Sound and Hearing Catherine Veitch, 2009 Introduces the physical properties of sound and hearing and includes everyday examples of different types of sounds

Sound and Hearing Angela Royston, 2008 Describes how sounds are made how they can be heard how people use them and where sounds can travel

Sound & Hearing R. Duncan Luce, 2013-05-13 The major aim of this book is to introduce the ways in which scientists approach and think about a phenomenon hearing that intersects three quite different disciplines the physics of sound sources and the propagation of sound through air and other materials the anatomy and physiology of the transformation of the physical sound into neural activity in the brain and the psychology of the perception we call hearing

Physics biology and psychology each play a role in understanding how and what we hear The text evolved over the past decade in an attempt to convey something about scientific thinking as evidenced in the domain of sounds and their perception to students whose primary focus is not science It does so using a minimum of mathematics high school functions such as linear logarithmic sine and power without compromising scientific integrity A significant enrichment is the availability of a compact disc CD containing over 20 examples of acoustic demonstrations referred to in the book These demonstrations which range from echo effects and filtered noise to categorical speech perception and total more than 45 minutes are invaluable resources for making the text come alive *Sound and Hearing* Claire Llewellyn,2011 This title encourages children to really listen to the rich variety of sounds we hear every day including the different sounds our bodies make Children discover how our ears tell us where a sound is coming from and the ways that hearing keeps us safe
