Thomas S. Hischak, 2020-05-29 In The Mikado to Matilda British Musicals on the New York Stage Thomas Hischak provides an overview of British musicals that made their way to Broadway covering their entire history up to the present day This is the first book to look at the British musical theatre with reference to those London musicals that were also produced in New York City The book covers 110 British musicals ranging from 1750 to the present day including the popular Gilbert and Sullivan comic operettas during the Victorian era the Andrew Lloyd Webber mega musicals of the late twentieth century and today's biggest hits such as Matilda Each London musical is discussed first as a success in England and then how it fared in America The plots songs songwriters performers and producers for both the West End and the Broadway or Off Broadway production are identified and described The discussion is sometimes critical evaluating the musicals and why they were or were not a success in New York **Hippopotamus** Edgar Williams, 2017-06-15 They are famously fat cumbersome lethargic and oddly charming for the way they lounge around half submerged in muddy pools all day Hippos are gregarious herbivores that don't much like the heat but as Edgar Williams shows in this colorful book they can also be quite ill tempered and their huge mouths sharp tusks and powerful jaws can cut a small boat right in half Taking readers into the swampy lands of Africa as well as a few other surprising places Hippopotamus tells the story of these iconic lumbering beasts As Williams recounts while Hippos are only found in Africa today they actually originated in Asia They are closer relatives to whales than to pigs or horses as previously thought And until the last Ice Age you could find them as far north as Europe Today the common hippo is confined to south central and east Africa and its mysterious cousin the Pygmy Hippo is only found in the forests of Sierra Leone From these natural confines Williams explores how hippos have lived in much wider regions of the human imagination from the hippo deity Taweret in Ancient Egypt to Obaysch the first living hippo exhibited in the London Zoo in the nineteenth century whom Charles Dickens called our illustrious stranger A fascinating history of the hippo in natural and human history this book also serves as a call for conservation efforts to protect this vulnerable animal **Show Tunes** Steven

Suskin, 2010-03-09 Show Tunes fully chronicles the shows songs and careers of the major composers of the American musical

theatre from Jerome Kern's earliest interpolations to the latest hits on Broadway. Legendary composers like Gershwin, Rodgers, Porter, Berlin, Bernstein, and Sondheim have been joined by more recent songwriters like Stephen Schwartz, Stephen Flaherty, Michael John LaChiusa, and Adam Guettel. This majestic reference book covers their work, their innovations, their successes, and their failures. *Show Tunes* is simply the most comprehensive volume of its kind ever produced, and this newly revised and updated edition discusses almost 1,000 shows and 9,000 show tunes. The book has been called a concise skeleton key to the Broadway musical. *Variety* and a ground-breaking reference work with a difference. *Show Music*, or as the *Washington Post* observed, "It makes you sing and dance all over your memory." The eagerly anticipated Fourth Edition, updated through May 2009, features the entire theatrical output of forty of Broadway's leading composers, in addition to a wide selection of work by other songwriters. The listings include essential production data and statistics, the most extensive information available on published and recorded songs, and lively commentary on the shows, songs, and diverse careers. Based on meticulous research, the book also uncovers dozens of lost musicals, including shows that either closed out of town or were never headed for Broadway, and catalogs hundreds of previously unknown songs, including a number of musical gems that have been misplaced, cut, or forgotten. Informative, insightful, and provocative, *Show Tunes* is an essential guide for anyone interested in the American musical.

Round the Church in 50 Years Trevor Beeson, 2007. A superbly entertaining overview of the Church of England over the last fifty years.

Do Dice Play God? Ian Stewart, 2019-09-03. A celebrated mathematician explores how math helps us make sense of the unpredictable. We would like to believe we can know things for certain. We want to be able to figure out who will win an election, if the stock market will crash, or if a suspect definitely committed a crime. But the odds are not in our favor. Life is full of uncertainty; indeed, scientific advances indicate that the universe might be fundamentally inexact, and humans are terrible at guessing. When asked to predict the outcome of a chance event, we are almost always wrong. Thankfully, there is hope. As award-winning mathematician Ian Stewart reveals over the course of history, mathematics has given us some of the tools we need to better manage the uncertainty that pervades our lives. From forecasting to medical research to figuring out how to win, let's make a deal. *Do Dice Play God?* is a surprising and satisfying tour of what we can know and what we never will.

The Seasons Nick Groom, 2014-06-01 For millennia the passing seasons and their rhythms have marked our progress through the year But what do they mean to us now that we lead increasingly atomized and urban lives and our weather becomes ever more unpredictable or extreme Will it matter if we no longer hear even notice the first cuckoo call of spring or rejoice in the mellow fruits of harvest festival How much will we lose if we can no longer find either refuge or reassurance in the greater natural and meteorological scheme of things Nick Groom s splendidly rich and encyclopedic book is an unabashed celebration of the English seasons and the trove of strange folklore and often stranger fact they have accumulated over the

centuries Each season and its particular history are given their full due and these chapters are interwoven with others on the calendar and how the year and months have come to be measured on important dates and festivals such as Easter May Day and of course Christmas on that defining first cuckoo call on national attitudes to weather our seasonal relationship with the land and horticulture and much more The author expresses the hope that his book will not prove an elegy only time will tell
