Social Organization Of Schools New Conceptualizations Of The Learning Process:

The Social Organization of Schools Maureen T. Hallinan, 2013-06-29 This volume addresses key issues in the sociology of education concerning how schools are organized for instruction and what processes link school organization and instruction to educational achievement The content of the chapters represents a shift in focus from traditional and even recent themes in sociology of education including the study of school effects and of classroom processes to a concern with the social organization of schools and its consequences for student outcomes Rather than reviewing or evaluating existing research the chapters present new and developing conceptualizations of the schooling process and provide theoretical models to guide future empirical work on schools A unique feature of this book is its heavy emphasis on theory Each chapter presents a theoretical model or argument concerning an issue of central importance in sociology of education The empirical analyses and simulations that are included are often more for illustrative purposes than for rigorous hypothesis testing and some chapters have no data analysis at all The major strength of the volume therefore lies in the new conceptualizations and reconceptualizations it provides of fundamental processes relating school organization to student learning Theoretical work such as this is exactly what is needed in an area that has traditionally been for the most part empirical and atheoretical Another important feature of this volume is the various approaches it presents to the study of school organization

Schools and Society: A Sociological Approach to Education Jeanne H. Ballantine, Joan Z. Spade, 2014-02-21 Undergraduate students of the sociology of education education and society and education studies **School as Community** Gail Furman, 2012-02-01 An increasingly important and appealing concept for school renewal is that of school as community While community holds multiple promises for schools little is known about the practice of community in schools This collection furthers our understanding about the nature of school community its practice in public schools and the role of leadership in this practice Of particular importance is the question of how community can be created and sustained in K 12 public schools with highly diverse populations *The International Handbook on the Sociology of Education* Carlos Alberto Torres, Ari Antikainen, 2003 This handbook discusses the social context of education outlining the challenges as well as the advances in public and private education systems at the start of the new millennium It presents an integrated account of social theory and methodologies along with applied perspectives **Schools and Society** Jeanne H. Ballantine, Joan Z. Spade, Jenny M. Stuber, 2017-10-25 This comprehensive anthology features classical readings on the Sociology of Education as well as current original essays by notable contemporary scholars Assigned as a main text or a supplement this fully updated Sixth Edition uses the open systems approach to provide readers with a framework for understanding and analyzing the book's range of topics Jeanne H. Ballantine, Joan Z. Spade and new co-editor Jenny M. Stuber all experienced instructors in this subject have chosen articles that are highly readable and that represent the field's major theoretical perspectives methods and issues The Sixth Edition includes twenty new selections and five revisions of original readings and features new

perspectives on some of the most contested issues in the field today such as school funding gender issues in schools parent and neighborhood influences on learning growing inequality in schools and charter schools Encyclopedia of Education and Human Development Stephen J. Farenga, Daniel Ness, 2015-07-17 This comprehensive and exhaustive reference work on the subject of education from the primary grades through higher education combines educational theory with practice making it a unique contribution to the educational reference market Issues related to human development and learning are examined by individuals whose specializations are in diverse areas including education psychology sociology philosophy law and medicine The book focuses on important themes in education and human development Authors consider each entry from the perspective of its social and political conditions as well as historical underpinnings The book also explores the people whose contributions have played a seminal role in the shaping of educational ideas institutions and organizations and includes entries on these institutions and organizations This work integrates numerous theoretical frameworks with field based applications from many areas in educational research *Roadmap to Restructuring* David T. Conley, 1993 Designed as a guide for practitioners this book draws on over 600 sources to discuss school restructuring definitions trends and issues achievements of a few select schools and implementation techniques and strategies Two overarching indirectly stated issues pervading the reconceptualization of schooling are multiculturalism and a caring school staff The book is organized into four parts Part 1 Rationale and Context presents a historical context for restructuring and a summary of the current motivations for and implications of educational restructuring Part 2 Changing Roles and Responsibilities examines the evolution of new roles for essentially all the groups that participate in public education Part 3 Dimensions of Restructuring explores the concepts of incremental and discontinuous change and extensively discusses current school restructuring activities along 12 dimensions learner outcomes curriculum instruction assessment learning environment technology school community relations time schedules governance teacher leadership personnel definitions and roles and working relationships Part 4 Process of Restructuring captures the lessons being learned about the restructuring process and presents examples of strategies and techniques Contains over 600 references MLH Generating Social Stratification Alan C Kerckhoff, 2018-03-05 In this book some of the leading stratification scholars in the U S present empirical and theoretical essays about the institutional contexts that shape careers Building on recent advances in theory data and analytic technique the essays in this volume work toward the goal of identifying and assessing the processes by which a birth cohort is distributed in the stratification system given their positions of origin in that system Alan Kerckhoff's introduction situates the studies in this volume within the context of previous stratification research over several generations making the book an invaluable resource for scholars and graduate students **Catholic Schools and the Common Good** Anthony S. Bryk, Valerie E. Lee, Peter Blakeley. Holland, Anthony S Bryk, 2009-06-30 The authors examine a broad range of Catholic high schools to determine whether or not students are better educated in these schools than they are in public schools They find

that the Catholic schools do have an independent effect on achievement especially in reducing disparities between disadvantaged and privileged students The Catholic school of today they show is informed by a vision similar to that of John Dewey of the school as a community committed to democratic education and the common good of all students Small Schools, Education, and the Importance of Community Tim L. Adsit, 2011-06-16 Small Schools Education and the Importance of Community focuses on three successful approaches for using the school as a catalyst for community development and revitalization particularly in rural areas The strategies also work well in suburban and urban areas The three approaches described include leadership by K 12 teachers administrators and school boards particularly in the areas of developing schools as community centers community as curriculum and school based economic development Successful case studies are also included *Inequality: Structures, Dynamics and Mechanisms* Arne L. Kalleberg, Stephen L. Morgan, John Myles, Rachel A. Rosenfeld (Deceased), 2004-12-04 Aage Sorensen was an influential intellectual presence who was one of the world's leading authorities on social stratification and the sociology of education His research sought to understand the structures dynamics and mechanisms that underlie inequalities in industrial societies by focusing on how individuals' attainments are shaped by characteristics of a society's or organization's opportunity structure on the one hand and individuals' education experience and other human capital resources on the other He emphasized inequalities associated with education and schooling class and stratification outcomes such as income and occupational status Within these general foci he tackled the study of phenomena as diverse as rates of learning in elementary school reading groups and promotion patterns in large industrial corporations The chapters of this volume illustrate some of the major themes that characterized Aage's research these topics are also likely to constitute important concerns for future efforts to understand structured social inequality in society These themes include the development of explicit dynamic models to account for observed patterns of education career and labor market outcomes aspects of educational inequality such as school effects and learning opportunities issues related to intragenerational mobility and careers and the role of rents in generating structural inequality *James S. Coleman* Dr Jon Clark, Jon Clark, 2005-08-10 James S Coleman was one of a distinguished generation of sociology students who passed through the Columbia Sociology Department in the 1940s and 50s This book critically debates his work and his contribution to society and the social sciences more generally It consists of 18 major papers by 20 authors from six countries on a range of themes The volume is framed by an extended editorial introduction reflecting on the five year exchange of correspondence between James Coleman and the editor together with two of Coleman's own works Second International Handbook of Educational Leadership and Administration Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980s combined with a widespread

belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development

Frontiers in Sociology of Education Maureen T. Hallinan, 2011-07-13 Scholarly analysis in the sociology of education has burgeoned in recent decades Frontiers in Sociology of Education aims to provide a roadmap for sociologists and other social scientists as they set bold new directions for future research on schools In Part 1 of this forward looking volume the authors present cutting edge research to set new guidelines for the sociological analysis of schools In Part 2 notable social scientists historians administrators and educators provide a wide ranging array of perspectives on contemporary education to insure that scholars make creative and broadly informed contributions to the sociological analysis of schools The contributors to this volume examine events currently influencing education including globalization expansion of educational access the changing significance of religion new family structures and curriculum reform Frontiers in Sociology of Education offers an innovative collection of research and ideas aimed at inspiring new analyses of schools better linked to changing societal conditions

Opportunities for Learning Maureen T. Hallinan, 2025-06-15 Opportunities for Learning brings together the works of one of the most highly regarded past presidents of the American Sociological Association focusing on uncovering and addressing educational inequities in elementary and secondary schools Few sociologists of education can rival the depth and breadth of Maureen T Hallinan s contributions to the field This book compiles her writings some of which have never been published before to bring the full insight of both her sociological imagination and her theoretical and empirical research Through articles book chapters and invited lectures Hallinan explores the interplay among theory research and policy Other pieces focus on the importance of opportunities to learn peer friendships and ability grouping for instruction She writes in depth about various attempts of educational reform and the effects of Catholic schools Hallinan sought to address the enduring problems of sociological theorizing and research within education and her writings contribute important insights and provide foundations for the next generation of social scientists This collection demonstrates Hallinan s keen ability to communicate balanced inquiry by engaging multiple perspectives in her theoretical framework coupled with strong empirical testing of the relationships

The Blackwell Companion to Social Inequalities Mary Romero, Eric Margolis, 2008-04-15 The Blackwell Companion to Social Inequalities is a first rate collection of social science scholarship on inequalities emphasizing race ethnicity class gender sexuality age and nationality Highlights themes that represent the scope and range of theoretical orientations contemporary emphases and emerging topics in the field of social inequalities Gives special attention to debates

in the field developing trends and directions and interdisciplinary influences in the study of social inequalities Includes an editorial introduction and suggestions for further reading Handbook of the Sociology of Education Maureen T. Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system **Social Capital** Viva Ona Bartkus, James H. Davis, 2010-01-01 For this book Bartkus and Davis assembled the social capital equivalent of the New York Yankees slugger's row of the 1950s recruiting some of the best Hall of Fame hitters around along with a number of future stars still early in their careers The result is a good reflection of the current state of the literature on social capital Robert D Putnam Harvard University US Social capital is widely used and sometimes misused by scholars policymakers and the general public The time has come for thoughtful reflection synthesis and informed criticism regarding this important concept Bartkus and Davis have developed a ground breaking collection of essays exploring the ideas and evidence underpinning social capital Denise M Rousseau Carnegie Mellon University US At heart social capital is a simple concept that relationships matter Bartkus and Davis foster a vibrant debate among leading scholars as to the critical definition creation and consequences of social capital I commend Bartkus and Davis for their interdisciplinary efforts for there is no more important challenge facing the social sciences today than the exploration of trust and social capital in our society Father Theodore Hesburgh University of Notre Dame US Social capital has taken the social sciences by storm yet remains fraught with controversy Despite its complexity and conceptual difficulties the persistent interest in social capital arises from the fact that it helps us make sense of why people do what they do This book showcases new innovative research in economics politics sociology and management regarding the topic Leading scholars from a variety of disciplines present ground breaking new research exploring the still undiscovered value of social capital The book employs a self consciously multi disciplinary approach to address two

objectives reaching out and reaching in Through theoretical and empirical scholarship the authors explore the many contexts in which the phenomenon can have impact In effect social capital research reaches out to issues of economic well being civic participation educational achievement knowledge and norm formation and competitive advantage Further the authors investigate the many connections between the core themes of social capital and the pillars on which it rests including structural networks cognition relationships and trust This book is fundamentally about bridging bridging across disciplines units of analysis and themes Scholars students and other interested readers from the social sciences and management will find this book challenging and illuminating

The Fractured College Prep Pipeline Heather E. Price, 2021 This book walks readers through the stages of the high school college prep pipeline that introduces interlocked structural barriers to students The author shows how these barriers reinforce segregated structures that unfairly distribute the public good of education to some students and not others Price argues that the college prep pipeline of Advanced Placement and International Baccalaureate coursework in American high schools constitutes a new form of tracking in the 21st century Even further this new tracking introduces a facade of college readiness that veils the unequal learning opportunities that send some students out into the college world with pockets full of counterfeit credentials that serve only to reinforce the historically oppressive system Whether intentional or not this new form of tracking is embedded in schools across the United States and have lifetime consequences for individual students that reinforce historically racial ethnic and spatial inequalities This book is a rigorous and engaging portrait of the architecture of opportunity in American schools With a fine grained analysis that never loses sight of the big picture Heather Price reveals structural realities of college readiness in the United States that are ripe for change Sean Kelly University of Pittsburgh
