This is an extremely optimistic book at a time of great pessimism about the huge forces of globalization and corporate power that seem to be overwhelming us. It will be essential reading for students and practitioners in the fields of organizational learning, sustainability, poverty, international development, and stakeholder relations.

Societal Learning and Change
Steve Waddell, 2017-09-08

Constructing roads in Madagascar, forestry along Canada's Pacific Coast, water and sanitation projects in South Africa, community banking in the United States, constructing a new global system for corporate reporting. These all have something in common. They provide great illustrations of the types of profound and wise changes needed in the way we run our affairs if we are to respond to the scale of environmental and social challenges and opportunities facing us. They are examples of societal learning and change. Today this phenomenon is occurring across industries as diverse as resources extraction, infrastructure development, agriculture, and information technology at the local, national, regional, and global levels. Its essence involves the ability to create rich relationships that bridge large differences. This book describes this phenomenon for practitioners to help them address issues and develop opportunities more effectively. Building on the traditions of individual and organizational learning, this book suggests that our challenge is to create learning societies and processes. This involves both change in ourselves as individuals but also change in the way the three key systems that make up our societies—the political system, government, economic system, business, and social system—civil society function by creating more robust interactions that respond to human and environmental imperatives rather than organizational ones. Societal Learning and Change presents a meta framework that covers diverse approaches including corporate citizenship, social responsibility, community development, private public partnerships, inter sectoral collaboration, and sustainability strategies. It makes sense of all of these by emphasising that they all share the need to change relationships at the societal level and explaining how to do this from a systems perspective. The book helps overcome the conundrum where individual organisations are unsuccessfully trying to achieve big change with their stakeholders. Rather than stakeholder management with an organization centric viewpoint, this book describes the importance of taking a stakeholder engagement and issue opportunity centric strategy. Wherever you are, you can make a contribution to shifting the paradigm through a societal learning and change strategy. The critical contribution is creating new relationships between people and organizations that traditionally would not interact but in fact have common interests. When these relationships become meaningful by addressing a problem or developing an opportunity, people begin to learn about each other and develop mutual appreciation and understanding. Often this process is complicated and confusing. People do not use words in the same way even if they speak the same formal language; they do not learn or perceive the world the same way although they may share a common culture. Their organizations have diverse goals, resources, and weaknesses that make working together problematic. However, it is these very differences that are the source of the value of working together. Societal Learning and Change aims to make it easier to solve differences. In order to work together successfully, it does this by identifying some of the differences as sources

of tension and opportunity and describing the development processes of building relationships that can produce mutually rewarding innovation that is unimaginable when the relationship begins This is an extremely optimistic book at a time of great pessimism about the huge forces of globalization and corporate power that seem to be overwhelming us It will be essential reading for students and practitioners in the fields of organizational learning sustainability poverty international development and stakeholder relations

Accelerating Social Change Luigi Morelli, 2021-11-03 Social change is more than a political statement or demand it is a moral and spiritual imperative If this is so then it involves the whole human being in the way he perceives and thinks feels and relates and acts on and impacts the world This work gathers the threads of pioneers and visionaries in various aspects of social and cultural renewal Paradigms of include and transcend offer us paths along which the personal and the global are intimately intertwined Through established pathways and processes we can experiment with new ways of being as we impact our immediate world Practically speaking this book explores three avenues to change At a first level we can start to recognize that society is built around three poles Besides the public and private sectors civil society has emerged to play a crucial role and alter dualistic thinking If we think beyond capitalism and socialism and all their variations and combinations new unthought of frontiers and possibilities emerge It is possible to expand our practice of democracy beyond the majority minority dynamics to the inclusion of all stakeholders A new art and science of civic collaboration can break the gridlocks of polarization and opposition We can engage in a new area of honest energetic collaboration moving beyond weak compromise through an array of social tools that have grown in the last forty to fifty years and have now reached full maturity Lastly we can expand organizational and social forms in ways that completely break away from the past We can reconcile both entrepreneurial and participatory paradigms and transcend top down or bottom up models in ways that our intellect alone cannot fathom Paradigms offer generous visions but are also exacting masters The new revolution will request as much of ourselves as we will request of the world

Water Governance in the Face of Global Change Claudia Pahl-Wostl,2015-09-04 This book offers the first comprehensive treatment of multi level water governance developing a conceptual and analytical framework that captures the complexity of real water governance systems while also introducing different approaches to comparative analysis Applications illustrate how the ostensibly conflicting goals of deriving general principles and of taking context specific factors into account can be reconciled Specific emphasis is given to governance reform adaptive and transformative capacity and multi level societal learning The sustainable management of global water resources is one of the most pressing environmental challenges of the 21st century Many problems and barriers to improvement can be attributed to failures in governance rather than the resource base itself At the same time our understanding of complex water governance systems largely remains limited and fragmented The book offers an invaluable resource for all researchers working on water governance topics and for practitioners dealing with water governance challenges alike

Learning To Talk Malcolm McIntosh,Sandra Waddock,Georg Kell,2017-09-29 The UN Global Compact complements other corporate citizenship initiatives by promoting dialogue on the relationship between business and society At the same time it is the only truly global corporate citizenship initiative It is not an auditable standard indeed it is not a standard or a code in the way that these are normally viewed It is a set of principles through which business and the United Nations can work in partnership for global social development For some businesses it is a simplified codification of their existing policies and management practices but for many engagement represents a challenge and an opportunity to raise their game by aligning profitability with the common good As the only genuinely global corporate citizenship initiative the Global Compact draws its moral authority from the UN Secretary General and its moral and political legitimacy from the UN as the only global political body It can be viewed as a series of nested networks involving the Secretary General s Office the ILO UNEP UNHCHR UNDP and UNIDO business NGOs and labour It can variously be described as an international learning network as a social network of people and organizations engaged in a global conversation as a global public policy network and as a multi stakeholder dialogue It is all of these things but more than anything its greatest success has been in providing a convening platform for a growing global conversation about social development among a variety of actors However the Global Compact is viewed it is time to reflect on the first tentative steps of an initiative born in the aftermath of the Cold War in the triumph of global economic liberalism and mass demonstrations against globalisation In its first few years the world has experienced 9 11 and the Iraq War not forgetting the forty or so civil wars that are ongoing at this time Whatever is written about the UN Global Compact or its success will be tentative But there can be some serious reflection on its aims and origins some telling of stories of engagement and discussion on how this initiative has quickly become an important reference point in the dialogue on global and corporate governance
