Crop Circles for Beginners Harry Eilenstein, 2021-06-14 Since about 1985 crop circles have become a more well known phenomenon In the meantime about 10 000 crop circles have appeared in more than 50 countries However well over half of them come from southern England in the area of Stonehenge Woodhenge Silbury Hill White Horse and other prehistoric monuments Some of them can be proved to have been made by humans but others just as certainly have not been made by humans this is not the starting situation one would wish for as a researcher In the present book 300 of these crop circles are examined more closely It turns out that they contain approx 100 elements which appear in many crop circles Their geometrical form has an easily recognizable meaning Therefore with the help of these words the crop circles composed of them can be read like sentences The meaning is almost always the same a representation of how individuality unfolds Therefore there are many similarities with astrology or the chakra system for example This analytical approach is complemented by 50 dream journeys into individual crop circles which makes the picture that arises from the analytical observation of the crop circles even more rounded Thereby a first impression can be gained of the language of the collective subconsciousness which words and which grammar it uses It is a music of geometry
