**Sociological Human Ecology** Michael Micklin,Harvey M Choldin,2019-09-18 First published in This volume grew out of concerns raised by the contributors and a few others over the current status of human ecology within the field of sociology Stemming from conferences and subsequent discussions by a group of sociologist demographers on recent developments in sociological human ecology which started at the annual meeting of the Population Association of America in 1976 the original essays

contained in this book are designed to review and assess the current state of knowledge in the field     Homeward Bound Glenn R. Parker, 2010-11-23 Richard Fenno first coined the term home style to describe the ways in which members of Congress cultivate the voters of their home constituencies He suggested that incumbents were paying more attention to their constituents than they had in the past In this book Glenn Parker examines the relationship between activities at home and in Washington asking specifically Why and when did congressmen and senators begin to pay more attention to their constituents And what are the institutional consequences of this change Using data drawn from the travel vouchers filed by incumbent senators and congressmen between 1959 and 1980 Parker shows that since the mid 1960s incumbents have been placing greater emphasis on service to their state or district Congress has facilitated this change in various ways such as by increasing travel allowances and by scheduling that minimizes the conflict between legislative business in Washington and time spent with constituents Parker's study includes both the Senate and House and he draws distinctions between the home style behaviors of senators and representatives He also provides a historical context for understanding the dynamics of changes in home style The time series data generate explanations that specify relationships among historical conditions individual behavior and institutional structures     Structural Equation Modeling Robert Cudeck, K. G. Jöreskog, Dag Sörbom, Stephen Du Toit, 2001     Handbook of Child Psychopathology Michel Hersen, 2013-11-11 Although the field of child psychopathology is of relatively recent origin it is a healthy burgeoning one Within the past 10 to 20 years numerous articles and books have been published and the field can now be described as emerging with an identity of its own No longer can child psychopathology be viewed simply as a downward extension of adult psychopathology Rather children must be viewed as children not as miniature adults Such a situation requires that issues of child psychology and developmental psychology be intimately considered when delineating the problems of children Such a focus has guided our efforts in soliciting contributors and topics for this volume All contributors are active researchers and clinicians in the area of child psychopathology and all are acutely aware of the special considerations of child and developmental psychology as they relate to child behavior problems Further all contributors are empirically minded consequently the various chapters are data based and represent the most up to date knowledge available However since research based knowledge is more abundant in some topic areas than in others the chapters vary in length and scope     Rhetoric And Reality Terrence R Tutchings, 2019-07-11 Since 1945 the role of the president in shaping domestic and foreign policy has changed dramatically Though the prodigious growth of the federal bureaucracy under the Executive Branch reflects much of this change bureaucratic response to the major issues of the past three decades has been ineffective or nonexistent and a notable parallel development has been the increasing use of public commissions in the policymaking process Dr Tutchings studies more than 100 public commissions using a model of the policymaking process that includes demands decision and information costs and policy results and outcomes Reviewing the results of the commissions as reflected in presidential support of recommendations via proposed

legislation and in congressional response he notes that their membership has typically been dominated by government corporate elites as this membership has become more pluralistic there has been a sharp decline in the contributions of the commissions to the policymaking process Perhaps the most significant contribution of the book is its detailed development of the concept of rhetorical policy as a first step in the policymaking process
