Social Changes in China Yi Zhang, 2024-04-10 From a sociological perspective, this book explores issues related to population mobility, family pensions and the lives of workers and peasants during the 70 years of urbanization since the founding of New China from the perspectives of population, pension security, employment structure transformation and social insurance systems, thus exploring the deep logic behind China's successful experience. The relevant issues studied in this book are a systematic summary of the experiences and lessons learned from social reforms since the founding of the country and also provide guidance for the future direction of social development and change. **Social Changes, Crime and Police**

Louise Shelley, József Vigh, 2023-03-31 Originally published in 1995, *Social Changes, Crime and the Police* studies the relationship of social change and crime, the role of the police amidst changing social conditions and the reaction of society and the state to the criminal problem. It examines the essential differences and challenges which confronted countries in Western and Eastern Europe after the collapse of the socialist system. In recent years, many areas of Europe had experienced a period of rapid technological development which had changed economic and cultural structures, creating temporary instability. Within a relatively short period of time, traditional values and beliefs had been undermined. National boundaries and geographical differences had gradually lost their significance and the opening of frontiers had created easier conditions for crime. The nature of crime itself had been transformed by the increasingly close relationships between countries. While many Eastern European countries sought to undo the authoritarian legacies of the socialist period, Western Europe faced new challenges to its urban order. The editors and the contributors also examine the kinds of new policing concepts which may be formulated and the new practices which may develop during the next few decades. Governments must determine the role of the police and the law in accordance with public demands for powerful policing combined with consideration of the individual's rights, thus maintaining the vital balance between personal freedom and social peace.
