Social Interaction and the Development of Knowledge, 2004 *Social Interaction and the Development of Knowledge*
Jeremy I.M. Carpendale, Ulrich M. Ller, 2014-04-04 Written by highly respected theorists in psychology and philosophy the chapters in this book explicate and address fundamental epistemological issues involved in the problem of the relationship between the individual and the collective Different theoretical viewpoints are presented on this relationship as well as between the nature of rationality and morality relativism and universalism and enculturation and internalization Many chapters also highlight similarities and differences between these alternative frameworks and Piaget's theory and thus correct the misperception that Piaget had nothing to say about the social dimension of development Other chapters focus on the implications of these debates for the important topic areas of pedagogy moral development and the development of social understanding in infancy and childhood Although Piaget's theory is presented and evaluated by some of the chapters in this collection the authors remain critical and do not shy away from revising or extending Piaget's theory whenever it is deemed necessary Though the topic covered in this book is of fundamental importance in the social sciences it is rarely addressed in a sustained way as it is in this collection of chapters The book benefits social scientists interested in fundamental epistemological issues especially as these concern the relationship between the individual and the collective with implications for the conceptualization of morality and rationality *Social Interaction and the Development of Language and Cognition* Alison Garton, 1995 For students of developmental psychology this book should be a useful reference guide to the main concepts concerned with motherese scaffolding socio cognitive learning and joint problem solving It is also a contribution to the debate on the influence of social behaviour on development **Social Representations and the Development of Knowledge** Gerard Duveen, Barbara Bloom Lloyd, 1990-03-30 This book raises for the first time developmental issues in relation to the theory of social representations which Duveen and Lloyd introduced to account for the influence of social life on psychological processes He describes a society's values ideas beliefs and practices as social representations which function both as rule systems structuring social life and as codes facilitating communication The editors introduction identifies the need to expand the theory of social representations to consider developmental changes in social beliefs in individual understanding and in the process of communication Individual chapters examine aspects of such processes in the domains of nursery school life of gender of social divisions in society of images of childhood of emotion of intelligence and of psychology In the final chapter Moscovici considers the contribution which these developmental perspectives make to the theory The book will interest specialists and students in the human and social sciences including developmental and social psychology sociology and communication studies **The Development of Social Cognition** Suzanne Hala, 2013-11-12 The Development of Social Cognition presents a lively up to date examination of both the classical issues and contemporary understanding of theory and research in social cognitive development The initial chapters highlight

one of the central theoretical tensions in the field which is whether the development of understanding people is fundamentally different from understanding things Subsequent chapters are devoted to development across specific areas of social cognition from infancy through to adolescence The text ends with a comprehensive examination of the development of moral aspects of social cognition The Development of Social Knowledge Elliot Turiel,1983-04-29 Elliot Turiel s work focuses on the development of moral judgement in children and adolescents and more generally on their evolving understanding of the conventions of social systems This study will be of interest to a wide range of researchers and students in child development and education **Language Development and Social Interaction in Blind Children** Miguel Perez Pereira,Gina Conti-Ramsden,2019-12-09 The Classic Edition of this foundational text includes a new preface from Miguel P rez Pereira examining how the field has developed since first publication The volume provides an in depth account of blind children s developing communicative abilities with particular emphasis on social cognition and language acquisition from infancy to early school age It provides insights into why the development of blind children may differ from that of sighted children and explores development of theory of mind and perspective taking in language learning It also discusses the caregiver child interaction research on early intervention and practical strategies for blind children that can assist parents and practitioners The up to date preface discusses recent neurological research and the comparison between the psychological development of visually impaired and autistic children Language Development and Social Interaction in Blind Children continues to facilitate dialogue between those interested in the study of typically developing children and those interested in the development of children who are blind and challenges some widely held beliefs about the development of communication in blind children **Knowledge Externalities, Innovation Clusters and Regional Development** Jordi Suriñach,Rosina Moreno,Esther Vayá,2007-01-01 This book begins with a theoretical examination of regional innovation systems agglomeration economics and knowledge spillovers before going on to examine the same concepts within an empirical framework Special emphasis is given to the importance of proximity in the formation of regional innovation systems It concludes by considering innovation and human capital as determinants of regional economic growth The concept of knowledge spillovers is used within the book to explain a number of major economic phenomena including the geographical clustering of inventions the social returns to R and the sizeable disproportions that exist between firms in terms of their R D inputs and outputs The contributors identify that small firms are responsible for far more product innovations than large firms relative to their measurable knowledge resources The book also stresses the importance of a catch up mechanism that sees technological improvement as the combination of two distinct types of activity innovation and imitation In this way the impact of human capital and other types of knowledge acquisition on economic growth is measured The conclusions of the contributors are invaluabley oriented to policy implications This book will appeal to researchers and postgraduate students of regional science and innovation and knowledge as well as policymakers **Social Life and Social Knowledge** Ulrich
