standard The old kits of the 1950s and 1960s are gradually being replaced by new state of the art tooling all bearing that most prestigious name Airfix Published to coincide with the sixtieth anniversary of the first Airfix aircraft kit *Sixty Years of Airfix Models* tells the full story year by year of the company and its products Illustrated throughout with colour photographs of kits box art and completed models *Sixty Years of Music* Edward Algernon Baughan,1897

arises from this process It is only in the last 10 years that the much more far reaching potential of double beta decay has been discovered Today the potential of double beta decay includes a broad range of topics that are equally relevant to particle physics and astrophysics such as masses of heavy neutrinos of sneutrinos as SUSY models compositeness leptoquarks left right symmetric models and tests of Lorentz symmetry and equivalence principle in the neutrino sector Double beta decay has become indispensable nowadays for solving the problem of the neutrino mass spectrum and the structure of the neutrino mass matrix together with present and future solar and atmospheric neutrino oscillation experiments Some future double beta experiments like GENIUS will be capable to be simultaneously neutrino observatories for double beta decay and low energy solar neutrinos and observatories for cold dark matter of ultimate sensitivity This invaluable book outlines the development of double beta research from its beginnings until its most recent achievements and also presents the outlook for its highly exciting future Contents Double Beta Decay OCo Historical Retrospective and Perspectives Original Articles From the Early Days until the Gauge Theory Era The Nuclear Physics Side OCo Nuclear Matrix Elements The Nuclear Physics Side OCo Nuclear Matrix Elements Effective Neutrino Masses from Double Beta Decay Neutrino Mass Models and Cosmological Parameters OCo Present Status and Prospects Other Beyond Standard Model Physics From SUSY and Leptoquarks to Compositeness and Quantum Foam The Experimental Race From the Late Eighties to the Future The Future of Double Beta Decay Appendices Ten Years of Heidelberg OCo Moscow Experiment The Potential Future OCo GENIUS Readership Particle physicists nuclear physicists and astrophysicists
